Making Balkan States William Murray:

The Making of the Balkan States William Smith Murray, 2015-11-23 The Making of the Balkan States is a great overview of the shaping of the Balkans in the 19th century

Beyond Balkanism Diana Mishkova, 2018-07-17 In recent years western discourse about the Balkans or balkanism has risen in prominence Characteristically this strand of research sidelines the academic input in the production of western representations and Balkan self understanding Looking at the Balkans from the vantage point of balkanism has therefore contributed to its further marginalization as an object of research and the evisceration of its agency This book reverses the perspective and looks at the Balkans primarily inside out from within the Balkans towards its self and the outside world where the west is important but not the sole referent The book unravels attempts at regional identity building and construction of regional discourses across various generations and academic subcultures with the aim of reconstructing the conceptualizations of the Balkans that have emerged from academically embedded discursive practices and political usages It thus seeks to reinstate the subjectivity of the Balkans and the responsibility of the Balkan intellectual elites for the concept and the images it conveys The book then looks beyond the Balkans inviting us to rethink the relationship between national and transnational self representation and the communication between local and exogenous Western Central and Eastern European concepts and definitions more generally It thus contributes to the ongoing debates related to the creation of space and historical regions which feed into rethinking the premises of the new area studies
