Uncharted Constellations John C. Barentine, 2016-04-04 This book compiles an array of interesting constellations that fell by the wayside before the IAU established the modern canon of constellations That decision left out lesser known ones whose history is nevertheless interesting but at last author John Barentine is giving them their due This book is a companion to The Lost Constellations highlighting the more obscure configurations The 16 constellations found in this volume fall into one or more of three broad categories asterisms such as the Big Dipper in Ursa Major single sourced constellations introduced on surviving charts by a cartographer perhaps currying the favor of sponsors and re brands new figures meant to displace existing constellations often for an ideological reason All of them reveal something unique about the development of humanity's map of the sky

Reading the Way to the Netherworld Ilinca Tanaseanu-Döbler, Gabriela Ryser, 2016-12-05 The volume focuses on the various representations of the Beyond in later Antiquity a period of intense interaction and competition between various religious traditions and ideals of education The concepts and images clustering around the Beyond form a crucial focal point for understanding the dynamics of religion and education in later Antiquity Although Christianity gradually supersedes the pagan traditions the literary representations of the Beyond derived from classical literature and transmitted through the texts read at school show a remarkable persistence they influence Christian late antique writers and are still alive in medieval literature of the East and West A specifically Christian Beyond develops only gradually and coexists subsequently with pagan ideas which in turn vary according to the respective literary and philosophical contexts Thus the various conceptualisations of the great existential unknown serves here as a point of reference for mirroring the changes and continuities in Imperial and Late Antique religion education and culture and opening up further perspectives into the Medieval world

Renaissance Miniature Painters & Classical Imagery Lilian Armstrong, 1981 This book is a contribution to our understanding of Renaissance art in Northern Italy It is principally concerned with the work of two unnamed miniature painters active in Venice in the 1470s and 1480s a time of transition from manuscript illumination to the decoration of printed books in the classicizing style of the Renaissance
