Liquid Surveillance A Conversation Pcv's Polity Conversations Series:

Digital Diversities Garry Robson, Małgorzata Zachara, 2014-10-21 Digital Diversities is a groundbreaking interdisciplinary study of the social, social, psychological, philosophical and political ramifications of the digital turn in human affairs. Focusing in particular on connections between the saturation of everyday life by digital communication technologies and 21st century global mobility, it offers fresh and original accounts of the interface between online communication practices and the negotiation of increasingly complex social experience. It provides critical studies of, among other things, the consequences of the widespread shift to remote rather than embodied relationships, the day to day management of intercultural encounters in unprecedentedly diverse social settings, new and emerging forms of political expression and cultural diplomacy, and the relationship between posthuman ideology and the 'googleisation' of everything. As such, Digital Diversities is a collection that makes a timely and thought-provoking contribution to the expanding field of studies of the abrupt and still poorly understood transformation of everyday life in the early 21st century by the gadgets and communication platforms of the digital global hive.

The Metric Society Steffen Mau, 2019-02-25 In today's world, numbers are in the ascendency. Societies dominated by star ratings, scores, likes and lists are rapidly emerging, as data are collected on virtually every aspect of our lives. From annual university rankings, ratings agencies and fitness tracking technologies to our credit score and health status, everything and everybody is measured and evaluated. In this important new book, Steffen Mau offers a critical analysis of this increasingly pervasive phenomenon. While the original intention behind the drive to quantify may have been to build trust and transparency, Mau shows how metrics have in fact become a form of social conditioning. The ubiquitous language of ranking and scoring has changed profoundly our perception of value and status. What is more, through quantification, our capacity for competition and comparison has expanded significantly; we can now measure ourselves against others in practically every area. The rise of quantification has created and strengthened social hierarchies, transforming qualitative differences into quantitative inequalities that play a decisive role in shaping the life chances of individuals. This timely analysis of the pernicious impact of quantification will appeal to students and scholars across the social sciences, as well as anyone concerned by the cult of numbers and its impact on our lives and societies today.

Liquid Surveillance Zygmunt Bauman, David Lyon, 2013-04-03 Today the smallest details of our daily lives are tracked and traced more closely than ever before, and those who are monitored often cooperate willingly with the monitors. From London and New York to New Delhi, Shanghai and Rio de Janeiro, video cameras are a familiar and accepted sight in public places. Air travel now commonly involves devices such as body scanners and biometric checks that have proliferated in the wake of 9/11. And every day Google and credit card issuers note the details of our habits, concerns and preferences, quietly prompting customized marketing strategies with our active, all too often zealous cooperation. In today's liquid modern world, the paths of daily life are mobile and flexible. Crossing national borders is a commonplace activity, and immersion in social

media increasingly ubiquitous Today's citizens workers consumers and travellers are always on the move but often lacking certainty and lasting bonds But in this world where spaces may not be fixed and time is boundless our perpetual motion does not go unnoticed Surveillance spreads in hitherto unimaginable ways responding to and reproducing the slippery nature of modern life seeping into areas where it once had only marginal sway In this book the surveillance analysis of David Lyon meets the liquid modern world so insightfully dissected by Zygmunt Bauman Is a dismal future of moment by moment monitoring closing in or are there still spaces of freedom and hope How do we realize our responsibility for the human beings before us often lost in discussions of data and categorization Dealing with questions of power technology and morality this book is a brilliant analysis of what it means to be watched and watching today
