Research Methods: Investigation, Measurement and Analysis Ann Bowling, Shah Ebrahim, 2005-06-16 an ideal set text. Angela Scriven, Course Leader Brunel University. Which research method should I use to evaluate services? How do I design a questionnaire? How do I conduct a systematic review of research? This handbook helps researchers to plan, carry out and analyse health research and evaluate the quality of research studies. The book takes a multidisciplinary approach to enable researchers from different disciplines to work side by side in the investigation of population health, the evaluation of health care and in health care delivery. Handbook of Health Research Methods is an essential tool for researchers and postgraduate students taking masters courses or undertaking doctoral programmes in health services evaluation, health sciences, health management, public health, nursing, sociology, socio-biology, medicine and epidemiology. However, the book also appeals to health professionals who wish to broaden their knowledge of research methods in order to make effective policy and practice decisions.
