Handbook of Japan-United States Environment-behavior Research Seymour Wapner,1997 **Handbook of Japan-United States Environment-Behavior Research** Jack Demick,T. Takahashi,Seymour Wapner,C. Takiji Yamamoto,2013-11-11 This volume is an outgrowth of research on the relations between human beings and their environments which has developed internationally This development is evident in environment behavior research studies conducted in countries other than the United States See Stokols and Altman 1987 for examples of such work in Australia Japan France Germany the Netherlands Sweden the United Kingdom the former Soviet Union and Latin and North America The international development of this research area is also evident in the establishment of professional organizations in different countries such as the Environment Behavior Design Research Association EDRA in the United States the Man Environment Research Association MERA in Japan the International Association for People Environment Studies IAPS in Great Britain and the People and Physical Environment Research Association PAPER in Australia This volume focuses on environment behavior research within Japan and the United States as well as cross cultural studies involving both countries As we note in detail in Chapter 1 the conference on which the work presented herein is based was preceded by three Japan United States conferences on environment behavior research the first of which took place in Tokyo in 1980 As currently conceived the present volume stands alone as a compendium of a significant proportion of cross cultural research on environment behavior relations in Japan and the United States that has been developing over the last 15 years As such we envision the volume as a basic interdisciplinary reference for anthropologists architects psychologists sociologists urban planners and environmental geographers *Theoretical Perspectives in Environment-Behavior Research* Seymour Wapner,Jack Demick,C. Takiji Yamamoto,Hiroufumi Minami,2012-12-06 Following upon the Handbook of Japan United States Environment Behavior Research published by Plenum in 1997 leading experts review the interrelationships among theory problem and method in environment behavior research The chapters focus on the philosophical and theoretical assumptions underlying current research and practice in the area and link those assumptions to specific substantive questions and methodologies The Heart of the Matter Wesley M. Collins,2016-11-16 Can a culture have a theme that unifies seemingly unrelated practices In this volume Collins suggests that Maya Mam customs as different as constructing a house staying healthy seeking God disciplining children agreeing to a contract or just speaking the language all originate from the same concept a search for the center This is far more than mere balance long recognized as a Mayan cultural value Rather center space is a place of physical and metaphysical peace acceptance meaning health happiness and home Collins also shows how centeredness is deeply embedded in the grammar of Mam its lexicon morphology syntax and discourse structure This relatedness of Mam culture and linguistics provides an unusually detailed contribution to the debate on linguistic relativity and the Sapir Whorf hypothesis Collins combines historical accounts with firsthand ethnographic and linguistic methodology

to explore the concept of centeredness Detailed accounts of his personal interaction with the Mam illustrate and enrich the book's concepts This volume will interest students of the relationship between language and culture generally and specifically those interested in the study of Maya of Mexico and Guatemala *Consumer Vulnerability* Susan Dunnett, Kathy Hamilton, Maria Piacentini, 2018-10-18 This book demonstrates that marketing scholarship has much to contribute to our understanding of consumer vulnerability and potential solutions It brings to the fore ways in which so called vulnerable consumers navigate various marketplace and service interactions and develop specific consumer skills in order to empower themselves in such exchanges It does so by exploring how consumer vulnerability is experienced across a range of different contexts such as poverty and disability and the potential impact of vulnerability from childhood to old age Other chapters extend focus from the consumer to the organisational perspective or consider more macro issues such as socio spatial disadvantages The fundamental aim of many of the contributors is to produce work that can benefit individual and societal well being They draw on various methodological approaches that generate both marketing management and policy focused implications A series of commentaries are also included to stimulate critical reflection and new insights into consumer vulnerability This book was originally published as a special issue of the Journal of Marketing Management **The Oxford Handbook of Reciprocal Adult Development and Learning** Carol Hoare, 2011-09-06 This second edition of The Oxford Handbook of Reciprocal Adult Development and Learning explores how advances in one dimension so often lead to positive changes in the other This is new terrain in psychology and learning Implications for research practice and policy emanate from review of empirical literature and theoretical perspectives **Handbook of Adult Development** Jack Demick, Carrie Andreoletti, 2003-01-31 The Handbook of Adult Development is an overview of the major theories and research in the field Included are sections on introductory theory and method biocognitive development in adulthood and social development in adulthood in addition to an introduction and epilogue by the editors This content will be useful for years to come By soliciting contributions from current leading theoreticians and researchers in the field of adult development the volume will present state of the art theory and research on this burgeoning subfield of developmental psychology Professionals clinicians researchers and academics in the larger field of development psychology will find the book an invaluable resource as will graduate students in the same field **Neuromarketing and unconscious choices in the wine market: The role of color** Alessandro Bortolotti, 2023-07-25 The structure of the book is designed to provide a comprehensive exploration of the principles of neuromarketing and their application to the wine production industry in the Abruzzo region of Italy Overall the structure of the book is designed to provide a comprehensive analysis of the principles of neuromarketing and their application to the wine industry with a particular emphasis on the role of color in consumer decision making processes

single parenthood blended families lesbian and gay parents and teen versus fifties first time moms and dads Divided into four volumes the Handbook of Parenting is concerned with different types of parents basic characteristics of parenting forces that shape parenting problems faced by parents and the practical sides of parenting Contributors have worked in different ways toward understanding all of these diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every parent has wondered about Because development is too subtle dynamic and intricate to admit that parental caregiving alone determines the course and outcome of ontogeny *Person-Environment Psychology* W. Price, 2000-05-01 A variety of theoretical approaches to person environment psychology has been developed over the years representing a rich range of intellectual perspectives This second edition links the past and present and looks toward the future in reviewing new directions and perspectives in person environment psychology Stated differently the main thrust of this volume is to present contemporary models and perspectives that make some sensible predictions concerning the individual and the environment using the person environment relationship Within a person environment framework these models and perspectives are concerned with how people tend to influence environments and how environments reciprocally tend to influence people Thus this second edition presents new directions in person environment psychology and the implications for theory research and application **Child Therapy in the Great Outdoors** Sebastiano Santostefano, 2013-04-15 Building on relational conceptualizations of enactment and on developmental research that attests to the role of embodied nonverbal language in the meanings children impute to their experiences Sebastiano Santostefano offers this compelling demonstration of effective child therapy conducted in the great outdoors Specifically he argues that for the child traumatic life metaphors should be resolved at an embodied rather than an exclusively verbal level they should be resolved that is as they are enacted between child and therapist To this end child and therapist must take advantage of all the indoor and outdoor environments available to them As they take therapy to nontraditional places relying on the nonverbal vocabulary they have constructed together they move toward enacted solutions to relational crises solutions that revise the child's sense of self and ability to form new and productive relationships
