Change in Contemporary English Geoffrey Leech, Marianne Hundt, Christian Mair, Nicholas Smith, 2009-10-22. Based on the systematic analysis of large amounts of computer readable text, this book shows how the English language has been changing in the recent past, often in unexpected and previously undocumented ways. The study is based on a group of matching corpora known as the Brown family of corpora, supplemented by a range of other corpus materials, both written and spoken, drawn mainly from the later twentieth century. Among the matters receiving particular attention are the influence of American English on British English, the role of the press, the colloquialization of written English, and a wide range of grammatical topics including the modal auxiliaries, progressive, subjunctive, passive, genitive, and relative clauses. These subjects build an overall picture of how English grammar is changing and the linguistic and social factors that are contributing to this process.

The Rise of Agreement Eric Fuß, 2005-10-13 This book investigates the historical paths leading from pronouns to markers of verbal agreement and proposes a unified formal account of this grammaticalization process In opposition to beliefs widely held in the literature it is argued that new agreement formatives can be coined in a multitude of syntactic environments Still the individual paths toward agreement are shown to exhibit a set of underlying similarities which are attributed to universal principles that govern the reanalysis of pronominal clitics as exponents of verbal agreement across languages It is claimed that syntactic

principles impose only a set of necessary conditions on the reanalysis in question while its ultimate trigger is morphological in nature More specifically it is argued that the acquisition of inflectional morphology is governed by blocking effects which operate during language acquisition and promote the grammaticalization of new markers if this change serves to replace worn out underspecified forms with new more specified candidates

Fonteyn,2019-03-25 This book presents the first serious attempt to set out a functional semantic definition of diachronic transcategorial shift between the major classes noun nominal and verb clause In English speakers have different options to refer to an event ranging from that clauses That he had guessed her size over infinitives For him to guess her size and verbal gerunds Him guessing her size to nominal gerunds His guessing of her size and deverbal nouns His guess of her size Interestingly not only do these strategies each resemble prototypical nominals to varying extents but also some of these strategies increasingly resemble clauses and decreasingly resemble prototypical nominals over time as if they are gradually shifting categories Thus far the literature that has dealt with such cases of diachronic categorial shift has mainly described the processes by focusing on form leaving us with a clear picture of what and how changes have occurred Yet the question of why these formal changes have occurred is still shrouded in mystery In this book Lauren Fonteyn tackles this mystery by showing that the diachronic processes of nominalization and verbalization can also involve functional semantic changes in two steps First building on functionalist and cognitive models of grammar she offers a theoretical model of categoriality that allows us to study diachronic nominalization and verbalization not just as morphosyntactic but also as functional semantic processes Second she offers more concrete workable definitions of the abstract functional semantic properties of the nominal and verbal clausal class which are subsequently applied to one of the most intriguing deverbal nominalization systems in the history of English the English gerund
