*Reconnecting Language* Anne-Marie Simon-Vandenberghe, Kristin Davidse, Dirk Noël, 1997-10-31 Although the contributors to this book do not belong to one particular school of linguistic theory they all share an interest in the external functions of language in society and in the relationship between these functions and internal linguistic phenomena In this sense they all take a functional approach to grammatical issues Apart from this common starting point the contributions share the aim of demonstrating the non autonomous nature of morphology and syntax and the inadequacy of linguistic models which deal with syntax morphology and lexicon in separate independent components The recurrent theme throughout the book is the inseparability of lexis and morphosyntax of structure and function of grammar and society The third and more specific common thread is case which in some contributions is adduced to illustrate the more general point of the link between word form on the one hand and clausal and textual relations on the other hand while in other papers it is at the centre of the discussion The interest of the proposed volume consists in the fact that it brings together the views of leading scholars in functional linguistics of various denominations on the place of morphosyntax in linguistic theory The book provides convincing argumentation against a modular theory with autonomous levels the dominant framework in mainstream 20th century linguistics and is a plea for further research into the connections between the lexicogrammar and the linguistic and extralinguistic context

The Architecture of the Language Faculty Ray Jackendoff, 1997 Ray Jackendoff steps back to survey the broader theoretical landscape in linguistics in an attempt to identify some of the sources of the widely perceived malaise with respect to much current theorizing Over the past twenty five years Ray Jackendoff has investigated many complex issues in syntax semantics and the relation of language to other cognitive domains He steps back in this new book to survey the broader theoretical landscape in linguistics in an attempt to identify some of the sources of the widely perceived malaise with respect to much current theorizing Starting from the Minimalist necessity for interfaces of the grammar with sound meaning and the

lexicon Jackendoff examines many standard assumptions of generative grammar that in retrospect may be seen as the product of historical accident. He then develops alternatives more congenial to contemporary understanding of linguistic phenomena. *The Architecture of the Language Faculty* seeks to situate the language capacity in a more general theory of mental representations and to connect the theory of grammar with processing. To this end Jackendoff works out an architecture that generates multiple co-constraining structures and he embeds this proposal in a version of the modularity hypothesis called Representational Modularity. Jackendoff carefully articulates the nature of lexical insertion and the content of lexical entries including idioms and productive affixes. The resulting organization of the grammar is compatible with many different technical realizations which he shows can be instantiated in terms of a variety of current theoretical frameworks.

Linguistic Inquiry Monograph No 28      Hegel's Philosophy of Language Jim Vernon, 2007-05-15 In this bold new book Jim Vernon develops the general theory of language implicitly contained in the writings of G. W. F. Hegel. Vernon offers novel readings of Hegel's central works in order to explain his views on some long neglected topics and as such demonstrates that his accounts of representation, the concept and the speculative sentence can be used to create sophisticated theories of language acquisition, universal grammar and linguistic practice. Hegel's defence of a scientific philosophy that is necessary and universal seems to eliminate the need for a philosophical linguistics. Since thought is demonstrably objective in itself, questions about the language through which it is expressed appear to be external to philosophy. This has caused many commentators to neglect the real problems that the historical and cultural associations of language pose for the adequate expression of universal thought. Others exploiting this apparent inadequacy have argued that the lack of rigorous linguistic analysis in Hegel's philosophy is its greatest and perhaps fatal flaw. Although the very idea of a Hegelian linguistics is controversial, this book argues that there are resources within the texts of Hegel for developing a general theory of language as the reciprocal grounding of a universal grammatical form and a particular lexical content. Moreover, it uses this theory to resolve the apparent tension between the necessity of Hegelian philosophy and the contingency of its linguistic expression. In the light of Hegel's critical relation to contemporary debates in Continental and Anglo-American philosophy coupled with the central role that philosophy of language plays in both streams, this important new study offers the first comprehensive integrated and fully developed analysis of Hegel's theory of language.

*Syntax-Semantics Interface* Eva Hajičová, 2018-03-01 The volume SYNTAX SEMANTICS INTERFACE is a collection of selected studies written by Eva Hajičová and published between the years 1973 and 2014. The contributions are based on the theoretical framework of the Functional Generative Description as proposed by Petr Sgall in the early sixties and developed further by him and his followers since then. Thematically, the volume reflects the author's research contributions to four main domains: i) the specification of the underlying deep sentence structure analyzed in terms of dependency relations; ii) the information structure of the sentence; topic focus articulation and its relation to the specification of presupposition and negation and to other related phenomena; iii)

building of a scheme of annotated corpus of Czech to serve among other things for verification of linguistic theoretical claims and iv some fundamental aspects of discourse structure namely the notion of the hierarchy of elements in the stock of knowledge shared by the speaker and the hearer All the papers except for one have been originally published in English and in they pay due respect to a comparison of the author's original findings with the current state of the art of linguistic theory at home and abroad
