The Oxford Handbook of Sociology and Organization Studies Paul S. Adler, 2009 Organizations are a defining feature of the modern world and the study of organizations Organization Studies has become well established in both sociology departments and professional schools most notably business and management schools Organization Studies has long drawn inspiration from foundational work in sociology The sociological lens affords depth of insight into the technological economic cultural and political forces that shape organizations from both within and without In particular classical works in sociology have long energized organizational research primarily by suggesting ways of making sense of the ever accelerating pace of social change In recent decades however the field has lost interest in these sociology classics This trend reflects and reinforces an increasingly academic focus of contemporary Organization Studies Not only does this trend weaken Organization Studies engagement with the big social issues of our time but it isolates the field from the broader field of the social sciences The aim of this Handbook is to re assert the importance of classical sociology to the future of Organization Studies Alongside several thematic chapters the volume includes chapters on each of nearly two dozen major European and American theorists each of these chapter addressing a the ideas and their context b the impact of these ideas on the field of Organization Studies and c the potential future research these ideas might inspire The goal is not reverential exegesis but rather to examine how the classics can energize organizational research This wide ranging Handbook with contributions from leading American and European scholars will be a vital informative and stimulating resource for anybody undertaking research in teaching or interested in learning more about Organization Studies today About the Series Oxford Handbooks in Business Management bring together the world s leading scholars on the subject to discuss current research and the latest thinking in a range of interrelated topics including Strategy Organizational Behavior Public Management International Business and many others Containing completely new essays with extensive referencing to further reading and key ideas the volumes in hardback or paperback serve as both a thorough introduction to a topic and a useful desk reference for scholars and advanced students alike

Oxford Handbook of Sociology, Social Theory and Organization Studies Paul S. Adler, Paul du Gay, Glenn Morgan, Michael Reed, 2014-10-16 Sociology and social theory has always been a major source of new perspectives for organization studies Access to a series of authoritative accounts of theorists and research themes in sociology and social theory which have influenced developments in organization studies is essential for those wishing to deepen and extend their knowledge of the intersection of sociology and organization studies This goal is achieved by drawing on a group of internationally renowned scholars committed in their own work to strengthening these links and asking them to provide critical accounts of particular theorists and research themes which have straddled this divide This

volume aims to strengthen ties between organization studies and contemporary sociological work at a time when there are increasing institutional barriers to such cooperation potentially generating a myopia that constricts new developments Used in conjunction with its companion volume *The Oxford Handbook of Sociology and Organization Studies* Classical foundations the reader is provided with a comprehensive account of the productive and critical interaction between sociology and organization studies over many decades Highly international in scope theorists and themes are drawn from both the USA and Europe in equal measure Similarly the authors of the chapters are drawn from both sides of the Atlantic The result is a series of chapters on individuals and key research themes and debates which will provide faculty and post graduate researchers with appreciative authoritative and critical accounts that can be drawn on to design courses or provided guided reading to the field
