The Arithmetic of Al-Uqlidisi A.S. Saidan, 2012-12-06 The purpose of presenting this book to the scholarly world is twofold In the first place I wish to provide for the English reader a translation of the earliest extant Arabic work of Hindi arithmetic It shows this system at its earliest stages and the first steps in its development a subject not yet well known except for readers of some Arabic publications by the present writer This book is therefore of particular importance for students of the history of mathematical techniques The medieval author Al UqHdisI was it seems not noticed by bibliographers neither was his work which lay hardly noticed by modern scholars until 1960 when I happened to see a microfilm copy of it in the Institute of Arabic Manuscripts in Cairo A steady labour immediately followed to make a comparative study of the text together with over twenty other texts some of them not yet known to scholars This pursuit resulted in i a doctoral degree awarded to me in 1966 by the University of Khartoum ii the publication of several texts in

Arabic including the text here translated and iii the publication of several articles in Arabic and English on the history of arithmetic in the Middle Ages The second purpose of this book is to make the main results of my study available to the English reader

Is Space Three-Dimensional?* P. Janich,2013-03-09 We live in a space we get about in it We also quantify it we think of it as having dimensions Ever since Euclid s ancient geometry we have thought of bodies occupying parts of this space including our own bodies the space of our practical orientations our moving abouts as having three dimensions Bodies have volume specified by measures of length breadth and height But how do we know that the space we live in has just these three dimensions It is theoreti cally possible that some spaces might exist that are not correctly described by Euclidean geometry After all there are the non Euclidian geometries descriptions of spaces not conforming to the axioms and theorems of Euclid s geometry As one might expect there is a history of philosophers attempts to prove that space is three dimensional The present volume surveys these attempts from Aristotle through Leibniz and Kant to more recent philosophy As you will learn the historical theories are rife with terminology with language already tainted by the as sumed but by no means obvious clarity of terms like dimension line point and others Prior to that language there are actions ways of getting around in the world building things being interested in things in the more specific case of dimensionality cutting things It is to these actions that we must eventually appeal if we are to understand how science is grounded **Motor Body-building in All Its Branches** Christopher William Terry,1914 **The Stenographer** ,1894 Illustrated Phonographic World ,1914
