*Linguistic Meaning (RLE Linguistics A: General Linguistics)* Keith Allan, 2014-02-03 Dr Keith Allan presents a coherent consistent and comprehensive account of linguistic meaning centred around an informally presented theory of meaning. It is intended for graduate and undergraduate students of linguistics or any linguist curious about what a theory of meaning should seek to accomplish and the way to achieve that aim. The work assumes that the primary task of a theory of linguistic meaning is to describe the meaning of speech acts. This in turn presupposes a theory of semantics and a theory of prosodic meaning as well as a proper treatment of the co-operative principle, context and background information. These matters are dealt with in detail. The second task of a theory of linguistic meaning is to identify what meaning is to explain the relationships between sense and denotation and to explicate the nature of meaningful properties and meaning relations. These matters are fully covered and the work concludes with a summary of the principle arguments presented.

*Indirect Reports and Pragmatics* Alessandro Capone, Ferenc Kiefer, Franco Lo Piparo, 2015-12-01 This volume offers the reader a singular overview of current thinking on indirect reports The contributors are eminent researchers from the fields of philosophy of language theoretical linguistics and communication theory who answer questions on this important issue This exciting area of controversy has until now mostly been treated from the viewpoint of philosophy This volume adds the views from semantics conversation analysis and sociolinguistics Authors address matters such as the issue of semantic minimalism vs radical contextualism the attribution of responsibility for the modes of presentation associated with Noun Phrases and how to distinguish the indirect reporter's responsibility from the original speaker's responsibility They also explore the connection between indirect reporting and direct quoting Clearly indirect reporting has some bearing on the semantics pragmatics debate however there is much controversy on what is said whether this is a minimal semantic logical form enriched by

saturating pronominals or a much richer and fully contextualized logical form This issue will be discussed from several angles Many of the authors are contextualists and the discussion brings out the need to take context into account when one deals with indirect reports both the context of the original utterance and the context of the report It is interesting to see how rich cues and clues can radically transform the reported message assigning illocutionary force and how they can be mobilized to distinguish several voices in the utterance Decoupling the voice of the reporting speaker from that of the reported speaker on the basis of rich contextual clues is an important issue that pragmatic theory has to tackle Articles on the issue of slurs will bring new light to the issue of decoupling responsibility in indirect reporting while others are theoretically oriented and deal with deep problems in philosophy and epistemology      *Meaning, Life and Culture* Helen Bromhead,Zhengdao Ye,2020-12-17 This book is dedicated to Anna Wierzbicka one of the most influential and innovative linguists of her generation Her work spans a number of disciplines including anthropology cultural psychology cognitive science philosophy and religious studies as well as her home base of linguistics She is best known for the Natural Semantic Metalanguage NSM approach to meaning a versatile tool for exploring big questions concerning the diversity and universals of people s experience in the world In this volume Anna Wierzbicka s former students old and current colleagues kindred spirits and sparring partners engage with her ideas and diverse body of work These authors cover topics from the grammar of action verbs to cross cultural pragmatics and over 30 languages from around the world are represented The chapters in Part 1 focus on the NSM approach and cover four themes lexico grammatical semantics cultural keywords semantics of nouns and emotion In Part 2 the contributors connect with a meaning based approach from their own intellectual perspectives including syntax anthropology cognitive linguistics and sociolinguistics The deep humanistic perspective wide ranging themes and interdisciplinary nature of Wierzbicka s research are reflected in the contributions The common thread running through all chapters is the primacy of meaning to the understanding of language and culture      Routledge Library Editions: The English Language Various,2021-07-28 This set reissues 29 books on the English language originally published between 1932 and 2003 Together the volumes cover key topics within the larger subject of the English Language including grammar dialect and the history of English Written and edited by an international set of scholars particular volumes employ comparisons with other languages such as French and German whilst other volumes are devoted to specific English dialects such as Cockney and Canadian English or English in general This collection provides insight and perspective on various elements of the English language over a period of 70 years and demonstrates its enduring importance as a field of research      **A dictionary and grammatical outline of Chakali** Jonathan Brindle,2017-07-03 This book is the first comprehensive monograph dedicated to Chakali a Southwestern Grusi language spoken by less than 3500 people in northwest Ghana The dictionary offers a consistent description of word meaning and provides the basis for future research in the linguistic area It is also designed to provide an inventory of correspondence with English usage in a reversal index The concepts used in the dictionary are explained in a grammar

Capone, Marco Carapezza, Franco Lo Piparo, 2018-01-18 This book builds on the idea that pragmatics and philosophy are strictly interconnected and that advances in one area will generate consequential advantages in the other area The first part of the book entitled Theoretical Approaches to Philosophy of Language contains contributions by philosophers of language on connectives intensional contexts demonstratives subsententials and implicit indirect reports The second part Pragmatics in Discourse presents contributions that are more empirically based or of a more applicative nature and that deal with the pragmatics of discourse argumentation pragmatics and law and context The book presents perspectives which generally make most of the Gricean idea of the centrality of a speaker's intention in attribution of meaning to utterances whether one is interested in the level of sentence like units or larger chunks of discourse      **A Pragmatic Agenda for Healthcare**

institutional communication In the variety of its contributions it represents an ambitious attempt at setting pragmatics at the core of healthcare communication research and practice by combining conceptual reflections on core topics in the field of pragmatics among which are speech acts common ground ambiguity implicitness with discourse and linguistic analysis of real world examples exploring various problems in health communication Shakespeare's Dialectic of Hope Hugh Grady,2022-05-19 Closely examining the relationship between the political and the utopian in five major plays from different phases of Shakespeare s career Hugh Grady shows the dialectical link between the earlier political dramas and the late plays or tragicomedies Reading Julius Caesar and Macbeth from the tragic period alongside The Winter s Tale and Tempest from the utopian end of Shakespeare s career with Antony and Cleopatra acting as a transition Grady reveals how in the late plays Shakespeare introduces a transformative element of hope while never losing a sharp awareness of suffering and death The plays presciently confront dilemmas of an emerging modernity diagnosing and indicting instrumental politics and capitalism as largely disastrous developments leading to an empty world devoid of meaning and community Grady persuasively argues that the utopian vision is a specific dialectical response to these fears and a necessity in worlds of injustice madness and death *Common Ground in First Language and Intercultural Interaction* Istvan Kecskes,2023-03-06 In recent years the traditional approach to common ground as a body of information shared between participants of a communicative process has been challenged Taking into account not only L1 but also intercultural interactions and attempting to bring together the traditional view with the egocentrism based view of cognitive psychologists it has been argued that construction of common ground is a dynamic emergent process It is the convergence of the mental representation of shared knowledge that we activate assumed mutual knowledge that we seek and rapport as well as knowledge that we co construct in the communicative process This dynamic understanding of common ground has been applied in many research projects addressing both L1 and intercultural interactions in recent years As a result several new elements aspects and interpretations of common ground have been identified Some researchers came to view common ground as one component in a complex contextual information structure Others analyzing intercultural interactions pointed out the dynamism of the interplay of core common ground and emergent common ground The book brings together researchers from different angles of pragmatics and communication to examine i what adjustments to the notion of common ground based on L1 communication should be made in the light of research in intercultural communication ii what the relationship is between context situation and common ground and iii how relevant knowledge and content get selected for inclusion into core and emergent common ground
