Limited-dependent and Qualitative Variables in Econometrics Gangadhar Rao S. Maddala, 1985      *LIMITED-DEPENDENT AND QUALITATIVE VARIABLES IN ECONOMETRICS* Gangadhar Rao S. Maddala, 1983      *Analysis of Panels and Limited Dependent Variable Models* Cheng Hsiao, M. Hashem Pesaran, Kajal Lahiri, Lung Fei Lee, 1999-07-29 This important collection brings together leading econometricians to discuss advances in the areas of the econometrics of panel data. The papers in this collection can be grouped into two categories. The first, which includes chapters by Amemiya, Baltagi, Arellano, Bover, and Labeaga, primarily deal with different aspects of limited dependent variables and sample selectivity. The second group of papers, including those by Nerlove, Schmidt, and Ahn, Kiviet, Davies, and Lahiri, consider issues that arise in the estimation of dynamic possibly heterogeneous panel data models. Overall, the contributors focus on the issues of simplifying complex real world phenomena into easily generalisable inferences from individual outcomes. As the contributions of G. S. Maddala in the fields of limited dependent variables and panel data were particularly influential, it is a fitting tribute that this volume is dedicated to him.

**The Economics of Child Labour** Alessandro Cigno, Furio C. Rosati, 2024-11-14 Children throughout the world are engaged in a variety of activities classifiable as work. These range from relatively harmless even laudable activities like helping parents in the home to morally or physically dangerous ones. Many forms of child labour have valuable learning by doing elements but they all conflict with formal education. If the family is credit constrained, child labour relaxes the liquidity constraint and may be necessary to avoid starvation. Statistically and theoretically, child labour is associated with high fertility, high infant mortality, and low productivity. By contrast, education is associated with low fertility, low infant mortality, and high productivity. Suitable as an advanced development economics or development microeconomics textbook, the book lays out the theory as it now stands and examines the available evidence within an integrated framework. This second edition emphasizes the interplay between child labour, education, fertility, and mortality. The empirical aspects have been expanded to include new evidence available since the previous edition and an assessment of the impact of policy and programs. There are new chapters on the emergence and implications of family rules and social norms and on policy optimization and an expanded chapter on international trade examines the effects of foreign direct investment.

*Employment Regulations Through the Eyes of Employers* Gaëlle Pierre, 2004 Pierre and Scarpetta present evidence on how employers perceive labor regulations and react when these are perceived to constrain the operation of their firm. They draw from harmonized surveys of up to 17,000 firms around the world and compare employers' responses with actual labor legislation. The authors find that employers' concerns about labor regulations are closely matched by the relative stringency of de jure labor laws. Countries that have from an international perspective tight labor regulations tend to have higher proportions of employers reporting these regulations as severe constraints.

*Fiscal Policy over the Election Cycle in Low-Income Countries* Mr.Christian Ebeke, MissDilan Ölcner, 2013-06-26

Focusing on Low Income Countries we investigate the behavior of fiscal variables during and after elections The results indicate that during election years government consumption significantly increases and leads to higher fiscal deficits During the two years following elections the fiscal

adjustment takes the form of increased revenue mobilization in trade taxes and cuts to government investment with no significant cuts in government consumption Using a new dataset on national fiscal rules and IMF programs we find that both the presence of fiscal rules and IMF programs help dampen the magnitude of the political budget cycle in LICs We conclude that elections not only imply a macroeconomic cost when they take place but also trigger a painful fiscal adjustment in which public investment is largely sacrificed
