Your late car is equipped with a conventional key locking system. The key with the square head is your ignition lock cylinder key and also operates the car doors. The key with the round head locks and unlocks your trunk and glove box.

When your dealer hands you the keys to your new car, you'll notice that the key attached to the key set has numbers stamped on it. These numbers are your key identification numbers. If you doubt the accuracy of your keys, the ring will enable your dealer or locksmith to replace them more easily. Detach the ring and store it in a safe place like your wallet or purse.

NOTE: — It would be advisable to place a spare spare key in your wallet or purse so that even if you lose the keys to the car.

Ignition Lock Cylinder

The ignition lock cylinder on your car has five positions as shown in the drawing. Make sure you understand the function of each position before you turn the key. Your reversible key can only be removed when the ignition lock cylinder is in the LOCK position. In the LOCK position, the steering wheel and the transmission controls are locked. Power runs through the steering wheel to lock the key.

In the OFF position, the steering wheel can be turned and the transmission is unlocked. After the engine has been started, the OFF position can be used to shut the engine down without turning the steering wheel or the transmission.
