Grand Illusions David M. Lubin, 2016-04-06 A vivid engaging account of the artists and artworks that sought to make sense of America's first total war *Grand Illusions* takes readers on a compelling journey through the major historical events leading up to and beyond US involvement in WWI to discover the vast and pervasive influence of the conflict on American visual culture

David M Lubin presents a highly original examination of the era's fine arts and entertainment to show how they ranged from patriotic idealism to profound disillusionment. In stylishly written chapters, Lubin assesses the war's impact on two dozen painters, designers, photographers, and filmmakers from 1914 to 1933. He considers well-known figures such as Marcel Duchamp, John Singer Sargent, D. W. Griffith, and the African American outsider artist Horace Pippin, while resurrecting forgotten artists such as the mask maker Anna Coleman Ladd, the sculptor Gertrude Vanderbilt Whitney, and the combat artist Claggett Wilson. The book is liberally furnished with illustrations from epoch-defining posters, paintings, photographs, and films. Armed with rich cultural, historical details and an interdisciplinary narrative approach, David Lubin creatively upends traditional understandings of the Great War's effects on the visual arts in America. **American Education in**

Magazines and Modern Identities Tim Satterthwaite, Andrew Thacker, 2023-09-21 In the late nineteenth and early twentieth century, ideals of technological progress and mass consumerism shaped the print cultures of countries across the globe. Magazines in Europe, the USA, Latin America, and Asia inflected a shared internationalism and technological optimism. But there were equally powerful countervailing influences of patriotic or insurgent nationalism and of traditionalism that promoted cultural differentiation. In their editorials, images, and advertisements, magazines embodied the tensions between these domestic imperatives and the forces of global modernity. *Magazines and Modern Identities* explores how these tensions played out in the magazine cultures of ten different countries, describing how publications drew on, resisted, and informed the ideals and visual forms of global modernism. Chapters take in the magazines of Australia, Europe, and North America, as well as China, the Soviet Union, Turkey, and Mexico. With contributions from leading international scholars, the book considers the pioneering developments in European and North American periodicals in the modernist period, whilst expanding the field of enquiry to take in the vibrant magazine cultures of East Asia and Latin America. The construction of these magazines' modern ideals was a complex dialectical process in dialogue with international modernism, but equally responsive to their local cultures and the beliefs and expectations of their readers. *Magazines and Modern Identities* captures the diversity of these ideals in periodicals that both embraced and criticised the globalised culture of the technological era. **Gorgeous War** Tim

Blackmore, 2019-10-29 *Gorgeous War* argues that the Nazis used the swastika as part of a visually sophisticated propaganda program that was not only modernist but also the forerunner of contemporary brand identity. When the United States military tried to answer Nazi displays of graphic power, it failed. In the end, the best graphic response to the Nazis was produced by the Walt Disney Company. Using numerous examples of US and Nazi military heraldry, *Gorgeous War* compares the way the American and German militaries developed their graphic and textile design in the interwar period. The book shows how social

and cultural design movements like modernism altered and were altered by both militaries It also explores how nascent corporate culture and war production united to turn national brands like IBM Coca Cola and Disney into multinational corporations that had learned lessons on propaganda and branding that were being tested during the Second World War What is the legacy of apparently toxic signs like the swastika The answer may not be what we hoped Inheritors of the post Second World War world increasingly struggle to find an escape from an intensely branded environment to find a place in their lives that is free of advertising and propaganda This book suggests that we look again at how it is our culture makes that struggle into an appealing Gorgeous War

White,2013-09-12

Literature is not only about aesthetics but also almost equally about economics. The successful marketing of an author and his literary works is more dependent on the activities of cultural merchants than on the particular words and phrases found in the author's prose. *Marketing Literature and Posthumous Legacies* focuses on the creation of symbolic capital for the literary legacies of Leonid Andreev and Vladimir Nabokov that was eventually exchanged by cultural merchants for financial and ideological profit. Yuri Leving and Frederick H. White discuss the ways in which certain cultural merchants created symbolic meaning for these two authors through a process of collusion, consecration, and the marketing of tangible and intangible products that lead to some sort of transaction. The promotion and maintenance of posthumous legacies involves an intricate network of personal interests that drive the preservation of literary reputations.
