Heating, Cooling, Lighting Norbert M. Lechner, 2014-09-23 Sustainable environmental control through building design Heating Cooling and Lighting is the industry standard text on environmental control systems with the emphasis on sustainable design By detailing the many factors that contribute to the comfort in a building this book helps architects minimize mechanical systems and energy usage over the life of the building by siting building design and landscaping to maximize natural heating cooling and lighting This new fourth edition includes new information on integrated design strategies and designing for the Tropics Resources include helpful case studies checklists diagrams and a companion website featuring additional cases an image bank and instructor materials Designing buildings that require less energy to heat cool and light means allowing the natural energy of the sun and wind to reduce the burden on the mechanical and electrical systems Basic design decisions regarding size orientation and form have a great impact on the sustainability cost and comfort of a building Heating Cooling and Lighting provides detailed guidance for each phase of a design project Readers will Understand the concept of sustainability as applied to energy sources Review the basic principles of thermal comfort and the critical role of climate Learn the fundamentals of solar responsive design including active and passive solar systems as well as photovoltaics Discover how siting architectural design and landscaping can reduce the requirements for mechanical and electrical systems In sustainable design mechanical and electrical systems should be used to only accomplish what the architect could not by the design of the building itself With this in mind designers require a comprehensive understanding of both the properties of energy and the human factors involved in thermal comfort Heating Cooling and Lighting is the complete industry leading resource for designers interested in sustainable environmental control      **Heating, Cooling, Lighting** Norbert Lechner, 1991-01-16 Using a qualitative rather than a quantitative approach presents detailed information based on concepts rules guidelines intuition and experience for architects in the areas of heating cooling and lighting at the schematic design stage The data explored supports a three tiered approach load avoidance using natural energy sources and mechanical equipment Among the topics covered are shading thermal envelope passive heating and cooling electric lighting and HVAC Case studies illustrate how certain buildings use techniques at all three tiers for heating cooling and lighting An appendix lists some of the more appropriate computer programs available to the architect for analysis at the schematic design stage      **Heating, Cooling, Lighting** Norbert M. Lechner, Patricia Andrasik, 2021-09-20 The essential guide to environmental control systems in building design For over 25 years Heating Cooling Lighting Sustainable Design Strategies Towards Net Zero Architecture has provided architects and design professionals the knowledge and tools required to design a sustainable built environment at the schematic design stage This Fifth Edition offers cutting edge research in the field of sustainable architecture and design and has been completely restructured based on net zero design strategies Reflecting the latest developments in codes standards and rating systems for energy efficiency Heating Cooling Lighting Sustainable Design
