Ocean Science and the British Cold War State Samuel A. Robinson, 2018-05-03 This book focuses on the activities of the scientific staff of the British National Institute of Oceanography during the Cold War Revealing how issues such as intelligence gathering environmental surveillance the identification of enemy science along with administrative practice informed and influenced the Institute s Cold War program In turn this program helped shape decisions taken by Government military and the civil service towards science in post war Britain This was not simply a case of government ministers choosing to patronize particular scientists but a relationship between politics and science that profoundly impacted on the future of ocean science in Britain *The Physics of Scuba Diving* Marlow Anderson, 2011-06-28 The Physics of Scuba Diving features questions at the end of each chapter for which answers can be found by visiting <http://nup.com/physics-of-scuba-diving-answer.aspx>

Sustainable Development and Resilience of Tourism Deepak Chhabra, Navin Atal, Alka Maheshwari, 2024-08-29 This

volume examines progress in sustainable and resilient development of niche forms of tourism from a health and wellbeing perspective. It also aims to offer deep and innovative insights on the supporting role of non pharmaceutical interventions to enhance resilience and wellbeing of visited and visiting communities. A comparative and critical discourse of the role of hard medicine is also offered from both a core and supplementary perspective particularly from eudaimonic and physiologically restorative standpoints. Furthermore indigenous non pharmaceutical interventions and spiritual healing mechanisms are discussed in the context of their potential to facilitate long term immunity and happiness. The book conceptually situates health as a fourth pillar of sustainability and examines its role in stimulating long lasting transformations rooted in positive psychology, inner transformation and sustainable consumption of organic products and services. It designs an evolving transformational Quality of Life paradigm that strengthens the foundations of health wellbeing based sustainable development initiatives and resilience of tourism systems. The work will be of interest to academic, professional and various public and private stakeholders of tourism such as destination marketing organizations, policy makers, hospitality industries, tour operators, host communities, NGOs and government agencies.

Ice Ghosts Paul Watson, 2017-03-21. Intriguing and enjoyable. Ian McGuire, New York Times Book Review. Ice Ghosts weaves together the epic story of the lost Franklin Expedition of 1845 whose two ships HMS Erebus and HMS Terror and their crew of 129 were lost to the Arctic ice with the modern tale of the scientists, divers and local Inuit behind the recent incredible discoveries of the wrecks. Paul Watson, a Pulitzer Prize winning journalist who was on the icebreaker that led one of the discovery expeditions, tells a fast paced historical adventure story and reveals how a combination of faith in Inuit knowledge and the latest science yielded a discovery for the ages.

The Dream Machine Richard Whittle, 2010-04-27. A fascinating and authoritative narrative history of the V-22 Osprey, revealing the inside story of the most controversial piece of military hardware ever developed for the United States Marine Corps. When the Marines decided to buy a helicopter/airplane hybrid tiltrotor called the V-22 Osprey, they saw it as their dream machine. The tiltrotor was the aviation equivalent of finding the Northwest Passage: an aircraft able to take off land and hover with the agility of a helicopter yet fly as fast and as far as an airplane. Many predicted it would reshape civilian aviation. The Marines saw it as key to their very survival. By 2000, the Osprey was nine years late and billions over budget, bedeviled by technological hurdles, business rivalries and an epic political battle over whether to build it at all. Opponents called it one of the worst boondoggles in Pentagon history. The Marines were eager to put it into service anyway. Then two crashes killed twenty-three Marines. They still refused to abandon the Osprey even after the Corps' own proud reputation was tarnished by a national scandal over accusations that a commander had ordered subordinates to lie about the aircraft's problems. Based on in-depth research and hundreds of interviews, *The Dream Machine* recounts the Marines' quarter-century struggle to get the Osprey into combat. Whittle takes the reader from the halls of the Pentagon and Congress to the war zone of Iraq, from the engineer's drafting table to the cockpits of the civilian and Marine pilots who risked their lives.

flying the Osprey and sometimes lost them He reveals the methods motives and obsessions of those who designed sold bought flew and fought for the tiltrotor These stories including never before published eyewitness accounts of the crashes that made the Osprey notorious not only chronicle an extraordinary chapter in Marine Corps history but also provide a fascinating look at a machine that could still revolutionize air travel

Why Forests? Why Now? Frances Seymour, Jonah Busch, 2016-12-27 Tropical forests are an undervalued asset in meeting the greatest global challenges of our time averting climate change and promoting development Despite their importance tropical forests and their ecosystems are being destroyed at a high and even increasing rate in most forest rich countries The good news is that the science economics and politics are aligned to support a major international effort over the next five years to reverse tropical deforestation Why Forests Why Now synthesizes the latest evidence on the importance of tropical forests in a way that is accessible to anyone interested in climate change and development and to readers already familiar with the problem of deforestation It makes the case to decisionmakers in rich countries that rewarding developing countries for protecting their forests is urgent affordable and achievable

Expeditions as Experiments Marianne Klemun, Ulrike Spring, 2016-10-18 This collection focuses on different expeditions and their role in the process of knowledge acquisition from the eighteenth century onwards It investigates various forms of scientific practice conducted during after and before expeditions and it places this discussion into the scientific context of experiments In treating expeditions as experiments in a heuristic sense we also propose that the expedition is a variation on the laboratory in which different practices can be conducted and where the transformation of uncertain into certain knowledge is tested The experimental positioning of the expedition brings together an ensemble of techniques strategies material agents and social actors and illuminates the steps leading from observation to facts and documentation The chapters show the variety of scientific interests that motivated expeditions with their focus on natural history geology ichthyology botany zoology helminthology speleology physical anthropology oceanography meteorology and magnetism

Deep Learning Stellan Ohlsson, 2011-01-31 Although the ability to retain process and project prior experience onto future situations is indispensable the human mind also possesses the ability to override experience and adapt to changing circumstances Cognitive scientist Stellan Ohlsson analyzes three types of deep non monotonic cognitive change creative insight adaptation of cognitive skills by learning from errors and conversion from one belief to another incompatible belief For each topic Ohlsson summarizes past research re formulates the relevant research questions and proposes information processing mechanisms that answer those questions The three theories are based on the principles of redistribution of activation specialization of practical knowledge and re subsumption of declarative information Ohlsson develops the implications of those mechanisms by scaling their effects with respect to time complexity and social interaction

The book ends with a unified theory of non monotonic cognitive change that captures the abstract properties that the three types of change share
