Kurschner,2022-08-22 This study argues that the establishment of the millennium binding of Satan and the vindication of the

saints in Revelation 20 1 6 are cohesively linked with Jesus's victorious battle in Revelation 19 11 21 The major implication of this analysis views both these events as consequent effects of Christ's victory at the eschatological battle Applying systemic functional linguistics and discourse analysis of cohesion this study advances critical scholarship on the Book of Revelation by offering the first fully sustained answer to this frequently debated question regarding Satan's binding from a modern linguistic approach

A Textlinguistic Analysis of Selected Old Testament Texts in Matthew 1-4 Jeffery L. Capshaw, 2004 While providing exciting research opportunities the New Testament's use of the Old Testament continues to create interpretive difficulties Although Matthew's use of the Old Testament generated much scholarly discussion throughout the historical critical period during the contemporary period specific interest in Matthew's Old Testament usage seemed to decrease Recently however many powerful analytical approaches have come to the fore in biblical studies including various text centered methods such as textlinguistics also known as discourse analysis This book applies one specific type of discourse grammar to several Old Testament citations in Matthew's Gospel This analysis is presented both to initiate discussion and to show how this and similar methods might be utilized to contribute important perspectives on the New Testament's use of the Old Testament

Participants in Old Testament Texts and the Translator Regt, 2018-07-17 In Biblical Hebrew texts individuals and groups are referred to according to specific rules and conventions How are participants introduced into a text and traced further When is this done by means of proper names when by nouns and when by pronominal elements In this book examples from many Biblical passages illustrate the patterns involved These rules help to solve problems of participant reference in controversial passages But it is not enough to know who are the participants one needs to establish why they are referred to the way they are Main characters in a text are referred to differently from others Certain devices of participant reference help to indicate paragraph boundaries Unusual references to participants aim to be noticed and have rhetorical impact Proper names may occur where one would have expected a pronominal element or vice versa Participants may be mentioned in an unexpected order Special attention is given to such unusual reference devices and the rhetorical strategies involved climax suspense and implicit comment In a translation these strategies should still be as clear as they are in the source text So how have reference devices been handled in ancient and modern translations

Verbal Aspect, the Indicative Mood, and Narrative Constantine R. Campbell, 2007 In this book Constantine R Campbell investigates the function of verbal aspect

within New Testament Greek narrative He argues that the primary role of verbal aspect in narrative is to delineate and shape the various discourse strands of which it is constructed such as mainline offline and direct discourse Campbell accounts for this function in terms of the semantic value of each tense form Consequently in the search for more effective conclusions and explanations he challenges and reassesses some of the conclusions reached in previous scholarship From publisher s description Morphological and Syntactical Irregularities in the Book of Revelation Laurențiu Moț,2015-03-31
