Kolen, Robert L. Brennan, 2013-03-14 Test equating methods are used with many standardized tests in education and psychology to ensure that scores from multiple test forms can be used interchangeably In recent years researchers from the education psychology and statistics communities have contributed to the rapidly growing statistical and psychometric methodologies used in test equating This book provides an introduction to test equating which both discusses the most frequently used equating methodologies and covers many of the practical issues involved This second edition expands upon the coverage of the first edition by providing a new chapter on test scaling and a second on test linking Test scaling is the process of developing score scales that are used when scores on standardized tests are reported In test linking scores from two or more tests are related to one another Linking has received much recent attention due largely to investigations of linking similarly named tests from different test publishers or tests constructed for different purposes The expanded coverage in the second edition also includes methodology for using polytomous item response theory in equating The themes of the second edition include the

purposes of equating scaling and linking and their practical context data collection designs statistical methodology designing reasonable and useful equating scaling and linking studies importance of test development and quality control processes to equating equating error and the underlying statistical assumptions for equating Given the perennial debates about academic standards and grade inflation it is my view that tools such as those described in this book should be adopted much more widely by the academic community than they are at present This book provides an excellent overview and I strongly recommend it Short Book Reviews of the ISI April 2005 I highly recommend this book to everybody who has any interest in equating and linking be they a student practitioner or researcher Psychometrika 2006 Private Secondary Schools 2014-2015 Peterson's, 2014-01-09 Peterson's Private Secondary Schools 2014-15 is a valuable resource to help parents and students evaluate and choose from more than 1 100 schools in the United States Canada and throughout the world Featured institutions include independent day schools special needs schools and boarding schools including junior boarding schools for middle school students Profiles offer detailed information on areas of specialization location setting affiliation accreditation tuition and aid availability student body faculty academic programs athletics computers and campus technology and admission information Dozens of in depth descriptions and displays offer photos of students and school campuses as well as essential information to help parents find the right private secondary school for their child Extra Summer Programs section offers additional details on fascinating summer opportunities at private secondary schools **Achievement Motivation** Fyans, 2013-06-29 This book started as a symposium on Achievement Motivation at the 1978 American Educational Research Association Convention The participants in that symposium were Jack Atkinson Martin Maehr Dick De Charms Joel Raynor and Dave Hunt The subsequent response to that symposium indicated a coming of age for motivation theory in terms of education Soon afterward at a Motivation in Education Conference at University of Michigan Ann Arbor it became apparent that due to this emergence of motivation what was needed was a comprehensive perspective as to the state of the art of achievement theory Achievement theory had by now well surpassed its beginnings in the 1950s and 1960s and was ready for a composite presentation and profile of the recent research and theories of motivation Thus this volume was born I would like to take this opportunity to thank each contributor to this book as well as Robert L Linn who critically reviewed several of the manuscripts Thanks are also due to my former graduate advisors Martin L Maehr Maurice Tatsuoaka and Harry Triandis for the viewpoints given me in graduate school education which I hope have benefitted this undertaking Joyce Fitch did a splendid job typing many of these chapters and special gratitude should be given to Judy Cadle of Professional Services Inc for the composition and proofing of this book *Literacy Assessment and Instructional Strategies* Kathy B. Gender and Fair Assessment

Warren W. Willingham, Nancy S. Cole, 2013-12-16 There have been many important changes in the participation of women and men in American society over the past quarter century. Tests play a role in those changes by providing evidence of the diverse achievement and proficiency of women and men. They aid the learning process and reflect inequalities in opportunity to learn and participate. In addition, they provide useful information in considering what alternatives in education and work make most sense for individuals and influence views about groups of students, educational programs, and a wide range of issues. For all of these reasons, it is important that tests assess fairly and reflect accurately the ways young people are and are not achieving as well as desired. The test performance of women and men is a research topic of historical interest and has received much attention in recent years. Because of this increased interest, there is a great deal of new research and data available. The purpose of the study presented in this volume was to review this new information with two objectives in mind: to clarify patterns of gender difference and similarity in test performance and related achievements and to see what implications those findings might have for fair assessment and as a corollary, to examine the assessment process as a possible source of gender differences. This study is interested in tests used in education to assess developed knowledge and skill. In order to gain a broader view of gender similarity and difference, the contributors looked at other types of measures and other characteristics of young women and men. Their hope is to contribute to a firmer basis for insuring fairness in tests, an objective which is particularly important as the field moves increasingly to new forms of assessment in which there is less experience.
