Zaloga,2015-01-20 The T 26 was the first major Soviet armour program of the 1930s beginning as a license built version of the British Vickers 6 ton export tank Although the T 26 retained the basic Vickers hull and suspension the Red Army began to make extensive changes to the turret and armament starting with the addition of a 45mm tank gun in 1933 The T 26 was built in larger numbers than any other tank prior to World War II Indeed more T 26 tanks were manufactured than the combined tank production of Germany France Britain and the United States in 1931 40 This book surveys the development of the T 26 as well as its combat record in the Spanish Civil War the war in China the border wars with Poland and Finland in 1939 40 and the disastrous battles of 1941 during Operation Barbarossa

Russian Light Tank T-26 Luca Stefano Cristini,2023 The Russian T 26 was a light tank designed for infantry support produced in the Soviet Union from 1931 It did not originate as an autonomous design but was mainly derived from the British Vickers 6 ton or Vickers Type E vehicle The T 26 tanks were armed with two parallel turrets in the centre of the hull each equipped with a light machine gun The next step was to install a 27 mm or 37 mm cannon on one turret This was replaced by a 45 mm piece and this increased the armour piercing and explosive power Known as the Mod 1933 it was a great success and was produced alone in around 5 500 examples an exceptional run for the time Versions derived from the T 26 were the OT 26 flamethrower with a flamethrower instead of a cannon the OT 33 which had both the ST 26 bridge carrier to give tank divisions the necessary mobility against natural obstacles the T 26 A 4 U railing radio command tank and many others

Light Tanks Mikhail Baryatinskiy,2006 It is one of the ironies of Soviet tank development that a country opposed to free enterprise and capitalism was largely reliant on influences from Britain and the USA for many of its early designs However unhindered by many of the tactical constraints that affected tank development in the West the Red Army was able to acquire and develop technology that was under rated in both Britain and the USA From Britain the famous manufacturer Vickers produced a Six Ton light tank effectively rejected by the War Office one example was acquired by the Russians and this formed the basis of the Russian T 26 of 1931 Further British designs also influenced the later light tanks equipment which

was pivotal to the Red Army during its campaigns in Manchuria Finland and against the initial German assault in 1941 In the USA Walter Christie was also largely ignored as a designer but as with Vickers his designs came to be highly important His influence was seen in the BT short for Bystrochodri or Fast Tank series of light medium tanks that was first introduced in 1932 The BT series saw service in Spain Manchuria Finland and in the defense of Russia itself in 1941 The critical aspect of the Christie design was that the vehicles were capable of operating both with nor without tracks in the latter case eight road wheels carried the weight of the vehicle with steering being achieved via a steering wheel acting in conjunction with the clutch brake system In the second of the new Soviet Tanks series Mikhail Baryatinsky provides the reader with a comprehensive account of the development and operational record of Soviet light tanks Utilizing photographs line drawings and speciallyprepared artworks he provides a detailed portrait of these highly successful tanks Aimed at the modeler military historian and war gamer the new Soviet Tanks series is designed to provide probably for the first time in the English language authoritative information on the classic Soviet tank designs of the 20th century The series will be required reading for all those interested in the development of armored warfare over the past 100 years T-26 in Detail Miroslav Baric, Mike Collins, **Multi-Turreted Tanks** Source Wikipedia, 2013-09 Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online Pages 24 Chapters T 26 Char 2C FCM F1 Vickers 6 Ton T 28 T 35 Medium Mark III Cruiser Mk I Neubaufahrzeug T 24 tank Vickers A1E1 Independent T 100 tank SMK tank Type 95 Heavy Tank Excerpt The T 26 tank was a Soviet light infantry tank used during many conflicts of the 1930s as well as during World War II It was a development of the British Vickers 6 Ton tank and is widely considered one of the most successful tank designs of the 1930s It was produced in greater numbers than any other tank of the period with more than 11 000 produced During the 1930s the USSR developed approximately 53 variants of the T 26 including other combat vehicles based on its chassis Twenty three of these were mass produced The T 26 was used extensively in the armies of Spain China and Turkey In addition captured T 26 light tanks were used by the Finnish German Romanian and Hungarian armies Though nearly obsolete by the beginning of World War II the T 26 was the most important tank of the Spanish Civil War and played a significant role during the Battle of Lake Khasan in 1938 as well as in the Winter War in 1939 40 The T 26 was the most numerous tank in the Red Army s armored force during the German invasion of the Soviet Union in June 1941 The Soviet T 26 light tanks last saw use in August 1945 during the Soviet invasion of Manchuria The T 26 was reliable and simple to maintain and its design was continually modernised between 1931 and 1941 However no new models of the T 26 were developed after 1940 The T 26 was a Soviet development of the British Vickers 6 Ton Vickers Mk E light tank which was designed by the Vickers Armstrongs Company in 1928 1929 The simple and easy to maintain Vickers 6 Ton was intended especially for export to less technically advanced countries the Soviet Union Poland Brazil Argentina **World War II Soviet Tanks** Source Wikipedia, 2013-09 Please note that the content of this book primarily consists of articles available from
