

HELL AND HIGH WATER

ALASTAIR McINTOSH

**CLIMATE CHANGE MAY BE THE GREATEST CHALLENGE
THE WORLD HAS EVER FACED.**

In this groundbreaking new book, Alastair McIntosh looks at the science of what is happening to the planet today. Politics alone is not enough to tackle the likely scale of global warming. The root lies in our addictive consumer mentality: wants have replaced needs to define our very identity.

In a breath-taking journey through myth, philosophy and literature, McIntosh reveals the psychohistory of modernity. He shows how our inner lives have fallen prey to a numbing culture of violence and the motivational manipulation of marketing. To address what has become of the human condition we must learn to see beyond despair and even death. Only then will we discover the spiritual meaning of these, our troubled times; only then can a sense of magic and all that gives life start to mend a broken world.

Hell And High Water Climate Change Hope And The Human Condition:

Hell and High Water Alistair McIntosh, 2012-07-30 The ecologist and author of *Soil Soul* makes a compelling and provocative argument for a new way of life in the face of climate change Climate change is the greatest challenge that the world has ever faced In this groundbreaking book Alastair McIntosh summarizes the science of what is happening to the planet using his home country of Scotland as a case study He then argues that the root of our climate crisis is not in our politics but in our consumerism an addictive mentality where wants have replaced needs and consumption drives our very identity In a fascinating journey through literature that speaks to climate change including the ancient Sumerian Epic of Gilgamesh Plato's myth of Atlantis and Shakespeare's *Macbeth* McIntosh reveals the psychohistory of modern consumerism He shows how we have fallen prey to a numbing culture of violence and the manipulation of marketing Only when we resist these vices and face reality will we discover the spiritual meaning of our troubled times Only then can magic new meaning and all that gives life start to mend a broken world What McIntosh does brilliantly here is offer an alternative deeply humanist version of green politics The Scotsman UK *ThirdWay*, 2008-04 Monthly current affairs magazine from a Christian perspective with a focus on politics society economics and culture

Radical Human Ecology Rose Roberts, 2016-04-08 Human ecology the study and practice of relationships between the natural and the social environment has gained prominence as scholars seek more effectively to engage with pressing global concerns In the past seventy years most human ecology has skirted the fringes of geography sociology and biology This volume pioneers radical new directions In particular it explores the power of indigenous and traditional peoples epistemologies both to critique and to complement insights from modernity and postmodernity Aimed at an international readership its contributors show that an inter cultural and transdisciplinary approach is required The demands of our era require a scholarship of ontological depth an approach that can not just debate issues but also address questions of practice and meaning Organized into three sections Head Heart and Hand this volume covers the following key research areas Theories of Human Ecology Indigenous and Wisdom Traditions Eco spiritual Epistemologies and Ontology Research practice in Human Ecology The researcher researched relationship Research priorities for a holistic world With the study of human ecology becoming increasingly imperative this comprehensive volume will be a valuable addition for classroom use

The Local Food Revolution Michael Brownlee, 2016-10-18 Demonstrating that humanity faces an imminent and prolonged global food crisis Michael Brownlee issues a clarion call and manifesto for a revolutionary movement to localize the global food supply He lays out a practical guide for those who hope to navigate the challenging process of shaping the local or regional food system providing a roadmap for embarking on the process of righting the profoundly unsustainable and already failing global industrialized food system Written to inform inspire and empower anyone farmers or ranchers community gardeners aspiring food entrepreneurs supply chain venturers commercial food buyers restaurateurs investors community food activists non profit agencies policy makers or local government leaders who hopes to be a catalyst for change this book provides a blueprint for economic action with specific suggestions that make the process more conscious and deliberate Brownlee cofounder of the nonprofit Local Food Shift Group maps out the underlying process of food localization and outlines the route that communities regions and foodsheds often follow in their efforts to take control of food production and distribution By sharing the strategies that have proven successful he charts a practical path forward while indicating approaches that otherwise might be invisible and unexplored Stories and interviews illustrate how food localization is happening on the ground and in the field Essays and thought pieces explore some of the challenging ethical moral economic and social dilemmas and thresholds that might arise as the local food shift develops For anyone who wants to understand in concrete terms the unique challenges and extraordinary opportunities that present themselves as we address one of the most urgent issues of our time **The Local Food Revolution** is an indispensable resource

Down to the Wire David W. Orr, 2009-09-17 Down to the Wire is a major wake up call offering a wide range of pragmatic far reaching proposals some of which have already been adopted by the Obama administration for how we might reconnect public policy with rigorous science bring our economy into alignment with ecological realities and begin to regard ourselves as planetary trustees for future generations He offers inspiring real life examples as well of people already responding to the major threat to our future

Landscape Below Bruce C Ball, 2015-02-10 Aimed at all concerned about the environment this book presents a radical vision of the future of farming and community life based on hidden insights from the life and spirit of the soil and on the author s experiences of growing up in the small agricultural community of Clatt in North East Scotland Bruce Ball is a soils specialist with a research and consultancy career spanning 35 years His regular contact with soil in the field and with farmers has led to a deep understanding of the critical importance of soil to our future survival

The Politics of Actually Existing Unsustainability John Barry, 2012-02-23 At the level of developing a progressive and critical theoretical understanding of unsustainability it argues for the importance of integrating vulnerability which has been largely neglected by both mainstream western political theory and analyses of the current global ecological crisis It suggests that valuable insights into

the causes of and alternatives to unsustainability can be found in a critical embracing of human vulnerability and dependency as both constitutive and ineliminable aspects of what it means to be human Rather than seeing invulnerability as the appropriate response the book defends resilience and the ability to cope with rather than solve vulnerability as more productive

Leibniz and the Environment Pauline Phemister, 2016-03-31 The work of seventeenth century polymath Gottfried Wilhelm Leibniz has proved inspirational to philosophers and scientists alike In this thought provoking book Pauline Phemister explores the ecological potential of Leibniz's dynamic pluralist panpsychist metaphysical system She argues that Leibniz's philosophy has a renewed relevance in the twenty first century particularly in relation to the environmental change and crises that threaten human and non human life on earth Drawing on Leibniz's theory of soul like interconnected metaphysical entities he termed monads Phemister explains how an individual's true good is inextricably linked to the good of all Phemister also finds in Leibniz's works the rudiments of a theory of empathy and strategies for strengthening human feelings of compassion towards all living things Leibniz and the Environment is essential reading for historians of philosophy and environmental philosophers and will also be of interest to anyone seeking a metaphysical perspective from which to pursue environmental action and policy

Eco-Republic Melissa Lane, 2013-11-24 Ancient lessons for sustainable citizenship An ecologically sustainable society cannot be achieved without citizens who possess the virtues and values that will foster it and who believe that individual actions can indeed make a difference Eco Republic draws on ancient Greek thought and Plato's Republic in particular to put forward a new vision of citizenship that can make such a society a reality Melissa Lane develops a model of a society whose health and sustainability depend on all its citizens recognizing a shared standard of value and shaping their personal goals and habits accordingly Bringing together the moral and political ideas of the ancients with the latest social and psychological theory Lane illuminates the individual's vital role in social change and articulates new ways of understanding what is harmful and what is valuable what is a benefit and what is a cost and what the relationship between public and private well being ought to be Eco Republic reveals why we must rethink our political imagination if we are to meet the challenges of climate change and other urgent environmental concerns Offering a unique reflection on the ethics and politics of sustainability the book goes beyond standard approaches to virtue ethics in philosophy and current debates about happiness in economics and psychology Eco Republic explains why health is a better standard than happiness for capturing the important links between individual action and social good and diagnoses the reasons why the ancient concept of virtue has been sorely neglected yet is more relevant today than ever

Nature, Knowledge and Negation Harry F. Dahms, 2009-12-04 Places emphasis on developments in the social theory of environmental issues the environment and the environmental crisis This also emphasises on the increasingly questionable possibility of shared knowledge at a time of increasing fragmentation of common frameworks distraction from key issues and dilution of the idea of objectivity

The Future of Consumer Society Maurie J. Cohen, 2017 Shows how consumer society is changing due to

demographic ageing rising income inequality political paralysis resource scarcity and steady jobs being replaced by freelancing It examines how people are striving to find new ways to ensure livelihoods and the role that the role that worker consumer cooperatives could play *Spiritual Activism* Alastair McIntosh, Matt Carmichael, 2015-09-24 A visionary but practical sharing of how spiritual insights and deepening our inner lives can impact leadership for social change Over the past half century the issues facing activists have changed as has our understanding and awareness of spirituality For activists spiritual philosophy is rising up the agenda because it offers distinct tried and tested approaches to deep questions Where did it all go wrong What does it mean to be human What is the place of leadership What is the nature of power Spiritual Activism begins by defining spirituality for a modern audience of all faiths and beliefs and goes on to consider the problems and necessities of true leadership Drawing on a rich history of spirituality and activism from The Bhagavad Gita to the Hebrew prophets to Carl Jung it is both guide and inspiration for people involved in activism for social or environmental justice Written by Scottish writer Alastair McIntosh and climate activist Matt Carmichael the text is enriched with tales from the authors own experiences It also contains case studies of inspirational spiritual activists including Mama Efua Desmond Tutu Gerrard Winstanley Sojourner Truth and Julia Butterfly Hill which demonstrate the transformative power of spiritual principles in action Transform your understanding of spiritual activists with this empowering and thoughtful read

Looking to the Future Derek Hodson, 2011-10-25 In advocating an action oriented and issues based curriculum this book takes the position that a major but shamefully neglected goal of science and technology education is to equip students with the knowledge skills attitudes and values to confront the complex and often ill defined socioscientific issues they encounter in daily life as citizens in an increasingly technology dominated world carefully critically confidently and responsibly In outlining proposals for addressing socioscientific issues through a curriculum organized in terms of four increasingly sophisticated levels of consideration the author adopts a highly critical and politicized stance towards the norms and values that underpin both scientific and technological development and contemporary scientific engineering and medical practice criticizes mainstream STS and STSE education for adopting a superficial politically naive and hence educationally ineffective approach to consideration of socioscientific issues takes the view that environmental problems are social problems occasioned by the values that underpin the ways in which we choose to live and urges teachers to encourage students to reach their own views through debate and argument about where they stand on major socioscientific issues including the moral ethical issues they often raise More controversially the author argues that if students are to become responsible and politically active citizens the curriculum needs to provide opportunities for them to experience and learn from sociopolitical action The relative merits of direct and indirect action are addressed notions of learning about action learning through action and learning from action are developed and a case is made for compiling a user friendly database reflecting on both successful and less successful action oriented curriculum initiatives Finally the book considers some of the important teacher

education issues raised by this radically new approach to teaching and learning science and technology The book is intended primarily for teachers and student teachers of science technology and environmental education graduate students and researchers in education teacher educators curriculum developers and those responsible for educational policy The author is Emeritus Professor of Science Education at the Ontario Institute for Studies in Education University of Toronto Adjunct Professor of Science Education at the University of Auckland and Visiting Professor of Science Education at the University of Hong Kong His research interests include considerations in the history philosophy and sociology of science and their implications for science and technology education STSE education and the politicization of both students and teachers science curriculum history multicultural and antiracist education and teacher education via action research Physics of Radiation and Climate Michael A. Box, Gail P. Box, 2015-10-14 Our current climate is strongly influenced by atmospheric composition and changes in this composition are leading to climate change Physics of Radiation and Climate takes a look at how the outward flow of longwave or terrestrial radiation is affected by the complexities of the atmosphere's molecular spectroscopy This book examines the planet in **Mission as God's Spiral of Renewal** R. Ross, 2019-02-06 In this remarkable volume covering diverse subjects in a span of three decades Kenneth R Ross articulates his views on the meaning and practice of Christian mission and challenges the binary view of mission that prevailed before the 1950s He further reflects on Scotland's experiences in the world wide Christian mission and demonstrates the centrality of Africa in any discourse on Christianity This volume is invaluable in its argument for a rethinking of Christian mission especially in relation to the West which is now a new frontier for Christian mission The book will be immensely beneficial to students of missiology and general readers who are interested in the subject of Christian Mission The New Nomads Felix Marquardt, 2021-07-08 We have lost the plot when it comes to migration In our collective consciousness the term migration conjures up images of hordes of refugees fleeing their country escaping on rafts and coming to invade ours When we think of migration we think of largely unwanted immigration and its ills We've got it all wrong Far from being abnormal the act of going in search of a better life is at the core of the human experience And now a new kind of nomad is emerging What used to be a movement largely from east to west south to north developing to developed country is becoming more of a multilateral phenomenon with each passing day Young people from everywhere are moving everywhere Or rather they are moving to where they expect to improve their lives and are turning the world into a beauty contest of cities and regions and companies vying to attract them They are doing so because movement has become a key to their emancipation After centuries of becoming sedentary the future of humanity and the key to its enlightenment in the 21st century lies in re-embracing nomadism Migration fosters the qualities that will allow our children to flourish and succeed Our times require more migration not less Part memoir part generational manifesto The New Nomad is both the chronicle of this revolution and a call to embrace it
