Switching to Linux and become free in a few days, 2025-09-04 Linux is establishing itself as a solid secure beautiful and easy to use system even on home computers suitable for professionals and novice users alike. At a time when Microsoft is pursuing a policy that is nothing short of suicidal hindering many users transition to Windows 11 the only successor to the now nearly dead Windows 10 which will no longer be supported by October 2025 turning to Linux means making a complete change that brings countless advantages. While the big companies tell you that your computer is too old and you need to buy another one if you want to use the latest operating system while they spy on your activities and exchange your data with external services without your knowledge there exists a parallel universe where all this and much more doesn't exist where you'll find a stable secure system the most secure currently aesthetically beautiful thanks to the many different graphical interfaces available that adapts to your needs with hundreds of different distributions each dedicated to specific use cases that makes better use of your computer's resources providing performance and speed unimaginable on other systems that only does what you ask of it that is studied and maintained improved and corrected daily by developers and enthusiasts from around the world a system where the rule applies I do something good for the community the community will do something good that I can also use so I do it to the best of my ability to make it work. And all this exists absolutely free. What do you think are you interested In this my third book I'll try to guide you through the basics of Linux and its wonders so you can understand the benefits of adopting it and why within a few days you won't miss Windows at all.
