Brainiac Ken Jennings, 2006-09-12 NATIONAL BESTSELLER A witty charming and engaging dive into trivia's colorful history from America's highest earning game show contestant of all time and host of Jeopardy! Insightful informative and written with a strong dose of humor and humility I loved this book Will Shortz crossword editor The New York Times Ken Jennings is trivia's undisputed king and as he traces his rise from anonymous computer programmer to nerd folk icon he explores his newly conquered kingdom the world of trivia itself Trivia he has found is centuries older than his childhood obsession with it Whisking us from the coffeehouses of seventeenth century London to the Internet age Jennings chronicles the ups and downs of the trivia fad the quiz book explosion of the Jazz Age the rise fall and rise again of TV quiz shows the nostalgic campus trivia of the 1960s and the 1980s when Trivial Pursuit again made it fashionable to be a know it all Jennings also investigates the shadowy demimonde of today's trivia subculture guiding us on a tour of trivia across America He goes head to head with the blowhards and diehards of the college quiz bowl circuit the slightly soused faithful of the Boston pub trivia scene and the raucous participants in the annual Q & A marathon in Stevens Point Wisconsin The World's Largest Trivia Contest And of course he takes us behind the scenes of his improbable 75 game run on Jeopardy! But above all Brainiac is a love letter to the useless fact Who knew that there's a crater on Venus named after Laura Ingalls Wilder Ken Jennings that's who Engaging and erudite Brainiac is an irresistible celebration of nostalgia curiosity and geeky obsession in a word trivia

Ideating Pedagogy in Troubled Times Shalin Lena Raye, Stephanie Masta, Sarah Taylor Cook, Jake Burdick, 2019-10-01 We began the call for this book by asking authors to ideate on activism to take up and seek to extend the interbraided values from the Curriculum and Pedagogy group's espoused mission and vision collocating activist ideologies theoretical traditions and practical orientations as a means of creatively reflectively and productively responding to the increasingly dire social moment This moment is framed by a landscape denigrated beyond even Pinar's 2004 original declaration of the present as nightmare The current catastrophic political climate provides challenges and albeit scant opportunities for curriculum scholars and workers as we reflect on past and future directions of our field and grapple with our locations and roles as educators researchers practitioners and beings in the world These troubled times force us to think critically about our scholarship and pedagogy our influence on educational practices in multiple registers and the surrounding communities we claim to serve This is where the call began from a desire to think through modern conceptions regarding what counts as activism in the fields of education curriculum and pedagogy and to consider how activist voices and enactments might emerge differently through curriculum and pedagogy writ large A guiding source of inspiration for this book weaving among the emerging themes between the collected manuscripts reflections and poems was a passage in Sara Ahmed's 2013 book The Cultural

Politics of Emotion In this passage Ahmed works through the complicated relationship between the testimonies of pain that injustice causes the recognition of this pain and the potential of these wounds to move us into a different relationship with healing p 200 The chapters reflections and poems within this volume thus effect a collective ideation on how specific cultural politics and deleterious ideological formations racism colonialism homophobia ableism to name only a few persist and mobilize The authors seek to expose and name some of these injustices asking readers not only see and hear these experiences but to inhabit our complicities in their promulgation It is important to acknowledge that these named social troubles do not exist in isolation and will enmesh weave wind and entangle with one another The section headings parallel Ahmed s 2013 own ideations testimony recognition and wounds not as a formula to follow as an activist call or as a model for a means to a more just end but as a way to engage in these issues as a trope of activist confrontation of readers who are as many of our authors suggest complicit in maintaining many of these social troubles The chapters do not need to be read in any particular order though the ordering of the chapters moves from the naming of social troubles to showing how teaching research and theory ask us to take a more active role in recognizing and acknowledging the prevalence of these issues and then theorizing ways to engage the wounds

Effective Programs for Latino Students Robert E. Slavin, Margarita Calderon, Margarita Calderon, 2012-11-12 Latino or Hispanic children are one of the fastest growing groups in U S schools today On average these students perform worse than Anglo students on measures of academic achievement and other measures of academic success and their drop out rate is high There are schools of excellence among those serving Latino children but the majority of these children are placed at risk by schools and community institutions unable to build on the cultural personal and linguistic strengths these children are likely to bring with them to school Schools serving Latino students need programs based on high quality research capable of being replicated and adapted to local circumstances and needs The purpose of this book is to present the current state of the art with respect to research on effective instructional programs for Latino students in elementary and secondary grades Surprisingly this has not been done before there are many books on the situation of Latino students in U S schools but none so far have reviewed research on the outcomes of programs designed to enhance the academic achievement of these students The chapters represent a broad range of methodologies from experimental to correlational to descriptive and the solutions they propose are extremely diverse Each examines in its own way programs and practices that are showing success Together they present a rich array of research based effective programs that are practical widely available and likely to make a profound difference What binds the chapters together is a shared belief that Latino students can succeed at the highest levels if they receive the quality of instruction they deserve and a shared belief that reform of schools serving many Latino students is both possible and essential This is a book filled with statistics description and reviews of research but even more it is filled with optimism about what schools for Latino students can be and what these students will achieve It is a highly relevant and useful resource for educators policymakers and

researchers who want to use research to inform the decisions they make about how to help Latino students succeed in elementary and secondary schools and beyond
