Lerner, 2004-01-01 This collection assembles early yet previously unpublished research into the practices that organize conversational interaction by many of the central figures in the development and advancement of Conversation Analysis as a discipline Using the methods of sequential analysis as first developed by Harvey Sacks the authors produce detailed empirical accounts of talk in interaction that make fundamental contributions to our understanding of turntaking action formation and sequence organization One distinguishing feature of this collection is that each of the contributors worked directly with Sacks as a collaborator or was trained by him at the University of California or both Taken together this collection gives readers a taste of CA inquiry in its early years while nevertheless presenting research of contemporary significance by internationally known conversation analysts

The Consequentiality of Communication Stuart J. Sigman, 2013-11-05 In a bold attempt to redirect the ways theories of communication are conceived and research on communication processes are conducted this volume questions prevailing communication scholarship that emphasizes the cultural psychological and sociological variables that impact on and or are impacted by communication Instead of focusing on the consequences of communication this books urges readers to examine the consequentiality of communication what it is about the communication process that enables it to play a defining role in our lives Communication is not a neutral conveyor of meanings derived from culture cognition or social structure and is not explained by correlations with external variables Meaning emerges from the communication process itself it is dependent upon what transpires during the real time moments of communicators behaving with each other To properly study this new paradigm a new vocabulary for thinking about the consequentiality of communication is needed and proposed Four theoretical orientations are used to stake out this new territory coordinated management of meaning neo rhetorical theory conversation analysis and social communication theory While there are points of agreement and overlap on the need to study communication as inherently consequential there are also differences across the four theories in the value of rules as an explanatory concept on the relationship between structure and process and on the very constitution of a theory Thus this book has the benefit of articulating a new paradigm for communication scholarship without losing sight of the discipline s rich diversity

Positioning in Media Dialogue Elda Weizman, 2008 This book proposes a socio pragmatic exploration of the discursive practices used to construe and dynamically negotiate positions in news interviews It starts with a discursive interpretation of positioning role and challenge puts forward the relevance of a distinction between social and interactional roles demonstrates how challenges bring to the fore the relevant roles and role components of the participants and shows that in news interviews speakers constantly position and re position themselves and each other through discourse The discussion draws on an empirical fine grained analysis of a 24 hour corpus of news interviews on Israeli television and a corpus of media references The author postulates a discrepancy between interlocutors normative expectations which presuppose an asymmetrical division of labor on the one hand and real life practice which exhibits partial symmetry in speakers selection of discourse patterns as well as reciprocity in the use of challenge strategies on the other

Special attention is given to irony and terms of address which are shown to act as the center points of satellite challenge strategies geared as an ensemble toward the co construction of reciprocal positioning The analysis of three case studies further sheds light on the negotiations of intertwined positionings in context

Early studies of political behavior examined the sociological attitudinal and rational determinants of political behavior However none of these approaches provided a descriptive model of how people process political information and make political decisions under naturalistic conditions that involve limited cognitive capacity and motivation Fortunately contemporary approaches within the field of political psychology have begun to address these concerns Inspired by recent advances in the area of social psychology researchers are rapidly developing more realistic and detailed models of the psychological process that determines political judgements and behavior Early attempts to merely predict political behavior have been replaced by an attempt to describe the actual process whereby individuals gather interpret exchange and combine information to arrive at a political judgement or decision This volume provides comprehensive coverage of this pioneering era of research in political psychology
