Tibayrenc,Francisco J. Ayala,2016-09-12 On Human Nature Biology Psychology Ethics Politics and Religion covers the
present state of knowledge on human diversity and its adaptative significance through a broad and eclectic selection of
representative chapters This transdisciplinary work brings together specialists from various fields who rarely interact
including geneticists evolutionists physicians ethologists psychoanalysts anthropologists sociologists theologians historians
linguists and philosophers Genomic diversity is covered in several chapters dealing with biology including the differences in
men and apes and the genetic diversity of mankind Top specialists known for their open mind and broad knowledge have
been carefully selected to cover each topic The book is therefore at the crossroads between biology and human sciences
going beyond classical science in the Popperian sense The book is accessible not only to specialists but also to students
professors and the educated public Glossaries of specialized terms and general public references help nonspecialists

understand complex notions with contributions avoiding technical jargon Provides greater understanding of diversity and population structure and history with crucial foundational knowledge needed to conduct research in a variety of fields such as genetics and disease Includes three robust sections on biological psychological and ethical aspects with cross fertilization and reciprocal references between the three sections Contains contributions by leading experts in their respective fields working under the guidance of internationally recognized and highly respected editors *Films and Other Materials for Projection* Library of Congress,1973 **Books and Pamphlets, Including Serials and Contributions to Periodicals** Library of Congress.
