**Making changes in operational PFI projects** Great Britain: National Audit Office, 2008-01-17 This NAO report forms part of a number of NAO reports looking at PFI Private Finance Initiative projects undertaken across the public sector PFIs are contractual arrangements with private sector companies to design build finance and operate institutions such as schools and hospitals At present there are over 500 operational projects throughout the UK with a combined capital of 44 billion It is also estimated that including future payments with many projects running up until 2031 32 capital will rise to 91 billion Given the length of many of the contracts it is inevitable that operational changes to services will be required so it is important that PFI contracts have flexibility with built in value for money The report is divided into three parts with appendices The NAO has set out a number of finding including that PFI deals are offering sufficient flexibility to the public sector that some projects achieve better value than others but that i higher value changes were not always competitively tendered ii for minor works there was little consistency in the methods used by the public sector iii that the cost of replacing items throughout the life of the contract was also inconsistently applied iv that contractors had often charged additional fees which were not specified in the original contract The NAO recommendations include where there is a relevant contract clause competitive tendering should be undertaken for existing contract deals authorities employing contractors need to put in place consistent and robust means to validate the costs of small changes public authorities should explore with their private sector partners the feasibility of clarifying current contracts so they follow current best practice contract management should be properly resourced in order to manage the change process Public sector authorities could improve value for money of operational changes by adopting a strategic approach to changes keeping a good permanent record of changes and payments made fostering open lines of communication with front line users and other stakeholders as well as the PFI contractor
