Heaven And Earth In The Middle Ages The Physical World Before Columbus:

Heaven and Earth in the Middle Ages Rudolf Simek,1996 In this fascinating book Dr Simek shows that though nature was thought to be permeated by the will of God there were numerous explanations for unknown phenomena from the simple theories of the early middle ages to the more sophisticated ideas of the centres of learned scholasticism in Paris and Oxford He presents a cross section of the medieval knowledge of the physical world as deliberated and discussed by authors from the 9th to the 15th centuries [Making the Medieval Relevant](#) Chris Jones,Conor Kostick,Klaus Oschema,2019-12-02 When scholars discuss the medieval past the temptation is to become immersed there to deepen our appreciation of the nuances of the medieval sources through debate about their meaning But the past informs the present in a myriad of ways and medievalists can and should use their research to address the concerns and interests of contemporary society This volume presents a number of carefully commissioned essays that demonstrate the fertility and originality of recent work in Medieval Studies Above all they have been selected for relevance Most contributors are in the earlier stages of their careers and their approaches clearly reflect how interdisciplinary methodologies applied to Medieval Studies have potential repercussions and value far beyond the boundaries of the Middles Ages These chapters are powerful demonstrations of the value of medieval research to our own times both in terms of providing answers to some of the specific questions facing humanity today and in terms of much broader considerations Taken together the research presented here also provides readers with confidence in the fact that Medieval Studies cannot be neglected without a great loss to the understanding of what it means to be human

Sauter,2019-01-11 In The Spatial Reformation Michael J Sauter offers a sweeping history of the way Europeans conceived of three dimensional space including the relationship between

Earth and the heavens between 1350 and 1850 He argues that this spatial reformation provoked a reorganization of knowledge in the West that was arguably as important as the religious Reformation Notably it had its own sacred text which proved as central and was as ubiquitously embraced Euclid's Elements Aside from the Bible no other work was so frequently reproduced in the early modern era According to Sauter its penetration and suffusion throughout European thought and experience call for a deliberate reconsideration not only of what constitutes the intellectual foundation of the early modern era but also of its temporal range The Spatial Reformation contends that space is a human construct that is it is a concept that arises from the human imagination and gets expressed physically in texts and material objects Sauter begins his examination by demonstrating how Euclidean geometry when it was applied fully to the cosmos estranged God from man enabling the breakthrough to heliocentrism and by extension the discovery of the New World Subsequent chapters provide detailed analyses of the construction of celestial and terrestrial globes Albrecht Dürer's engraving Melencolia the secularization of the natural history of the earth and man and Hobbes's rejection of Euclid's sense of space and its effect on his political theory Sauter's exploration culminates in the formation of a new anthropology in the eighteenth century that situated humanity in reference to spaces and places that human eyes had not actually seen The Spatial Reformation illustrates how these disparate advancements can be viewed as resulting expressly from early modernity's embrace of Euclidean geometry

Four Kingdom Motifs before and beyond the Book of Daniel includes thirteen essays that explore the reach and redeployment of the motif in classical and ancient Near Eastern writings Jewish and Christian scriptures texts among the Dead Sea Scrolls Apocrypha and pseudepigrapha depictions in European architecture and cartography as well as patristic rabbinic Islamic and African writings from antiquity through the Mediaeval eras

Introduction to Medieval Europe 300-1500 Wim Blockmans, Peter Hoppenbrouwers, 2017-11-03 Introduction to Medieval Europe 300-1500 provides a comprehensive survey of this complex and varied formative period of European history covering themes as diverse as barbarian migrations the impact of Christianisation the formation of nations and states the emergence of an expansionist commercial economy the growth of cities the Crusades the effects of plague and the intellectual and cultural life of the Middle Ages The book explores the driving forces behind the formation of medieval society and the directions in which it developed and changed In doing this the authors cover a wide geographic expanse including Western interactions with the Byzantine Empire and the Islamic World This third edition contains a wealth of new features that help to bring this fascinating era to life including In the book A number of new maps and images to further understanding of the period Clear signposting and extended discussions of key

topics such as feudalism and gender Expanded geographic coverage into Eastern Europe and the Middle East On the companion website An updated comparative and interactive timeline highlighting surprising synchronicities in medieval history and annotated links to useful websites A list of movies television series and novels related to the Middle Ages accompanied by introductions and commentaries Assignable discussion questions and the maps plates figures and tables from the book available to download and use in the classroom Clear and stimulating the third edition of Introduction to Medieval Europe is the ideal companion to studying Europe in the Middle Ages at undergraduate level [The Mappae Mundi of Medieval Iceland](#) Dale Kedwards, 2020 Front cover Contents Illustrations Acknowledgements Abbreviations Introduction Chapter 1 The Icelandic Hemispherical World Maps Chapter 2 The Icelandic Zonal Map Chapter 3 The Two Maps from Vi ey Chapter 4 Iceland in Europe Chapter 5 Forty Icelandic Priests and a Map of the World Conclusion Map Texts and Translations The Icelandic Hemispherical World Maps The Icelandic Zonal Map The Larger Vi ey Map The Smaller Vi ey Map Bibliography Index Studies in Old Norse Literature *Topos in Utopia: A peregrination to early modern utopianism's space* Sotirios Triantafyllos, 2021-09-07 Topos in Utopia examines early modern literary utopias and intentional communities social and cultural conception of space Starting from Thomas More's seminal work published in 1516 and covering a period of three centuries until the emergence of Enlightenment's eudemonia this work provides a thorough yet concise examination of the way space was imagined and utilised in the early modern visions of a better society Dealing with an aspect usually ignored by the scholars of early modern utopianism this book asks us to consider if utopias imaginary lands are based not only on abstract ideas but also on concrete spaces Shedding new light on a period where reformation zeal humanism's optimism colonialism's greed and a proto scientific discourse were combined to produce a series of alternative social and political paradigms this work transports us from the shores of America to the search for the Terra Australis Incognita and the desire to find a new and better world for us **Transforming Europe in the Images of the World, 1110-1500** Natalia Petrovskaja, 2025-10-01 This is the first book to examine the wide and important geographical tradition that arose from the description of the world in the Imago mundi a medieval encyclopedic bestseller almost unrivalled in popularity from its composition in the 1110s well into the age of print The Imago mundi was translated into most European vernaculars and extracts from it were adapted into vernacular works ranging from encyclopedias to literary fiction verse and prose This is the first study to examine this tradition as a unified whole It focuses in particular on the permutations undergone by the depiction of the region designated as Europe in the original text and its later adaptations The book demonstrates the incredible flexibility of the original text and how this enabled the transformation of this spatial description to suit the linguistic political and cultural needs of vernacular adaptations **Science and Christianity: Close Partners or Mortal Enemies?** Dave Armstrong, 2012-02-13 It's very fashionable nowadays to assert that Christianity and science are antithetical or that God has been ruled out of science or disproven particularly by Darwinian evolution or that science is based on reason

and evidence whereas religion being faith based supposedly cares little or nothing for same or that one cannot consistently be a Christian and also a real scientist I shall contend that not only are science and Christianity completely compatible but that modern science would not have even gotten off the ground if it hadn't been for medieval scholastic Catholic thought I shall demonstrate that the foundations of modern science in the 16th century were overwhelmingly Christian and theistic The notion that science and religion are fundamentally incompatible is ludicrous and would obliterate science at its very roots Includes mini biographies of 293 scientists and a chart of 115 scientific fields of study founded or extraordinarily advanced by Christian or theistic scientists

Erikson, Eskimos & Columbus James Robert Enterline, 2021-04-27 This revealing analysis of Medieval cartography and native American travel upends conventional narratives about discovering the New World For generations American schools have taught children that Christopher Columbus discovered America in 1492 But evidence shows that Leif Erikson set foot on the continent centuries earlier As debate continues over which explorer deserves the credit early maps of North America suggest that we may be asking the wrong questions How did medieval Europeans have such specific geographic knowledge of North America a land even their most daring adventurers had not yet discovered In Erikson Eskimos and Columbus James Robert Enterline presents new evidence that traces this knowledge to the cartographic skills of indigenous people of the high Arctic who he contends provided the basis for medieval maps of large parts of North America Drawing on an exhaustive chronological survey of pre Columbian maps including the controversial Yale Vinland Map this book boldly challenges conventional accounts of Europe's discovery of the New World

The Sea in the Middle Thomas E Burman, Brian A. Catlos, Mark D. Meyerson, 2022-08-23 The Sea in the Middle presents an original and revisionist narrative of the development of the medieval west from late antiquity to the dawn of modernity This textbook is uniquely centered on the Mediterranean and emphasizes the role played by peoples and cultures of Africa Asia and Europe in an age when Christians Muslims and Jews of various denominations engaged with each other in both conflict and collaboration Key features Fifteen chapter structure to aid classroom use Sections in each chapter that feature key artifacts relevant to chapter themes Dynamic visuals including 190 photos and 20 maps The Sea in the Middle and its sourcebook companion Texts from the Middle pair together to provide a framework and materials that guide students through this complex but essential history one that will appeal to the diverse student bodies of today

Medieval Science and Technology Elspeth Whitney, 2004-10-30 Medieval science and technology was firmly rooted in Aristotelian explanations of the physical world This book begins by introducing the basic concepts of the classical tradition and explains how these ideas were promulgated by the ancient Greeks preserved and commented on by

the great Muslim scholars of the early middle ages and finally transmitted to western Europe as that region began to grow and expand around 1100 C E Specific avenues of inquiry such as astronomy and astrology optics chemistry and alchemy zoology geography and medicine are described on their own terms Rounding out the work is a discussion of the many technological innovations of the medieval age such as mechanical clocks firearms and the blast furnace that profoundly altered the course of European and world history Biographical sketches provide insight into the lives and accomplishments of 20 men and women Christian Muslim and pagan whose works profoundly shaped the era s scientific spirit Eleven annotated key primary documents afford a fascinating glimpse into how the best minds of the time posed their questions and their answers An annotated timeline glossary of terms several illustrations and an annotated bibliography round out the work Medieval scientists or natural philosophers as they were then called were powerfully influenced by the authority of older traditions including Christianity and scientific ideas dating back to Plato Aristotle and Ptolemy Yet their respect for these traditions was balanced by an equal respect for reason and the spirit of inquiry Religious faith far from dampening scientific and technological innovation actually buttressed their efforts to understand the natural world as it was generally taken for granted that knowledge acquired through reason would harmonize with religious beliefs While medieval science and technology did not seek to overthrow the prevailing worldviews of the time their accomplishments did lay the groundwork for the scientific revolution and European global expansion of the early modern age Messy Beginnings Malini Johar Schueller, Edward Watts, 2003 When exploring the links between America and post colonialism scholars tend to think either in terms of contemporary multiculturalism or of imperialism since 1898 This book challenges the idea of America s immunity from issues of imperialism **Delw y Byd: A Medieval Welsh Encyclopedia** Natalia I. Petrovskaja, 2020-12-31 This edition presents extracts from the medieval Welsh encyclopedia Delw y Byd A medieval Welsh translation of the first book of the Latin encyclopedia known as Imago Mundi written by Honorius Augustodunensis in the first quarter of the twelfth century this text is a fine example of the ties between the intellectual world of Europe and Wales in the late twelfth early thirteenth centuries when the text was translated ties that brought across the scientific knowledge based on Roman and late antique sources Structured according to the four elements earth water air and fire the text presents geographical anthropological and astronomical information often with historical and mythological contexts The present edition follows that organizational principle providing a glimpse into the medieval understanding of the overarching structure of the universe The text is presented in its historical and literary context with an updated account of its transmission A commentary on the scientific context of the most interesting passages is provided as well as a linguistic one The edition also provides an overview of the variants by printing parallel texts based on all surviving medieval manuscript witnesses for a number of selected chapters This includes sections of two previously unpublished medieval witnesses of the text The accompanying glossary includes vocabulary from all extracts included in the edition **"The Great Ocean of Knowledge"** Ann

Talbot,2010-01-11 The philosopher John Locke 1632 1704 owned one of the most extensive collections of travel literature held in any private scholarly library of his day It is an interest which seems very much at odds with Locke s reputation as an empirical philosopher because travellers reports have acquired a reputation for unreliability This book sets Locke s use of travel literature within the context of the natural historical methods of investigation associated with Francis Bacon and the Royal Society It examines the notes he made in his commonplace books to demonstrate that Locke was developing a form of comparative social anthropology and had a sympathetic attitude towards Native Americans despite his role as a colonial administrator

Worlds without End Mary-Jane Rubenstein,2014-01-28 A religion professor elucidates the theory of the multiverse its history and its reception in science philosophy religion and literature Multiverse cosmologies imagine our universe as just one of a vast number of others Beginning with ancient Atomist and Stoic philosophies Mary Jane Rubenstein links contemporary models of the multiverse to their forerunners and explores the reasons for their recent appearance One concerns the so called fine tuning of the universe nature s constants are so delicately calibrated that it seems they have been set just right to allow life to emerge For some thinkers these fine tunings are evidence of the existence of God for others however and for most physicists God is an insufficient scientific explanation Hence the multiverse s allure if all possible worlds exist somewhere then like monkeys hammering out Shakespeare one universe is bound to be suitable for life Of course this hypothesis replaces God with an equally baffling article of faith the existence of universes beyond before or after our own eternally generated yet forever inaccessible to observation or experiment In their very efforts to sidestep metaphysics theoretical physicists propose multiverse scenarios that collide with it and even produce counter theological narratives Far from invalidating multiverse hypotheses Rubenstein argues this interdisciplinary collision actually secures their scientific viability We may therefore be witnessing a radical reconfiguration of physics philosophy and religion in the modern turn to the multiverse Rubenstein s witty thought provoking history of philosophy and physics leaves one in awe of just how close Thomas Aquinas and American physicist Steven Weinberg are in spirit as they seek ultimate answers
