Elements of Quality Online Education John R. Bourne,Janet C. Moore,2004 In the ten years since the inception of the Sloan Consortium the field of online learning has entered the mainstream of higher education making online learning a core ingredient of tomorrow s educational paradigms Now that digital natives are coming of age the blending of on ground and online education is continuous and unstoppable Growing demands for wide choice suggest that the blended agenda presses us rapidly into new realms of inquiry Thus the title of this collection the fifth volume in the Sloan C series on quality is **Elements of Quality Online Education Into the Mainstream** The 14 peer reviewed studies in this volume provide guidance for effectively responding to the challenges facing higher education The studies on Student Satisfaction recognize that significant populations remain underserved Yet asynchronous learning networks ALNs are widening access by easing some of the constraints of place based synchronous learning so that many more and many more new kinds of learners can achieve satisfaction and success The studies on Learning Effectiveness share an emphasis on the ways that ALN exceeds the no significant difference minimum standard for learning outcomes The studies on blending combining face to face and online methods for learning offer rich possibilities for what many see as the best of both learning modes The studies on assessment go to the core of the Sloan C quality framework and its emphasis on continuous quality improvement through demonstrating progress towards the overarching goal of affordable access for all in a wide range of disciplines In our time of profound rapid and discontinuous change these studies envision solutions to the challenges of online blended and face to face education in higher education Sponsored by the Alfred P Sloan Foundation the purpose of the Sloan Consortium Sloan C is to help learning organizations continually improve quality scale and breadth according to their own distinctive missions so that education will become a part of everyday life accessible and affordable for anyone anywhere at any time in a wide variety of disciplines **Children's Books in Print** R R Bowker Publishing,Bowker,1999-12 **Dynamic Curriculum**

Development and Design Strategies for Effective Online Learning in Higher Education Walters, Kelley,2023-09-28 Online learning has gained popularity as a preferred option for higher education institutions globally particularly due to the COVID 19 pandemic This has created a need for educators and practitioners to understand the strategies and techniques required for designing and delivering effective online courses that can engage students and provide them with the necessary skills and knowledge for success The book **Dynamic Curriculum Development and Design Strategies for Effective Online**

Learning in Higher Education offers a practical guide and insights into the latest trends and best practices for curriculum development and design in the context of online learning. Organized into three main sections, the book begins with an overview of the current landscape of online learning and the challenges and opportunities it presents for curriculum development. It then delves into the design and development of online courses followed by the implementation and delivery of those courses. The book is relevant to both novice and experienced educators and practitioners who are involved in designing, developing and delivering online courses in higher education. It provides a comprehensive understanding of the strategies and techniques required to design and deliver effective online courses while examining the challenges and opportunities presented by online learning in higher education. As such, this book is an essential resource for anyone involved in online learning in higher education who seeks to develop and deliver dynamic and engaging courses that cater to the needs of online learners.

Books in Print Supplement, 2002 *Interlanguage Error Analysis: an Appropriate and Effective Pedagogy for EFL Learners in the Arab World* Muhammad Khan Abdul Malik, 2020-05-31 First of all, the author wants to make it crystal clear that the present work is of a great benefit both for the English and Arab learners of the target language, either Arabic or English. This edition of the book pinpoints previous researchers' findings regarding English and Arabic phonological, morphological, and syntactic similarities and differences and how all these differences result in mistakes and errors by the Arab learners of English in their learning process. These mistakes or errors are unconsciously or involuntarily made by Arab learners of English due to the differences between the system and sub-systems of the two languages. The present attempt is the result of my realization as an English language teacher as to how a teacher can minimize students' difficulties in learning of English and maximize their knowledge, skills, and competency of English as a foreign or second language. This is the first edition. The work is pedagogically oriented and primarily intended to make teaching/learning of English as a foreign second language a bit easy, especially for the first-year university students of English language in the Arab world/Gulf area, such as KSA, UAE, Kuwait, and the Middle East Area, such as Jordan, Syria, Lebanon, and so on. The focus is on phonetic and morpho-syntactic variations in Arabic and English languages. This area of research becomes more interesting through the assumptions: i) information about the differences and similarities between Arabic and English language is to be supplied at an early stage since this facilitates the students' learning task; ii) the differences are to be presented in pedagogically suitable format; iii) it is useful to separate and present phonetics, morphological, and syntactic categories as they function in suitable contexts and not merely abstract notions; iv) before students may tackle contrastive analysis, they should have basic knowledge of Arabic and English languages, similarities and differences; and v) pre-modification and post-modification of lexical and syntactic structures are to be explained appropriately.
