Henle's layer of the inner root sheath is not uniform. Rather, cells drastically change during the course of differentiation. By simply comparing electron micrographs of cells of a layer at different degrees of differentiation, one can hardly recognize them as belonging to the same layer. As readers will see, this book contains many superb electron micrographs from low magnification panoramic views for orientation to high power views showing ultrastructural detail. Captions and schematic drawings are also very helpful in reading electron micrographs and understanding the structural detail. In this way, Dr. Morioka has succeeded in dissecting the complex hair follicle at the ultrastructural level. The Science of Transitioning Audrey Davis-Sivasothy, 2015-12-22
