Narration and Hero Victor Millet, Heike Sahm, 2014-07-28 By the early middle ages vernacular aristocratic traditions of heroic narration were firmly established in Western and Northern Europe Although there are regional linguistic and formal differences one can observe a number of similarities Oral literature disseminates a range of

themes that are shared by narratives in most parts of the continent In all the European regions this tradition of heroic narration came into contact with Christianity which led to modifications Similar processes of adaptation and transformation can be traced everywhere in this field of early European vernacular narrative But with the increasing specialization of academic fields over the last half century inter disciplinary dialogue has become increasingly difficult The volume is a contribution to renew the inter disciplinary dialogue about common themes topics and motifs in Nordic Roman Anglo Saxon and Germanic literature and about the different methodologies to explore them *Re-imagining Periphery* Charlotta Hillerdal, Kristin Ilves, 2020-06-30 This edited volume delves into the current state of Iron Age and Early Medieval research in the North Over the last two decades of archaeological explorations theoretical vanguards and introduction of new methodological strategies together with a growing amount of critical studies in archaeology taking their stance from a multidisciplinary perspective have dramatically changed our understanding of Northern Iron Age societies The profound effect of 6th century climatic events on social structures in Northern Europe a reintegration of written sources and archaeological material genetic and isotopic studies entirely reinterpreting previously excavated grave material are but a few examples of such land winnings The aim of this book is to provide an intense and cohesive focus on the characteristics of contemporary Iron Age research explored under the subheadings of field and methodology settlement and spatiality text and translation and interaction and impact Gathering the work of leading established researchers and field archaeologists based throughout northern Europe and in the frontline of this new emerging image this volume provides a collective summary of our current understandings of the Iron Age and Early Medieval Era in the North It also facilitates a renewed interaction between academia and the ever growing field of infrastructural archaeology by integrating cutting edge fieldwork and developing field methods in the corpus of Iron Age and Early Medieval studies In this book many hypotheses are pushed forward from their expected outcomes and analytical work is not afraid of taking risks thus advancing the field of Iron Age research and also hopefully inspiring to a continued creation of new knowledge *Héliand* James E. Cathey, 2002 James E Cathey's *Héliand* Text and Commentary is a simply unique wonderfully encompassing and helpful text and nothing quite like it exists anywhere in the world The commentary portion of the book consists of an interweaving of interpretation and philological consideration This work presents the reader with explanatory commentary that encompasses both the scientific and the poetic and treats them both with equal felicity The volume also contains something that is exceptionally valuable and cannot be found in English a compact and serviceable grammar of Old Saxon and an appended glossary that defines all of the vocabulary found in this edited version of the *Héliand* **Anglo-Saxon Keywords** Allen J.
