Information Security Practice and Experience Robert H. Deng, Feng Bao, HweeHwa Pang, Jianying Zhou, 2005-03-31 The inaugural Information Security Practice and Experience Conference ISPEC was held on April 11-14 2005 in Singapore. As applications of information security technologies become pervasive, issues pertaining to their deployment and operation are becoming increasingly important. ISPEC is intended to be an annual conference that brings together researchers and practitioners to provide a confluence of new information security technologies, their applications, and their integration with IT systems in various vertical sectors. The Program Committee consisted of leading experts in the areas of information security, information systems, and domain experts in applications of IT in vertical business segments. The topics of the conference covered security applications and case studies, access control, network security, data security, secure architectures, and cryptographic techniques. Emphasis was placed on the application of security research to meet practical user requirements, both in the paper selection process and in the invited speeches. Acceptance into the conference proceedings was very competitive. The Call for Papers attracted more than 120 submissions, out of which the Program Committee selected only 35 papers for inclusion in the proceedings. This conference was made possible only through the contributions from many individuals and organizations. We would like to thank all the authors who submitted papers. We also gratefully acknowledge the members of the Program Committee and the external reviewers for the time and effort they put into reviewing the submissions. Special thanks are due to Ying Qiu for managing the website for paper submission, review, and notification.

Patricia Loh was kind enough to arrange for the conference venue and took care of the administration in running the conference.

Linux Recipes for Oracle DBAs is an example-based book on managing Oracle Database in a Linux environment. Covering commonly used distributions such as Red Hat Enterprise Linux and Oracle Enterprise Linux, the book is written for database administrators who need to get work done and lack the luxury of curling up by the fireside with a stack of Linux documentation. The book is task-oriented. Look up the task to perform. See the solution. Read up on the details. Get the job done. Takes you directly from problem to solution. Covers the right mix of Linux user and administration tasks for database administrators. Respects your time by being succinct and to the point. What you'll learn: Execute Linux commands applicable to Oracle Database administration. Write shell scripts to automate critical DBA tasks. Monitor, tune, and optimize a Linux server to run Oracle Database. Perform Linux system administration tasks relevant to Oracle Database. Implement Oracle real application clusters on Linux. Implement Oracle automatic storage management on Linux. Remotely and securely manage Oracle on Linux. Who this book is for: Linux Recipes for Oracle DBAs is a book for Oracle database administrators who want to expertly operate Oracle databases on the Linux operating system. If you're new
