Light Paper Process Reinventing Photography:

Light, Paper, Process Virginia Heckert, 2015-04-14 From its beginnings photography has been shaped by the desire to understand and explore the essence of the medium Light Paper Process features the work of seven artists Alison Rossiter Marco Breuer James Welling Lisa Oppenheim Chris McCaw John Chiara and Matthew Brandt who investigate the possibilities of analog photography by finding innovative surprising and sometimes controversial ways to push light sensitive photographic papers and chemical processing beyond their limits A panoply of practices emerges in the work of these artists Some customize cameras with special lenses or produce images on paper without a camera or film Others load paper rather than film in the camera or create contact printing with sources of light other than the enlarger while still others use expired photographic papers and extraneous materials such as dust and sweat selected to match the particular subject of the photograph All of the artists share a willingness to embrace accident and chance Trial and error contribute to an understanding of the materials and their potential as do the attitudes of underlying curiosity and inventive interrogation The act of making each image is like a performance with only the photographer present The results are stunning This lavish publication accompanies an eponymous exhibition on view at the J Paul Getty Museum from April 14 to September 6 2015

Sculptural Materiality in the Age of Conceptualism Marin R. Sullivan, 2017-07-05 Sculptural Materiality in the Age of Conceptualism is structured around four distinct but interrelated projects initially realized in Italy between 1966 and 1972 Yayoi Kusama's Narcissus Garden Michelangelo Pistoletto's Newspaper Sphere Sfera di giornali Robert Smithson's Asphalt Rundown and Joseph Beuys's Arena These works all utilized non traditional materials collaborative patronage models and alternative modes of display to create a spatially and temporally dispersed arena of matter and action with photography

serving as a connective material thread within the sculpture it reflects While created by major artists of the postwar period these particular projects have yet to receive substantive art historical analysis especially from a sculptural perspective Here they anchor a transnational narrative in which sculpture emerged as a node a center of transaction comprising multiple material phenomenon including objects images and actors When seen as entangled polymorphous entities these works suggest that the charge of sculpture in the late postwar period came from its concurrent existence as both three dimensional phenomena and photographic image in the interchanges among the materials that continue to activate and alter the constitution of sculpture within the contemporary sphere
