Linked Data Tools Connecting On The Web Library Technology Reports:

Linked Data Tools Karen Coyle, American Library Association, 2012 Resource Description and Access and Library of Congress's commitment to a new bibliographic framework all point toward opportunities for shared linked library data. In this issue of Library Technology Reports, Karen Coyle updates readers on the development of fundamental resources such as standards, data elements, and term lists showing how they fit together. In clear straightforward language, she introduces common Semantic Web terminology and acronyms like RDF triples, SKOS, OWL, and SPARQL, showing readers how to locate defined metadata elements on the Web. Coyle lists and describes 20 sources of general use data elements to use from ISBD elements to Facebook's Open Graph, also describing numerous examples of topical lists suited to linking with library data, including subject lists, thesauri, and other controlled vocabularies. For developers and programmers, Coyle describes emerging tools that facilitate data element creation, validation of Semantic Web structures, link creation, and linked data searching.

Foundations of Library and Information Science, Fourth Edition Richard E. Rubin, 2017-11-22 *Health Sciences Librarianship* M. Sandra Wood, 2014-05-09 This comprehensive textbook of health sciences librarianship provides the library student and new librarian with the background and skills necessary to handle day to day activities and provide quality services in a health sciences library or a more general library serving students and practitioners in the health professions. The book has 16 chapters, each authored by an experienced medical librarian, and is organized logically into 4 sections: The Profession, Collection Services, User Services, and Administrative Services. Each chapter contains photographs, figures, tables, and charts illustrating the essential concepts introduced. Overseen by a 3 member editorial board of leading professors in medical librarianship programs, this authoritative text provides students, beginning and experienced librarians, with a comprehensive overview of state of the art medical librarianship. **Accentuate the Positive** Beth R. Bernhardt, Leah H. Hinds, Katina P. Strauch, 2013 Almost one hundred presentations from the 32nd annual Charleston Library Conference held November 7-10, 2012, are included in this annual proceedings volume. Major themes of the meeting included alternative metrics for measuring impact, patron driven acquisition, Open Access monographs, the future of university presses, and techniques for minimizing duplication and emphasizing the unique in library collections. While the Charleston meeting remains a core one for acquisitions librarians in dialog with publishers and vendors, the breadth of coverage of this volume reflects the fact that this conference is now one of the major venues for leaders in the publishing and library communities to shape strategy and prepare for the future. Almost 1,500 delegates attended the 2012 meeting, ranging from the staff of small public library systems to the CEOs of major corporations. This fully indexed, copyedited volume provides a rich source for the latest evidence based research and lessons from practice in a range of information science fields. The contributors are leaders in the library publishing and vendor communities. Crash Course in Basic Cataloging with RDA Heather Lea Moulaison, Raegan Wiechert, Assistant Professor, 2015-10-01 Covering tools, terminology, and the FRBR based RDA approach.

to description this book explains the current principles of organization of information and basic cataloging practices for non catalogers enabling readers to understand elements of the cataloging process and interact with records in a basic manner Organization of information and cataloging is often the most daunting task for library technicians and non catalogers working in the library New RDA cataloging rules can be baffling for even the more seasoned catalogers Written by two authors with 20 years combined experience in cataloging instruction Crash Course in Basic Cataloging with RDA approaches current principles of organization of information and cataloging practices from a basic standpoint for non catalogers It makes a complex topic easy to understand and a complicated practice doable for those without the proper training and necessary experience The book gives readers a basic understanding of organization of information and cataloging practice explaining how records are created and the approaches to different formats of information in libraries including MARC records and encoding RDA cataloging records offering assistance in applying RDA identifying the cataloger s tools and providing non technical explanations for the tasks that today s catalogers do It contains an introduction a bibliography webliography and three appendices of additional resources Cataloging Tools Resources for Catalogers and Sample Catalog Records **Library**
