*Linking Human Rights and the Environment* Romina Picolotti, Jorge Daniel Taillant, 2010-09-15 Es un libro de consulta valiosa que explora el territorio desconocido que hay entre la legislación ambiental y de los derechos humanos Más que un tratado te rico se argumenta que el activismo de los derechos humanos representa una oportunidad importante para hacer frente a las consecuencias humanas de la degradación del medio ambiente y puede servir como un catalizador de ideas y acciones inspiradoras en el mundo real Contraportada *Eco-justice* Aaron Jacob Sachs, 1995 [Linking Human Rights](#)

[and the Environment](#) Romina Picolotti, Jorge Daniel Taillant, 2010-09-15 Es un libro de consulta valiosa que explora el territorio desconocido que hay entre la legislación ambiental y de los derechos humanos Más que un tratado te rico se argumenta que el activismo de los derechos humanos representa una oportunidad importante para hacer frente a las consecuencias humanas de la degradación del medio ambiente y puede servir como un catalizador de ideas y acciones inspiradoras en el mundo real Contraportada **The Human Rights Fundaments of Conservation in the Context of the Extraction of Energy Resources** María Augusta León Moreta, 2015-06-17 Energy is the driving force of human development and economic growth The ceaseless demand for energy resources has triggered the development of extraction projects around the world This in turn has exerted a significant pressure on natural resources as well as on the environment Since the performance of human rights depends on the environment and on access to natural resources this Study aims to show the extent to which the negative environmental impact arising from extraction operations prevents the effective realization of human rights The analysis of substantive and procedural human rights in the light of the case law of international human rights courts provides all stakeholders involved in an energy extraction project with the tools and mechanisms to prevent environmental damage and to ensure the protection of human rights *Human Rights Enforcement Machinery In India* Dr. Rakeshkumar Maruti Kamble, 2023-06-15 **Human Rights and Climate Change** Siobhan Mcinerney-Lankford, Mac Darrow, Lavanya Rajamani, 2011 This Study explores arguments about the impact of climate change on human rights examining the international legal frameworks governing human rights and climate change and identifying the relevant synergies and tensions between them It considers arguments about i the human rights impacts of climate change at a macro level and how these impacts are spread disparately across countries ii how climate change impacts human rights enjoyment within states and the equity and discrimination dimensions of those disparate impacts and iii the role of international legal frameworks and mechanisms including human rights instruments particularly in the context of supporting developing countries adaptation efforts The Study surveys the interface of human rights and climate change from the perspective of public international law It builds upon the work that has been carried out on this interface by reviewing the legal issues it raises and complementing existing analyses by providing a comprehensive legal overview of the area and a focus on obligations upon States and other actors connected with climate change The objective has therefore been to

contribute to the global debate on climate change and human rights by offering a review of the legal dimensions of this interface as well as a survey of the sources of public international law potentially relevant to climate change and human rights in order to facilitate an understanding of what is meant in legal terms by human rights impacts of climate change and help identify ways in which international law can respond to this interaction **Human Rights** Albert A. Zinnos, 2007

Human rights refers to the concept of human beings as having universal rights or status regardless of legal jurisdiction and likewise other localising factors such as ethnicity and nationality For many the concept of human rights is based in religious principles However because a formal concept of human rights has not been universally accepted the term has some degree of variance between its use in different local jurisdictions difference in both meaningful substance as well as in protocols for and styles of application Ultimately the most general meaning of the term is one which can only apply universally and hence the term human rights is often itself an appeal to such transcended principles without basing such on existing legal concepts The term humanism refers to the developing doctrine of such universally applicable values and it is on the basic concept that human beings have innate rights that more specific local legal concepts are often based Within particular societies human rights refers to standards of behaviour as accepted within their respective legal systems regarding 1 the well being of individuals 2 the freedom and autonomy of individuals and 3 the representation of the human interest in government These rights commonly include the right to life the right to an adequate standard of living the prohibition of genocide freedom from torture and other mistreatment freedom of expression freedom of movement the right to self determination the right to education and the right to participation in cultural and political life These norms are based on the legal and political traditions of United Nations member states and are incorporated into international human rights instruments This new book brings together the latest book literature centred on this crucial topic Children's Rights Law in the Global Human Rights Landscape Eva Brems, Ellen Desmet, Wouter Vandenhoele, 2017-04-21 Children's rights law is often studied and perceived in isolation from the broader field of human rights law This volume explores the inter relationship between children's rights law and more general human rights law in order to see whether elements from each could successfully inform the other Children's rights law has a number of distinctive characteristics such as the emphasis on the best interests of the child the use of general principles and the inclusion of third parties e.g. parents and other care takers in treaty provisions The first part of this book questions whether these features could be a source of inspiration for general human rights law In part two the reverse question is asked could children's rights law draw inspiration from developments in other branches of human rights law that focus on other specific categories of rights holders such as women persons with disabilities indigenous peoples or older persons Finally the interaction between children's rights law and human rights law and the potential for their isolation inspiration or integration may be coloured or determined by the thematic issue under consideration Therefore the third part of the book studies the interplay between children's rights law and human rights law in the context of specific topics intra

family relations LGBTQI marginalization migration media the environment and transnational human rights obligations

**Human Rights Approaches to Climate Change** Sumudu Atapattu, 2015-10-16 Despite the clear link between climate change and human rights with the potential for virtually all protected rights to be undermined as a result of climate change its catastrophic impact on human beings was not really understood as a human rights issue until recently This book examines the link between climate change and human rights in a comprehensive manner It looks at human rights approaches to climate change including the jurisprudential bases for human rights and the environment the theoretical framework governing human rights and the environment and the different approaches to this including benchmarks In addition to a discussion of human rights implications of international environmental law principles in the climate change regime the book explores how the human rights framework can be used in relation to mitigation adaption and adjudication Other chapters examine how vulnerable groups women indigenous peoples and climate refugees would be disproportionately affected by climate change The book then goes on to discuss a new category of people created by climate change those who will be rendered stateless as a result of states disappearing and displaced by climate change and whether human rights law can adequately address these emerging issues

[Encyclopedia of Environmental Health](#), 2019-08-22 Encyclopedia of Environmental Health Second Edition Six Volume Set presents the newest release in this fundamental reference that updates and broadens the umbrella of environmental health especially social and environmental health for its readers There is ongoing revolution in governance policies and intervention strategies aimed at evolving changes in health disparities disease burden trans boundary transport and health hazards This new edition reflects these realities mapping new directions in the field that include how to minimize threats and develop new scientific paradigms that address emerging local national and global environmental concerns Represents a one stop resource for scientifically reliable information on environmental health Fills a critical gap with information on one of the most rapidly growing scientific fields of our time Provides comparative approaches to environmental health practice and research in different countries and regions of the world Covers issues behind specific questions and describes the best available scientific methods for environmental risk assessment

*Human Rights Approaches to Planetary Crises* Samvel Varvastian, 2024-11-11 This book analyses over 20 years of rights based litigation in the areas of climate change and plastic pollution in order to assess the value of rights in confronting and overcoming planetary crises We live in an age of planetary crises such as climate change biodiversity loss and plastic pollution which take a huge toll on communities all around the world endangering their fundamental interests But can the lack of government action on these crises or action that worsens them amount to violations of human rights Many courts are grappling with this question as rights based litigation becomes increasingly common By focusing on climate change and plastic pollution as case studies this book examines the viability of rights claims when confronting planetary crises in courts From early attempts to pursue rights claims in response to planetary crises in the first decade of the 2000s to high profile

court wins in such cases in the 2010s and the spread of such cases across dozens of jurisdictions by the 2020s rights claims in climate change and plastic pollution litigation have become a truly global phenomenon Through a systematic and in depth analysis of such litigation in more than thirty jurisdictions this book identifies factors that determine the viability of rights claims when confronting planetary crises It reveals that even though not all litigation forums are equally favourable to such claims human rights can indeed be successfully invoked in different types of legal action This book will be of considerable interest to policymakers and legal scholars and practitioners as well as students who work in or study environmental and climate change law human rights law constitutional law and international and comparative law

**Environmental Protection and Human Rights** Donald K. Anton, Dinah L. Shelton, 2011-04-11 With unique scholarly analysis and practical discussion this book provides a comprehensive introduction to the relationship between environmental protection and human rights being formalized into law in many legal systems This book instructs on environmental techniques and procedures that assist in the protection of human rights The text provides cogent guidance on a growing international jurisprudence on the promotion and protection of human rights in relation to the environment that has been developed by international and regional human rights bodies and tribunals It explores a rich body of case law that continues to develop within states on the environmental dimension of the rights to life to health and to public participation and access to information Five compelling contemporary case studies are included that implicate human rights and the environment ranging from large dam projects to the creation of a new human right to a clean environment

*Human Rights and the Environment* Linda Hajjar Leib, 2011 The book examines the genesis and development of environmental rights or the Right to Environment in international law and discusses their philosophical theoretical and legal underpinnings in the context of sustainable development and the notion of solidarity rights

**Natural Resources and Human Rights** Jérémie Gilbert, 2018 Examining the role human rights can play in the regulation of natural resource management this book shines light on the duties of states and private actors when exploiting natural resources and the procedural rights of affected citizens
