Intelligent Decision Systems in Large-Scale Distributed Environments Pascal Bouvry,Horacio González-Vélez,Joanna Kołodziej,2011-06-19 One of the most challenging issues for the intelligent decision systems is to effectively manage the large scale complex distributed environments such as computational clouds grids ad hoc and P2P networks under the different types of users their relations and real world uncertainties In this context the IT resources and services usually

belong to different owners institutions enterprises or individuals and are managed by different administrators These administrators conform to different sets of rules and configuration directives and can impose different usage policies on the system users Additionally uncertainties are presented in various types of information that are incomplete imprecise fragmentary or overloading which hinders the full and precise determination of the evaluation criteria their subsequent and selection the assignment scores and eventually the final integrated decision result This book presents new ideas analysis implementations and evaluation of the next generation intelligent techniques for solving complex decision problems in large scale distributed systems In 15 chapters several important formulations of the decision problems in heterogeneous environments are identified and a review of the recent approaches from game theoretical models and computational intelligent techniques such as genetic memetic and evolutionary algorithms to intelligent multi agent systems and networking are presented We believe that this volume will serve as a reference for the students researchers and industry practitioners working in or are interested in joining interdisciplinary works in the areas of intelligent decision systems using emergent distributed computing paradigms It will also allow newcomers to grasp key concerns and potential solutions on the selected topics **Abstract State Machines - Theory and Applications** Yuri Gurevich,Philipp W. Kutter,Martin Odersky,Lothar Thiele,2000-08-23 The ASM 2000 workshop was held in the conference center of the Swiss Federal Institute of Technology ETH at Monte Verit a Canton Ticino March 19 24 2000 The ASM formalism was proposed together with the thesis that it is suitable to model arbitrary computer systems on arbitrary abstraction levels ASMs have been successfully used to analyze and specify various hardware and software systems including numerous computer languages The aim of the workshop was to bring together domain experts using ASMs as a practical speci cation method and theorists working with ASMs and related methods In addition the workshop served as a forum on theoretical and practical topics that relate to ASMs in a broad sense Three tutorials including hands on experience with tools were organized by U Gl asser and G del Castillo on the topic Specifying Concurrent Systems with ASMs H Russ and N Shankar on the topic A Tutorial Introduction to PVS M Anlau P W Kutter and A Pierantonio on the topic Developing Domain Speci c Languages In response to the organization committee s call for papers 30 papers were submitted each of which was independently reviewed by four members of the program committee This volume presents a selection of 12 of the refereed papers and two reports on industrial ASM application at Siemens AG and Microsoft Research together with contributions based on the invited talks given by A

are organized in topical sections on public key cryptography side channel attacks cryptographic protocols cryptanalysis and symmetriccryptography   Susceptibility vs. Resistance Nataliya Levkovych,2022-05-09 The topic of the volume is the contrast between borrowable categories and those which resist transfer Resistance is illustrated for the unattested emergence of grammatical gender the negligible impact of English and Spanish on the number category in Patagonian Welsh the reluctance of replicas to borrow English but MAT borrowing does not imply the copying of rules as the Spanish function words in the Chamorro irrealis show Chamorro and Tetun Dili look similar on account of their contact induced parallels The languages of the former USSR have borrowed largely identical sets of conjunctions from Russian Arabic and Persian to converge in the domain of clause linkage Resistance against and susceptibility to transfer call for further investigations to the benefit of language contact theory
