*Why Science and Arts Creativities Matter*, 2020-01-20

*Why Science and Arts Creativities Matter* is a ground breaking text which significantly extends current understandings of STEAM and debates about individuation of disciplines vis vis transdisciplinary theory. Drawing upon posthumanism, new materialism and enactivism, this collection of chapters aims to dwell further into the ways in which we come to know in relationship with the world. The text draws together a wide set of approaches and points of views to stimulate dialogue and awareness of the different ways in which we can extend the repertoire of human faculties for thinking and experiencing the world. A unique invitation is shared with readers to develop greater understanding of the contribution of education across the arts and sciences and to re-imagine our collective futures. This book is a unique and timely volume that opens up several new lines of enquiry and arguments on STEAM education. It rebalances and readdresses the current emphasis in the literature around STEAM as another newer opportunity to teach content. Instead it brings a more specific focus on an entwining of contemporary theorists putting theory to work to extend the means for understanding and cultivating science and arts creativities and make explicit key connections with the materiality of practices. This new go-to text offers a demonstration of how the latest research and theoretically engaged thinking, thinking through theory on STEAM education, can be put to work in practice.
