Linen From Flax Seed To Woven Cloth:

Linen Linda Heinrich, 2010 Follow the saga of this remarkable fiber from seed to woven fabric Learn about past and present day methods of flax cultivation processing and spinning natural and synthetic dyeing and weaving and finishing linen cloth 233 color photos and 156 black and white photos and drawings reveal the characteristics of linen and emphasize its practical use **The Magic of Linen** Linda Heinrich, 1992 The Practical Spinner's Guide - Cotton, Flax, Hemp

Stephenie Gaustad, 2014-02-27 A one stop guide to preparing and spinning cotton flax and hemp Over the last few years focusing on specific types of fiber or spinning techniques has become more and more popular In The Practical Spinner's Guide Cotton Flax Hemp author Stephenie Gaustad offers a detailed overview of each plant the fiber it produces and how to properly prepare spin and finish yarns made from each fiber Cotton flax and hemp behave very differently from wool and special handling is required Stephenie discusses how each fiber behaves and how best to work with them specifically touching on trouble spots such as drafting and adding twist She also covers finishing yarns cleaning setting twist and plying as well as what dye processes are best for adding color Finally she includes a discussion of spinning for both knitting and weaving covering fabric properties of each fiber and what spinners need to take into account when using the yarn in a subsequent project **The Life Cycle of Russian Things** Matthew P. Romaniello, Alison K. Smith, Tricia Starks, 2021-09-09

The Life Cycle of Russian Things re orients commodity studies using interdisciplinary and comparative methods to foreground unique Russian and Soviet materials as varied as apothecary wares isinglass limestone and tanks It also transforms modernist and Western interpretations of the material by emphasizing the commonalities of the Russian experience Expert contributors from across the United States Canada Britain and Germany come together to situate Russian material culture studies at an interdisciplinary crossroads Drawing upon theory from anthropology history and literary and museum studies the volume presents a complex narrative not only in terms of material consumption but also in terms of production and the secondary life of inheritance preservation or even destruction In doing so the book reconceptualises material culture as a lived experience of sensory interaction The Life Cycle of Russian Things sheds new light on economic history and consumption studies by reflecting the diversity of Russia's experiences over the last 400 years *Reconstructing*

Ancient Linen Body Armor Gregory S. Aldrete, Scott M. Bartell, Alicia Aldrete, 2013-05-01 A thorough and original study of the linothorax the linen armor worn by Alexander the Great Alexander the Great led one of the most successful armies in history and conquered nearly the entirety of the known world while wearing armor made of cloth How is that possible In *Reconstructing Ancient Linen Body Armor* Gregory S. Aldrete, Scott Bartell and Alicia Aldrete provide the answer An extensive multiyear project in experimental archaeology this pioneering study presents a thorough investigation of the linothorax linen armor worn by the Greeks Macedonians and other ancient Mediterranean warriors Because the linothorax was made of cloth no examples of it have survived As a result even though there are dozens of references to the linothorax in ancient literature

and nearly a thousand images of it in ancient art this linen armor remains relatively ignored and misunderstood by scholars Combining traditional textual and archaeological analysis with hands on reconstruction and experimentation the authors unravel the mysteries surrounding the linothorax They have collected and examined all of the literary visual historical and archaeological evidence for the armor and detail their efforts to replicate the armor using materials and techniques that are as close as possible to those employed in antiquity By reconstructing actual examples using authentic materials the authors were able to scientifically assess the true qualities of linen armor for the first time in 1 500 years The tests reveal that the linothorax provided surprisingly effective protection for ancient warriors that it had several advantages over bronze armor and that it even shared qualities with modern day Kevlar Previously featured in documentaries on the Discovery Channel and the Canadian History Channel as well as in U S News and World Report MSNBC Online and other international venues this groundbreaking work will be a landmark in the study of ancient warfare

Egyptology in the Present Carolyn Graves-Brown,2015-06-01 This volume builds bridges between usually separate social groups between different methodologies and even between disciplines It is the result of an innovative conference held at Swansea University in 2010 which brought together leading craftspeople and academics to explore the all too often opposed practices of experimental and experiential archaeology The focus is upon Egyptology but the volume has a wider importance The experimental method is privileged in academic institutions and thus perhaps is subject to clear definitions It tends to be associated with the scientific and technological In opposition the experiential is more rarely defined and is usually associated with schoolchildren museums and heritage centres it is often criticised for being unscientific The introductory chapter of this volume examines the development of these traditionally assumed differences giving for the first time a critical and careful definition of the experiential in relation to the experimental The two are seen as points on a continuum with much common ground This claim is borne out by succeeding chapters which cover

such topics as textiles woodworking and stoneworking And Salima Ikram Professor of Egyptology at the American University in Cairo here demonstrates remarkably that our understanding of the classic Egyptian funerary practice of mummification benefits from both scientific experimental and sensual experiential approaches The volume however is important not only for Egyptology but for archaeological method more generally The papers illuminate the pioneering of individuals who founded modern archaeological practice Several papers are truly groundbreaking and deserve to circulate far beyond Egyptology Thus the archaeologist Marquardt Lund tackles the problem of understanding the earliest known depictions of flint knife manufacture those from an Egyptian tomb dated around 1900 BC He shows the importance of thinking outside traditional i e modern knapping practice Lund s knapping method guided by the tomb depictions is surprising but effective and very different from that presented in manuals of lithic technology or taught in academic institutions
