No Quick Fix Mr. Zamid Aligishiev, Mr. Robert Blotevogel, 2025-06-06 Greece has coped with large current account deficits and negative net foreign assets for a long time Now the country has an opportunity to address this vulnerability through the European Union's Recovery and Resilience Facility RRF and its associated Recovery and Resilience Plan RRP The plan involves large public investments and reforms aimed at boosting Greece's long term potential The crucial question is can this ambitious plan fix Greece's external imbalances over the long run Using a small open economy model we track how the RRP may affect savings investment and external balances We find that i a successful RRP RRF can correct most of Greece's external imbalances through a large increase in public savings ii the RRP RRF is no magic bullet as prudent macroeconomic policies will remain necessary to lock in the positive effects over the long run
