Spectroscopic Methods in Food Analysis Adriana S. Franca,Leo M.L. Nollet,2017-12-14 Given the inherent complexity of food products most instrumental techniques employed for quality and authenticity evaluation e g chromatographic methods are time demanding expensive and involve a considerable amount of manual labor Therefore there has been an increasing interest in simpler faster and reliable analytical methods for assessing food quality attributes Spectroscopic Methods in Food Analysis presents the basic concepts of spectroscopic methods together with a discussion on the most important applications in food analysis The determination of product quality and authenticity and the detection of adulteration are major issues in the food industry causing concern among consumers and special attention among food manufacturers As such this book explains why spectroscopic methods have been extensively employed to the analysis of food products as they often require

minimal or no sample preparation provide rapid and on line analysis and have the potential to run multiple tests on a single sample i.e. non destructive This book consists of concepts related to food quality and authenticity that are quite broad given the different demands of the manufacturer the consumer the surveillance and the legislative bodies that ultimately provide healthy and safe products Analysis of Nanoplastics and Microplastics in Food Leo M.L. Nollet, Khwaja Salahuddin Siddiqi, 2020-12-02 The world's ever increasing use of plastics has created large areas of floating plastic waste in the oceans so called plastic soup This floating plastic debris is gradually fragmenting into smaller particles which eventually become microplastics and even nanoplastics Analysis of Nanoplastics and Microplastics in Food compiles data on nanoplastics and microplastics in food To date there is some data on this particularly for the marine environment Fish show high concentrations but because microplastics are mostly present in the stomach and intestines they are usually removed and consumers are not exposed But in crustaceans and bivalve molluscs like oysters and mussels the digestive tract is consumed so there is some exposure Microplastics have also been reported in honey beer and table salt Key Features Discusses sampling and analysis of nano and microplastics Details the impacts of plastic residues in diverse compartments of the environment Includes a discussion of microplastics in freshwater Discusses interactions of microplastics and POPs This book brings to light the reality and dangers of microplastics in food Pollutants like polychlorinated biphenyls PCBs and polycyclic aromatic hydrocarbons PAHs can accumulate in microplastics Some studies suggest that after consuming microplastics in food these substances may transfer into tissues So it is important to estimate the average intake Since engineered nanoparticles from different types of nanomaterials can enter human cells this reality can pose consequences for human health Also available in the Food Analysis and Properties Series Mass Spectrometry Imaging in Food Analysis edited by Leo M L Nollet ISBN 978 1 138 37069 2 Proteomics for Food Authentication edited by Leo M L Nollet and Semih tle ISBN 978 0 367 20505 8 Food Aroma Evolution During Food Processing Cooking and Aging edited by Matteo Bordiga and Leo M L Nollet ISBN 978 1 138 33824 1 For a complete list of books in this series please visit our website at www.crcpress.com Food Analysis Properties book series CRCFOODANPRO **Testing and Analysis of GMO-containing Foods and Feed** Salah E. Analysis of Food Spices Leo M.L. Nollet, Javed Ahmad, Javed Ahamad, 2023-09-11 Spices are obtained from natural sources especially from plants and are used in cooking food in whole or grounded forms mainly for imparting flavor aroma and piquancy Besides their role in improving food quality spices also have health benefits that are anticancer antidiabetic antimicrobial antioxidant hypolipidemic analgesic immunostimulant and more Spices are generally marketed in powder form and their supply chain is very long and complicated which is why they are particularly susceptible to adulteration at many points The spice supply chain is considered to be moderately vulnerable and has an ineffective quality detection system in its final product which is the main risk factor There are many types of fraud nowadays related to spices such as adulteration falsification substitution and inaccurate labeling

Analysis of Food Spices Identification and Authentication provides an overview of spices of different categories such as terpenes and terpenoids oleoresins alkaloids and polyphenolics and flavonoids as well as qualitative and quantitative guidelines for ensuring their quality and safety using modern analytical tools and techniques The first section of the book discusses the overview sources and health benefits of important categories of spices such as terpenes and terpenoids cardamom cinnamon clove coriander cumin fennel oleoresins capsicum ginger nutmeg alkaloids black pepper fenugreek and polyphenolics and flavonoids basil turmeric olive saffron In the second section qualitative diagnostic features of spices are covered In the third section the roles of quantitative analytical techniques such as HPLC LC MS HPTLC GC and GC MS capillary electrophoresis CE and other recent techniques in the analysis of food spices are also discussed Each chapter concludes with a general reference section which is a bibliographic guide to more advanced texts

Key Features Provides a detailed overview of different food spices of plant origin and discusses their health benefits and uses of different analytical techniques in its quality control Explains how qualitative diagnostic features of food spices are utilized as quality control tools Describes applicability of analytical techniques like HPLC LC MS GC MS HPTLC and CE for quality control of food spices Emphasizes use of recent techniques such as proteomics biosensors and more in the analysis quality control of food spices This book will provide important guidelines for controlling quality safety and efficacy issues related to food spices

Multiresidue Methods for the Analysis of Pesticide Residues in Food Horacio Heinzen, Leo M.L. Nollet, Amadeo R. Fernandez-Alba, 2017-10-10 In the last decades the public concern on the pesticide residues content in foods have been steadily rising The global development of food trade implies that aliments from everywhere in the world can reach the consumer's table Therefore the identification of agricultural practices that employ different pesticides combinations and application rates to protect produce must be characterized as they left residues that

could be noxious to human health. However, the possible number of pesticides and its metabolites of toxicological relevance to be found in a specific commodity is almost 1500 and the time needed to analyze them one by one makes this analytical strategy a unrealistic task. To overcome this problem, the concept of Multi Residue Methods (MRM) for the analysis of pesticide traces have been developed. The advent of new and highly sensitive instrumentation based in hyphenated chromatographic systems to coupled mass analyzers (GC-MS/MS or LC-MS/MS) permitted simultaneously the identification and the determination of up to hundreds of pesticide residues in a single chromatographic run. Multi-residue Methods for the Analysis of Pesticide Residues in Food presents the analytical procedures developed in the literature as well as those currently employed in the most advanced laboratories that perform routinely Pesticide Residue Analysis in foods. In addition to these points, the regulations, guidelines and recommendations from the most important regulatory agencies of the world on the topic will be commented and contrasted.

Bioactive Peptides from Food Leo M.L. Nollet, Semih Ötles, 2022-03-28 A growing body of scientific evidence has revealed that many food peptides exhibit specific biological activities in addition to their established nutritional value. Bioactive peptides present in foods may help reduce the worldwide epidemic of chronic diseases that account for a great number of premature deaths annually. Bioactive peptides can be defined as isolated small fragments of proteins which provide some physiological health benefits. They act as potential modifiers reducing the risk of many chronic diseases. *Bioactive Peptides from Food Sources: Analysis and Functions* considers fundamental concepts: sources, hydrolysis, fractionation, purification, analysis, chemical synthesis, functions, and regulatory status of nutraceutical bioactive peptides. Methods of isolation of these peptides from different protein sources with their in vitro and vivo physiological effects are addressed. Divided into seven sections, this book delves into how these peptides play a major role in the development of various functional foods. Numerous bioactive peptides have been reported in recent years as naturally present or generated from food proteins of different origins like milk, eggs, soya, fish and meat. **Key Features:** Includes a detailed study of the different sources of bioactive peptides; Discusses the health benefits such as antimicrobial, anti-allergic, antihypertensive, antitumor and immunomodulatory properties of peptides; Explores the state of the art analysis methods of peptides; Discovers the bioinformatics of possible bioactive peptides. Written by experts in their field from around the world, *Bioactive Peptides from Food* reveals the world of databases of peptides. It is a great resource for food scientists, technologists, chemists, nutrition researchers, producers and processors working in the whole food science and technology field as well as those who are interested in the development of innovative functional products.

Proteomics for Food Authentication Leo M.L. Nollet, Semih Ötles, 2020-05-07 Consumers have the right to know what is in the food they are eating and accordingly a number of global food regulations require that the provenance of the food can be guaranteed from farm to fork. Many different instrumental techniques have been proposed for food authentication. Although traditional methods are still being used, new approaches such as genomics, proteomics and metabolomics are helping to complement existing methodologies for

verifying the claims made about certain food products During the last decade proteomics the largescale analysis of proteins in a particular biological system at a particular time has been applied to different research areas within food technology Since proteins can be used as markers for many properties of a food even indicating processes to which the food has been subjected they can provide further evidence of the foods labeling claim Proteomics for Food Authentication a volume in the Food Analysis and Properties Series is a comprehensive and updated overview of the applications drawbacks advantages and challenges of proteomics for food authentication Features Provides a comprehensive and critical overview of the application of proteomics in food Helps food scientists determine the authenticity of several food products Provides applied techniques for both laboratory and industrial environments Describes workflows technologies and tools that are being assessed in proteomics related studies Workflows technologies and tools that are being assessed in proteomics related studies are described followed by a review of the specific applications regarding food authenticity and now and then food quality The book will provide a comprehensive and critical overview of the application of proteomics approaches to determine the authenticity of several food products updating the performances and current limitations of the applied techniques in both laboratory and industrial environments As such it is well suited to food scientist chemical engineers food engineers research labs universities governments related food industries Also available in the Food Analysis and Properties Series Food Aroma Evolution During Food Processing Cooking and Aging edited by Matteo Bordiga and Leo M L Nollet ISBN 9781138338241 Ambient Mass Spectroscopy Techniques in Food and the Environment edited by Leo M L Nollet and Basil K Munjanja ISBN 9781138505568 Hyperspectral Imaging Analysis and Applications for Food Quality edited by N C Basantia Leo M L Nollet and Mohammed Kamruzzaman ISBN 9781138630796 For a complete list of books in this series please visit our website at www.crcpress.com Food Analysis Properties book series CRCFOODANPRO
