only comfort and prestige but also personal efficiency and income With such economic impetus low cost summer cooling must irresistibly spread to all kinds of occupied buildings Refrigeration provides our best cooling serving well where people are closely spaced in well constructed shaded and insulated structures However its first and operating costs bar it from our hottest commercial industrial and residential buildings Fortunately evaporative cooling is an economical substitute in many regions First used in Southwest homes and businesses and in textile mills it soon invaded other fields and climates In 1946 six firms produced 200 000 evaporative coolers in 1958 25 firms produced 1 250 000 despite the phenomenal sale of refrigerating window air conditioners Though clearly secondary to refrigeration evaporative cooling is 60 to 80 percent is economical for moderate income groups and cheaper to buy and operate Thus it climates where summers are short Moreover it cheaply cools hot thinly constructed mills factories workshops foundries powerhouses farm buildings canneries etc where refrigerated cooling is prohibitively expensive *Pocket guide for air-conditioning, heating, ventilation, refrigeration; (SI edition)*.
