Handbook Of Disaster Medicine Handbook Of Disaster Medicine:

Handbook of Disaster Medicine De Boer Staff, Marcel Dubouloz, 2000 *Handbook of Disaster Medicine* Jan de Boer, Marcel Dubouloz, 2020-04-28 Technological development has not only provided mankind with more prosperity but with increased destructive power as well. These developments combined with an explosive growth of the world population have led to mass casualty situations varying from traffic accidents to war. In the 20th Century over 200 million people were killed as a result of man made disasters a figure unequalled in the history of mankind. It is not surprising therefore that a new medical discipline has emerged disaster medicine. The realization that disasters have effects which cross the traditional boundaries of medical specialisms and nationality led to the foundation of the International Society of Disaster Medicine ISDM which issued an international curriculum on education and training in disaster medicine. As a logical consequence the ISDM decided to develop its curriculum into a handbook now available to the global community of disaster medicine specialists. This Handbook of Disaster Medicine contains contributions from international experts in the field and will be of value and interest to a wide variety of professionals in the discipline of disaster medicine and management. *Oxford American Handbook of Disaster Medicine* Robert A. Partridge, Lawrence Proano, David Marcozzi, Alexander G. Garza, Ira Nemeth, Kathryn Brinsfield, Eric S. Weinstein, 2011-07-15 Disasters are difficult to manage for many reasons the immediacy of the event magnitude of the event lack of evidence based practices and the limited usefulness of many developed protocols. Consequently combining academic approaches with realistic and practical recommendations continues to be an underdeveloped aspect of disaster texts. The Oxford American Handbook of Disaster Medicine offers a functional blend of science with pragmatism. Approached from a real world perspective the handbook is a portable guide that provides sufficient scientific background to facilitate broader application and problem solving yet approach the topic in a prioritized fashion supporting rapid understanding and utilization. Contributing authors are clinical and public health providers with disaster experience. This book encompasses the entire scope of disaster medicine from general concepts and fundamental principles to both manmade and natural threats. **Handbook of Bioterrorism and Disaster Medicine** Robert Antosia, John D. Cahill, 2006-12-22 The Handbook of Bioterrorism and Disaster Medicine was created because we felt there was no effective handbook that covered the breadth and scope of this field. Our book incorporates concise chapters on topics and diseases with abundant web based references and careful organization. We hope that all healthcare providers interested or involved with the care of victims of bioterrorism or disaster including prehospital care providers medical students nurses physicians and those involved with public health or humanitarian aid find it indispensable. We wish to thank the numerous authors who contributed to this handbook. Throughout the book consistency of style and depth provide the reader with easy and reliable access to the vast amount of information needed to understand prepare for and deal with a bioterrorist attack or disaster. The chapters in this book have been based on scientific studies and data when available. However more research is needed to more

Handbook of Disaster and Emergency Management. First Edition Amir Khorram-Manesh, 2017-10-10 We propose here a comprehensive educational program based on the best available evidence to date drawn from recent publications intended to impart the knowledge skills and abilities necessary for the role of crisis manager We expect this program to enhance the intercultural and interagency performance across the Disaster Management DM cycle Here Intercultural does not refer to different nations and cultural backgrounds but rather to working cultures within diverse agencies Since communication and information shortcomings are the most common reason for failed DM this educational program focuses heavily on collaboration and interoperability between trained professionals involved in disaster response to ensure that they understand the need for collaboration and are aware of each other's limitations and possibilities The aim of programs such as this is not to re educate people in respect to their profession area of expertise but rather to train them in elements specific to DM and ways in which they can apply their existing knowledge and professional expertise in the disaster context Such multidisciplinary programs cover all disaster phases accommodate the needs of each organization and offer a safe environment where participants are able to learn by doing in an interactive environment vertically within their own organization and horizontally together with other organizations by focusing on shared training cooperation and intercultural understanding Such programs bring some degree of standardization and offer a thorough evaluation of participants and the program by using evidence based scientific methods One important part of the program is to offer a standardized handbook in which all necessary information is gathered This is not intended as a substitute for reference books but it is intended to make the information accessible and easy to learn so that the information can be combined with the practical parts of the education
