Making Capitalism In China The Taiwan Connection:

Making Capitalism in China You-tien Hsing, 1998 *Making Capitalism in China The Taiwan Connection* shows that small and medium sized Taiwanese investors are organized in production and marketing networks not vertically integrated conglomerates. When in China they directly negotiate and establish partnerships with entrepreneurial local officials not the central bureaucracy. Also they effectively transfer a capitalist ideology of production to Chinese factory workers. Importantly the investors attribute their business successes in China to the cultural historical and linguistic affinities they share with these local agents. Connections regarding socio cultural identity do more than facilitate business dealings or ease labor relations. Hsing asserts that partnerships between mainland settlements and overseas Chinese investors constitute a local global coalition of economic reform one that strengthens local autonomy in China and bypasses the control of the central government. This coalition is nothing short of a new pattern of foreign direct investment one profoundly influenced by both cultural boundaries usually deemed insignificant in matters of capital flow and globalization and local state agents who operate in this case as crucial business partners. A notable work that will appeal to all students of East Asian economic organization, ethnic business networks, international investment and the political economy of socialist transition. Hsing's book is based on hundreds of interviews and participatory observations that she conducted between 1991 and 1996 with investors, local officials and factory workers in Taiwan, Hong Kong, Guangdong, Fujian and Shanghai.

Taiwan and The 'China Impact' Gunter Schubert, 2015-12-14 There can be no doubt that China's economic and political rise is having a stronger effect on Taiwan than on any other country given the Chinese government's claim to sovereignty over Taiwan and Taiwan's quest to maintain its democratic achievements and political identity as a sovereign state. Against this background, this volume deals with the bigger picture of evolving relations across the Taiwan Strait, departing from the observation that China's impact on Taiwan has become stronger over the last 20 years. This book analyses the China impact on Taiwan in terms of its social, political and security space from both an empirical and conceptual point of view. It is the first comprehensive account of China's multifaceted impact on the politics and society of contemporary Taiwan, written by renowned scholars from Taiwan, Europe and the U.S. The book covers a wide range of topics including Taiwan's party alignment, elections, generational politics, cross-strait political economy, immigration policy and security. The contributors, political scientists and sociologists, highlight both the dangers and the opportunities of the China impact for Taiwan and draw a realistic picture of the island republic's current situation and future options in the shadow of its giant neighbour. Based on qualitative and quantitative data, this volume intends to fill a gap in the Taiwan studies field by studying the China impact on Taiwan's politics and society systematically and from a comparative perspective. By doing so, it will be of great interest to students and scholars of Taiwan studies and East Asian politics and society more generally.

Insurgency Trap Eli Friedman, 2014-05-08 During the first decade of the twenty-first century, worker resistance in China increased rapidly despite the fact that certain segments of the

state began moving in a pro labor direction In explaining this Eli Friedman argues that the Chinese state has become hemmed in by an insurgency trap of its own devising and is thus unable to tame expansive worker unrest Labor conflict in the process of capitalist industrialization is certainly not unique to China and indeed has appeared in a wide array of countries around the world What is distinct in China however is the combination of postsocialist politics with rapid capitalist development Other countries undergoing capitalist industrialization have incorporated relatively independent unions to tame labor conflict and channel insurgent workers into legal and rationalized modes of contention In contrast the Chinese state only allows for one union federation the All China Federation of Trade Unions over which it maintains tight control Official unions have been unable to win recognition from workers and wildcat strikes and other forms of disruption continue to be the most effective means for addressing workplace grievances In support of this argument Friedman offers evidence from Guangdong and Zhejiang provinces where unions are experimenting with new initiatives leadership models and organizational forms

Border Crossing in Greater China Jenn-hwan Wang, 2014-07-25 China's transformation from a poor and underdeveloped country into a global market power has profoundly altered its socioeconomic power relations with the other countries in the Greater China region namely Taiwan and Hong Kong Indeed this economic shift has resulted in the massive flow of capital and people from Taiwan as well as Hong Kong to China to seek business opportunities and new lifestyles These flows have in turn completely transformed longstanding borderlines in the region This book examines the transformation of Taiwan and Hong Kong's socioeconomic relationships with China as their economies have become more deeply integrated into Greater China Across three key sections it explores the impact of increasing social interaction and the shrinking of existing borderlines to ask whether these changes will bring about a convergence of identity among the people involved Production examines how investments from Taiwan and Hong Kong to China have transformed production networks Community explores the impact of cross boundary mobility and the integration of migrants into Chinese communities and finally Identity engages with what is one of the most important issues in contemporary Taiwanese society Border Crossing in Greater China contributes not only to theoretical debates on border crossing issues but also provides valuable insights on the practical concerns regarding social and political integration and tensions in the region As such it will be of great interest to students and scholars of Taiwan studies Chinese studies Chinese society and Chinese economics *East Asian*

Transformation Jeffrey Henderson, 2011-02-25 From the re emergence of Japan as an industrial power in the 1950s through to the contemporary rise of China as a potential economic and political behemoth the story of East Asian development has been central to any serious analysis of the dynamics and trajectory of the global political economy Integrated into a coherent critical narrative this book examines key political economic and social dynamics that helped forge the miracle economies of East Asia and continue to drive them forward in the volatile circumstances of our current epoch It analyses the relation between the state and markets the changing nature of economic governance and its relation to inequality and the rise of

China and its international consequences Historically informed and comparative in nature the book contributes to the analysis of the transformations of Japan Hong Kong South Korea Taiwan Singapore Malaysia and China and is the first to cover the ground in one volume Written by a leading analyst of East Asian development the book engages with the relevant issues and debates in an open non technical language making it useful as an advanced textbook not only for East Asian studies but more generally in international political economy and development studies The Resurgence of East Asia Giovanni Arrighi, Takeshi Hamashita, Mark Selden, 2004-02-24 The East Asian expansion since the 1960s stands out as a global power shift with few historical precedents The Resurgence of East Asia examines the rise of the region as one of the world's economic power centres from three temporal perspectives 500 years 150 years and 50 years each denoting an epoch in regional and world history and providing a vantage point against which to assess contemporary developments **Linking Industries Across the World** Eike W. Schamp, 2019-06-04 Originally published in 2005 This book examines how regional industries use different networks on various geographical scales in order to withstand increasing competition in a globalising world It argues that new forms of global governance of networked industries are emerging in particular in those areas that have only recently been incorporated into the global economy such as Eastern Europe Asia and Southern Africa The book addresses a number of issues including the different forms of institutional arrangements that contribute to the formation of heterogeneous global industrial networks It also raises the issue of national institutions that still matter in network formation The focus of the book is on how to improve regional and sectoral competitiveness in a global context and it suggests this is best achieved by a close analysis of global linkages an evolutionary perspective on processes taking place and a more differentiated view on globalisation New Dynamics in Cross-Taiwan Straits Relations Weixing Hu, 2013 Relations between mainland China and Taiwan have improved markedly in recent years giving rise to the key question How far can the current rapprochement go This book focuses on how mainland China Taiwan relations are likely to develop in future It considers economic relations including the many recent trade agreements the political sphere where there has been little progress the impact of increasing personal social contacts and the role of international actors especially the United States The book concludes by arguing that the present circulatory dialogue is likely to continue without a transformative breakthrough Corruption and the Secret of Law Monique Nuijten, Gerhard Anders, 2007 This volume offers a critical anthropological perspective on the hidden continuities between corruption and law The authors argue that the two opposites corruption and law are inextricably linked the possibility of the former already inscribed into the latter **Handbook of Research on Asian Business** Henry Wai-Chung Yeung, 2007 This volume is excellent Students who are interested in Asian business should read it and will find the comprehensive bibliography offered by the different contributors very helpful In light of the recent global financial crises it is time to re-examine the Asian miracles as well as the Western models of business organizations and regulations This volume offers great insights not just on Asian business but also on Western economies and

business It is also time to adopt an integrative approach recommended by Yeung through comparative research of businesses and economies in different institutions and cultures Yifei Sun Economic Geography An absolute must have for college library reference shelves filled cover to cover with keen analyses that any businessperson seeking to make inroads in an Asian market needs to study at length Midwest Book Review This book serves as an important guide to the many fascinating research questions about Asian business waiting to be addressed The study of Asian business has reached equality in importance to the study of business in Europe and North America Researchers who study any of these regions have an incentive to follow the study of business in the other regions if for no other reason than that many global firms from each region operate in all regions now Nonetheless the more important reason for knowledge transfer among researchers of each region is that these exchanges can only advance everyone's research Henry Yeung and the contributors are to be thanked for setting out a rich agenda for research on Asian business that will elevate this study to equality with research elsewhere in the world Eurasian Geography and Economics This book is extremely comprehensive and well researched It will be of particular interest to scholars in the fields of international business development studies economic geography regional studies as well as international and national policymakers Science Technology Society The rise of Asia as an important region for global business has been widely recognized as one of the most significant economic phenomena in the new millennium This accessible and comprehensive Handbook brings together state of the art reviews of Asian business in an expansive range of areas including business organizations strategic management marketing state business relations business and development business policy issues It is argued that whilst academic studies on Asian business have been in existence for over two decades there is relatively little systematic integration of our knowledge and research on Asian business The contributors drawn from a variety of disciplines within the social sciences aim to redress the balance with their lively cutting edge discussion Serving as a timely overview of more than two decades of scholarly research this Handbook will be an essential resource for academics students and researchers interested in Asian business **Routledge Handbook of Contemporary**

Taiwan Gunter Schubert, 2024-12-31 This fully revised 2nd edition of the Routledge Handbook of Contemporary Taiwan provides a comprehensive overview of both contemporary Taiwan and the Taiwan studies field Written by an international team of Taiwan experts the Handbook includes major topics in Taiwanese history domestic politics political economy society culture and international relations Each chapter summarises the major findings in the field and highlights long term trends recent observations and potential future developments in Taiwan revealing its long journey from a frontier island to a highly industrialised country struggling for international recognition Up to date interdisciplinary and academically rigorous the Handbook offers the reader an accessible and fascinating insight into contemporary Taiwan and will be of interest to students academics and policymakers with an interest in all things Taiwan Knowing China Frank N. Pieke, 2016-07-28 Contemporary China appears both deceptively familiar and inexplicably different China is a cauldron of forms of

entrepreneurship social organization ways of life and governance that are at once new and unique recognizably Chinese and generically modern In analyzing and interpreting these developments Frank N Pieke adopts a China centric perspective to move beyond western preoccupations desires or fears Each chapter starts with a key question about China showing that such questions and assumptions are often based on a misunderstanding or misconstruction of what China is today Pieke explores twenty first century China as a unique kind of neo socialist society combining features of state socialism neoliberal governance capitalism and rapid globalization Understanding this society not only helps us to know China better but takes us beyond the old dichotomies of West versus East developed versus developing tradition versus modernity democracy versus dictatorship and capitalism versus socialism The Global Rise of China Alvin Y. So, Yin-Wah Chu, 2015-12-08 This book sets out to unravel and explain the puzzle of the global rise of China how in just forty years China has been quickly transformed from a poor backward third world country to one of the world s core economic powerhouses Exactly how did this Chinese developmental miracle happen Focusing on the key historical turning point in China s post socialist development the book examines the complex processes through which China interacted with the global neoliberal project of the late twentieth century Alvin Y So and Yin Wah Chu reveal the centrality of the communist party state in propelling China onto the world scene and how it has successfully responded to the developmental challenges of technological upgrading environmental degradation inter state rivalry and maintaining its power This book provides a comprehensive and insightful study of the rise of China not solely from an economic social and political perspective but also from a global and historical perspective It will be an invaluable guide for students and non specialists interested in post socialist development and the global rise of China in the twenty first century **Emergent Economies, Divergent Paths** Robert C. Feenstra, Gary G. Hamilton, 2006-03-27 This book first published in 2006 offers an explanation of the development paths of post World War II Korea and Taiwan

Taiwan and the Rise of China Baogang Guo, Chung-chian Teng, 2012-08-09 Coincided with China s economic reform and her rapid ascendance to a great power status the relations between Taiwan and Chinese mainland since 1979 have also seen some encouraging development However the rapprochement is nothing but a smooth ride Taiwan Strait has always been full of tensions and hostility since the communist took over the mainland over sixty years ago The periodical tensions in the cross Strait relations have from time to time threatened to derail the peace talks between the two sides and poised to jeopardize the region s peace and stability This book studies the past present and future relations across the Taiwan Strait and examines many important questions such as internal and external factors contributing to the Taiwan s shift in her mainland policy impacts of Taiwan democratization on the cross Strait relations the development of Taiwanese identity and rise of Taiwanese nationalism the possibility of expanding Taiwan s international space under the shadow of China the prospect of reunification between Taiwan and China and the roles of the third parties such as U S NGOs and Taiwan businessmen in the changing relationship between the two sides Taiwan and the Rise of China will certainly help readers especially those who

lack of historical perspective of the political division of the two political adversaries to grasp the complexity and nature of the cross Strait relations and faster a real understanding of the significance of this relationship to peace in the region as well as the world in the 21st century Migrant Labor in China Pun Ngai,2016-04-22 Long known as the world s factory China is

the largest manufacturing economy ever seen accounting for more than 10% of global exports China is also of course home to the largest workforce on the planet the crucial element behind its staggering economic success But who are Chinas workers who keep the machine running and how is the labor process changing under economic reform Pun Ngai a leading expert in factory labor in China charts the rise of China as a world workshop and the emergence of a new labor force in the context of the post socialist transformations of the last three decades The book analyzes the role of the state and transnational interests in creating a new migrant workforce deprived of many rights and social protection As China increases its output of high value high tech products particularly for its own growing domestic market of middle class consumers workers are increasingly voicing their discontent through strikes and protest creating new challenges for the Party State and the global division of labor Blending theory politics and real world examples this book will be an invaluable guide for upper level students and non specialists interested in Chinas economy and Chinese politics and society **Ecological States** Jesse

Rodenbiker,2023-06-15 Ecological States examines ecological policies in the People s Republic of China to show how campaigns of scientifically based environmental protection transform nature and society While many point to China s ecological civilization programs as a new paradigm for global environmental governance Jesse Rodenbiker argues that ecological redlining extends the reach of the authoritarian state Although Chinese urban sustainability initiatives have driven millions of citizens from their land and housing Rodenbiker shows that these migrants are not passive subjects of state policy Instead they creatively navigate resettlement processes in pursuit of their own benefit However their resistance is limited by varied forms of state backed infrastructural violence Through extensive fieldwork with scientists urban planners and everyday citizens in southwestern China Ecological States exposes the ways in which the scientific logics and practices fundamental to China s green urbanization have solidified state power and contributed to dispossession and social inequality With support from the Henry Luce Foundation our goal is to produce all titles in this series both in Open Access for reasons of global accessibility and equity as well as in print editions Internationalizing China David Zweig,2018-05-31 China

began opening to the outside world in 1978 This process was designed to remain under the state s control But the relative value of goods and services inside and outside China drove cities enterprises local governments and individuals with comparative advantage in international transactions to seek global linkages These contacts David Zweig asserts led to the deregulation of China s mercantilist regime Through extensive field research Zweig surveys the extraordinary changes in four sectors of China s domestic political economy the establishment of development zones rural joint ventures the struggle over foreign aid and higher education He also addresses the crucial question of whether on balance internationalization

weakens or strengthens state power **Breaking the China-Taiwan Impasse** Donald S. Zagoria, 2003-10-30 Tensions between China and Taiwan are not likely to abate in the foreseeable future The question of Taiwan's sovereignty is the major point of friction and the continuing impasse between China and Taiwan is worrisome Zagoria presents perspectives from Washington Beijing and Taipei on cross strait tensions exploring ways to break the current standoff Tensions between China and Taiwan are not likely to abate in the foreseeable future The question of Taiwan's sovereignty is the major point of friction and the continuing impasse between China and Taiwan is worrisome Should critical political negotiations falter relations are likely to take on stronger military overtones and the PRC may well develop a sense of urgency about Taiwan drifting towards independence These at least are the broad conclusions drawn from the ongoing dialogues among top U S Chinese and Taiwanese figures sponsored by the National Committee on American Foreign Policy This Track II project provides a forum for top policy analysts from each country to discuss trilateral relations in a frank and constructive manner and is an effort to explore means of peacefully resolving the current impasse Among the more significant findings is that the more serious risks of conflict will probably occur in the distant future hinging on whether economic integration can gradually lead to a reduction of political tensions and that the United States should continue to oppose any declaration of independence by Taiwan and any use of force by China

Manipulating Globalization Ling Chen, 2018-06-12 The era of globalization saw China emerge as the world's manufacturing titan However the made in China model with its reliance on cheap labor and thin profits has begun to wane Beginning in the 2000s the Chinese state shifted from attracting foreign investment to promoting the technological competitiveness of domestic firms This shift caused tensions between winners and losers leading local bureaucrats to compete for resources in government budget funding and tax breaks While bureaucrats successfully built coalitions to motivate businesses to upgrade in some cities in others vested interests within the government deprived businesses of developmental resources and left them in a desperate race to the bottom In *Manipulating Globalization* Ling Chen argues that the roots of coalitional variation lie in the type of foreign firms with which local governments forged alliances Cities that initially attracted large global firms with a significant share of exports were more likely to experience manipulation from vested interests down the road compared to those that attracted smaller foreign firms The book develops the argument with in depth interviews and tests it with quantitative data across hundreds of Chinese cities and thousands of firms Chen advances a new theory of economic policies in authoritarian regimes and informs debates about the nature of Chinese capitalism Her findings shed light on state led development and coalition formation in other emerging economies that comprise the new globalized generation
