**Hawker's Early Jets** Christopher Budgen, 2022-02-10 A study of the British manufacturer s efforts to get its Hunter aircraft into service following World War II On September 2 1947 Hawker Aircraft Ltd figuratively and literally took to the air with their first jet design the P 1040 Conceived in the latter days of the Second World War and developed in the straitened times of post war austerity the aircraft allowed Hawker to explore the new technology before moving on to more ambitious programs Rejected by the Royal Air Force subsequent development of the aircraft allowed the Royal Navy to find in it a useful role at sea As this project slowly wound its way through the government bureaucracy against a background of national

insolvency Hawker continued their research into more potent forms of jet travel with their first swept wing aircraft the P 1052 their first rocket powered example the P 1072 and finally the sleek all swept P 1081 These essentially research aircraft gave the company the experience and expertise it required to produce a powerful transonic fighter with which to equip the RAF for the defense of the UK and other friendly nations at a time when the Cold War threatened to engulf the world in a truly global nuclear conflict That aircraft the P 1067 Hunter first flew in 1951 and was at the time the fastest fighter in the world as evinced by gaining the World Airspeed Record in 1953 prior to entry into RAF service at a stroke revolutionizing the potential of the UK's air arm Such was the haste with which this occurred that many teething problems remained to be resolved as detailed here but eventually the aircraft would become the day fighter of choice for many of the world's air forces and remain in service for decades to come *Spare Parts Schedule*, 19?? **Hawker's Secret Projects** Christopher Budgen, 2023-12-21 Hawker Aircraft Ltd at Kingston was arguably the most successful and long lasting manufacturer of military aircraft in Great Britain and Europe In its various evolved manifestations Hawker Aircraft Hawker Siddeley Aviation British Aerospace its output of war winning aircraft mainly fighters was unsurpassed From the Hart and Hurricane through the Hunter Harrier and Hawk the company consistently produced aircraft that the UK fighting services wanted But some designs for whatever reason failed to reach flight or were declined by the services With their sometimes advanced aerodynamics and technology these aircraft could have had successful service careers but instead were abandoned their stories failing to reach mainstream consciousness Having not received their just dues the present book seeks to redress this omission The reasons for failure are many and varied often financial or political but in each case the reasons behind the failure of the design are examined In a wide ranging investigation that documents the origins of Hawker Aircraft Ltd and its famous Project Office this work the third in Christopher Budgen's investigation of the inner workings of Hawker Aircraft is a fitting tribute to the many who made the company the success it was *Federal Register*, 2013-12 **King Air 200 Work Book** Douglas Carmody, 2010-12-04 Beechcraft King Air 200 workbook Operation Crossbow Allan Williams, 2013-05-30 The story of the photographic intelligence work undertaken from a country house at Medmenham Buckinghamshire is one of the great lost stories of the Second World War At its peak in 1944 almost 2 000 British and American men and women worked at the top secret Danesfield House interpreting photographs the majority stereoscopic so they could be viewed in 3D to unlock secrets of German military activity and weapons development Millions of aerial photographs were taken by Allied pilots flying unarmed modified Spitfires and Mosquitos on missions over Nazi Europe it was said that an aircraft could land the photographs be developed and initial interpretation completed within two hours marking the culmination of years of experiments in aerial intelligence techniques Their finest hour began in 1943 during the planning stages of the Allied invasion of Europe when Douglas Kendall who masterminded the interpretation work at Medmenham led the hunt for Hitler's secret weapons Operation Crossbow would grow from a handful of photographic interpreters to the creation of a hand picked

team and came to involve interpreters from across the Medmenham spectrum including the team of aircraft specialists led by the redoubtable Constance Babington Smith In November that year whilst analysing photographs of Peenemunde in northern Germany they spotted a small stunted aircraft on a ramp This intelligence breakthrough linked the Nazi research station with a growing network of sites in northern France where ramps were being constructed aligned not only with London but targets throughout southern Britain Through the combined skill and dedication of the Crossbow team and the heroism of the Allied pilots throughout late 1943 and 1944 V weapon launch sites were located and through countermeasures destroyed saving hundreds of thousands of lives and changing the course of the war Operation Crossbow is a wonderful story of human endeavour and derring do told for the first time      **Monthly Catalogue, United States Public Documents** ,1985
