Treating ADHD in Children and Adolescents Russell A. Barkley, 2022-04-08 From foremost authority Russell A Barkley this book presents essential principles and practices for managing attention deficit hyperactivity disorder ADHD in children and teens Barkley interweaves the best scientific knowledge with lessons learned from decades of clinical practice and research He provides guidelines and clinical tips for conducting thorough accurate assessments and developing and implementing science based treatment plans The book is grounded in Barkley s theory of ADHD as a disorder of executive functioning and self regulation Ways to collaborate successfully with parents and other professionals are highlighted throughout In a convenient large size format the volume includes 45 reproducible handouts and forms that can be downloaded and printed for repeated use **Neuroanatomical Correlates of Emotion Reactivity and Regulation**

Nicole Roven Giuliani, 2011 Morphometric studies reveal that the volumes of many brain structures differ between clinical and non clinical populations Specifically populations characterized by affective disturbances related to heightened emotional reactivity and diminished emotion regulation have been found to possess smaller volumes of brain structures involved in emotion reactivity and regulation I sought to determine whether similar associations would be found between brain structure

and trait emotion reactivity and regulation in healthy individuals Specifically I predicted that emotion reactivity as measured by negative affect would be negatively related to the volume of the ventral anterior cingulate cortex insula orbitofrontal cortex and amygdala and that emotion regulation as measured by usage of expressive suppression and cognitive reappraisal would be positively related to the volume of the dorsal and ventral anterior cingulate cortex dorsolateral prefrontal cortex hippocampus orbitofrontal cortex cerebellar vermis and anterior insula I tested these predictions using two complementary methods region of interest ROI and voxel based morphometry VBM In Study 1 which used a sample of healthy adult women trait usage of expressive suppression was correlated positively with the volume of the middle frontal gyrus and anterior insula and negatively with ventral anterior cingulate volume Trait usage of cognitive reappraisal was correlated positively with the volume of the bilateral dorsal anterior cingulate cortex All of these correlations were found using both ROI and VBM methods In Study 2 which used a more diverse sample of healthy males and females ranging in age from 10 to 22 self reported levels of trait negative affect was correlated negatively with posterior insula volume although this finding was not confirmed using VBM Both ROI and VBM revealed that trait suppression usage frequency was correlated positively with right ventral anterior cingulate and anterior insula volume The strength of the relationship between suppression and anterior insula volume increased as subject age increased Although no ROIs were found to correlate with trait reappraisal usage frequency VBM found that reappraisal positively correlated with gray matter clusters in the prefrontal cortex The findings from this dissertation demonstrate that the structural alterations seen in individuals suffering from mood and anxiety disorders may not result from psychopathology per se but may instead be on the lower end of the continuum of emotion reactivity emotion regulation and associated brain structure

Social Control and Self-Control Theories of Crime and Deviance L. Edward Wells, 2017-07-05

Control theories have dominated criminological theory and research since the 1969 publication of Hirschi's seminal work on the social bond Social control and self control theorists are unique in suggesting that patterns in criminal behaviors are better explained by variations in social constraints rather than by individual motivational impulses thus indicating that their main concerns are the explication and clarification of the techniques processes and institutions of informal social control The four major sections of this volume focus on the similarities and differences among the major contributors to the early developmental stage of social control theory the central importance of parents peers and schools in the creation of informal control mechanisms and their link to crime and delinquency the theoretical underpinnings of self control theory including empirical tests and criticisms and theoretical integrations of social control and self control theories with various motivational theories of crime and delinquency

The Influence of Theorists and Pioneers on Early Childhood

Education Roy Evans,Olivia N. Saracho,2022-02-23 The chapters in this book reflect on the major shifts in the views of early childhood thinkers and educators who have contributed to contemporary theoretical frameworks pertaining to early childhood learning The book also revisits and critically analyses the influence of developmental theories on early childhood education starting in the 1890s with the work of G Stanley Hall that established the close association of early childhood education and child development Several chapters comprise critical examinations of the fundamental influence of thinkers such as Piaget Vygotsky Kohlberg Adler Pestalozzi Froebel and so on on early childhood learning The book also contends that these theoretical conceptions of child development have heavily influenced modern views of early childhood education This book is a significant new contribution to early childhood learning and will be a great resource for academics researchers and advanced students of Education Public Policy History of Education Psychology and Sociology The chapters in this book were originally published as a special issue of the Early Child Development and Care
