Mathematics Education in Brazil Alessandro Jacques Ribeiro, Lulu Healy, Rute Elizabete de Souza Rosa Borba, Solange Hassan Ahmad Ali Fernandes, 2018-08-14 This book presents for the first time in English the state of the art of Mathematics Education research in Brazil a country that has the strongest community in this field in Latin America Edited by leading researchers in the area the volume provides the international academic community a summary of the scientific production of the thirteen working groups of the Brazilian Society of Mathematics Education SBEM the national scientific society that brings together researchers teachers students and other professionals of the area These working groups meet every three years at the International Seminar of Mathematics Education SIPEM and cover the following topics Mathematics Education in the Early Years and Primary Education Y1 Y5 Mathematics Education in the Middle School Y6 Y9 Mathematics Education in the High School Y10 Y12 Mathematics Education at the University level History of Mathematics Culture and Mathematics Education Digital Technologies and Distance Education Teacher Education Assessment and Mathematics Education Cognitive and Linguistic Processes in Mathematics Education Mathematical Modeling Philosophy of Mathematics Education Teaching Probability and Statistics and Difference Inclusion and Mathematics Education Each chapter of the book presents an overview of the production of a working group and they are all preceded by an introduction by professor Ubiratan D Ambrosio one of the pioneers of Mathematics Education in Brazil

Oral History and Mathematics Education Antonio Vicente Marafioti Garnica, 2019-09-10 This book presents an innovative method to investigate the history of mathematics education using oral narratives to study different aspects related to the teaching and learning of mathematics The application of oral history in mathematics education research was first developed as a method in Brazil in the early 2000s as a result of interdisciplinary dialogues between mathematics educators anthropologists sociologists historians psychologists artists and philosophers Since then this new methodology has attracted the attention of a growing number of researchers This contributed volume is the first book in English to bring together chapters written by different members of the research group who developed the

methodology and to present a comprehensive overview of the theoretical and practical aspects of the use of oral narratives in the study of experiences in mathematics classrooms Oral History and Mathematics Education will be a useful tool to researchers and educators looking for new methods to study the dynamics of teaching and learning mathematics in the classroom and to develop innovative mathematics teacher education programs The volume will also be of interest to historians of education since it describes the foundations of both concepts and procedures related to the application of oral history in educational research always giving examples of studies already conducted and whenever possible suggesting possible research exercises

Matemática educativa, 1990 Mathematical Modelling Programs in Latin America Milton Rosa, Francisco Cordero, Daniel Clark Orey, Pablo Carranza, 2022-07-06 This book is about the unique sophisticated and rigorous study of mathematics in Latin America developed over centuries of cultural exchange between Europe North and South America More specifically the book explores the tradition of mathematical modelling introduced a century ago This modelling was adapted to assist members of distinct communities to draw information about their own realities through the elaboration of representations which generate mathematical knowledge that deals with creativity and invention The book provides empirical evidence that a category of mathematical modelling developed in Latin America assesses the horizontal and reciprocal relations between mathematics school non school contexts and the real world These relations provide an epistemological and ontological change where mathematical knowledge of the others is recognized on a horizontal plane Further they oblige mathematics teachers and students to understand as a community of knowledge that builds their own mathematical categories of their environment governed by the reciprocal relationships between academic knowledge and functional knowledge The dimensions of the relationships make up a frame of reference that guides educational change in mathematics The book presents an inquiry based approach of three Latin American modelling programs ethnomodelling transversality of knowledge and reasoned decision making Each one with its respective theoretical and methodological foundations related to ethnomathematics and mathematical modelling socioepistemology and the attribution of meaning to learning Undoubtedly the three mathematical modelling programs independently provide educational gains each with its levels of specificity and loyal to its philosophical theoretical and methodological principles However the book places them together organized by axes to define a corpus of mathematical knowledge that envisions profound educational change through the development of different approaches of mathematical modelling The authors of the 18 chapters in this book who represent the diversity of Latin America are from eight countries Argentina Brazil Chile Colombia Costa Rica Cuba Ecuador Honduras and Mexico They were invited to share their ideas perspectives and discuss investigations that represent a rich sample of three Latin American perspectives on mathematical modelling

Educação Matemática Josaine De Moura Pinheiro E Suelen Assunção Santos (orgs), 2017-09-03 A obra reúne trabalhos de alunos e de professores do curso de Especialização em Educação Matemática da Unisinos pensada a partir do tripé pesquisa, teoria e prática Neste sentido aborda

possibilidades de percursos teóricos metodológicos para se fazer pesquisa em Educação Matemática pretendendo impulsionar reflexões acerca de tópicos potenciais para investigações na área e adentrando com sugestões de abordagens práticas para o ensino de Matemática na Educação Básica e Superior

Social Media in the Changing Mathematics Classroom Johann Engelbrecht, Greg Oates, Marcelo de Carvalho Borba, 2025-04-16 This edited volume gathers contributions from international scholars focusing on social media's role and impact on mathematics education Social media's integration into pedagogical strategies from social networking sites to video sharing platforms offers the opportunity to enhance learning by fostering connectivity and engagement among students ultimately improving mathematical understanding in educational settings This text aims to provide guidance on the facilitation of peer learning and collaboration as well as highlighting the necessary shift in traditional methods to include cyber assistance in the learning process The book discusses how social media aligns with social constructivist theories of learning its consistency with the process of developing students into independent learners and provides means to ensuring educators remain relevant and connected to students preferred modes of learning Challenges and benefits of the use of social media tools in teaching are also detailed Examining the potential for effective integration of social media in the classroom this book is a valuable resource for educators practitioners and researchers interested in mathematics education

Handbook of Digital Resources in Mathematics Education Birgit Pepin, Ghislaine Gueudet, Jeffrey Choppin, 2024-06-21 This handbook presents the state of the art scholarship on theoretical frames mathematical content learning environments pedagogic practices teacher professional learning and policy issues related to the development and use of digital resources in mathematics education With the advent of more and more open access digital resources teachers choose from the web what they see fit for their classroom students choose in the moment what they need for their projects and learning paths However educators and students often find it difficult to choose from the abundance of materials on offer as they are uncertain about their quality and beneficial use It is clear that at a time of bouleversement of the teaching learning processes it is crucial to understand the quality and the potentially transformative aspects of digital resources This book provides comprehensive analyses of and insights into the transformative aspects of digital resources

The Role of the History of Mathematics in the Teaching/Learning Process Sixto Romero Sanchez, Ana Serradó Bayés, Peter Appelbaum, Gilles Aldon, 2023-06-15 This volume presents multiple perspectives on the uses of the history of mathematics for teaching and learning including the value of historical topics in challenging mathematics tasks for provoking teachers reflection on the nature of mathematics curriculum development questions that mirror earlier pedagogical choices in the history of mathematics education and the history of technological innovations in the teaching and learning of mathematics An ethnomathematical perspective on the history of mathematics challenges readers to appreciate the role of mathematics in perpetuating consequences of colonialism Histories of the textbook and its uses offer interesting insights into how technology has changed the fundamental role of curriculum materials and classroom pedagogies History is explored as a

source for the training of teachers for good puzzles and problems and for a broad understanding of mathematics education policy Third in a series of sourcebooks from the International Commission for the Study and Improvement of Mathematics Teaching this collection of cutting edge research stories from the field and policy implications is a contemporary and global perspective on current possibilities for the history of mathematics for mathematics education This latest volume integrates discussions regarding history of mathematics history of mathematics education and history of technology for education that have taken place at the Commission s recent annual conferences European Traditions in Didactics of Mathematics Werner Blum, Michèle Artigue, Maria Alessandra Mariotti, Rudolf Strässer, Marja Van den Heuvel-Panhuizen, 2019-02-18 This open access book discusses several didactic traditions in mathematics education in countries across Europe including France the Netherlands Italy Germany the Czech and Slovakian Republics and the Scandinavian states It shows that while they all share common features both in the practice of learning and teaching at school and in research and development they each have special features due to specific historical and cultural developments The book also presents interesting historical facts about these didactic traditions the theories and examples developed in these countries *Matemática educativa* Dolores Flores, Crisólogo, García González, Maria del Rosario, Hernández Sánchez, Judith Alejandra, Sosa Guerrero, Leticia, 2014-01-01 Hoy en día uno de los retos en la mejora de la enseñanza y el aprendizaje de las matemáticas es poner en el mismo nivel de importancia las necesidades de los estudiantes y de los profesores Existe una amplia gama de publicaciones dedicadas a entender como aprenden matemáticas los estudiantes y a identificar sus necesidades de enseñanza y aprendizaje Sin embargo pocas son las publicaciones dedicadas a los profesores Por eso esta obra pone en el centro de atención la formación de los profesores de matemáticas En ella varios especialistas analizan desde el estado del arte que guarda esta formación pasando por el planteamiento de propuestas sobre como debera ser la formación profesional hasta las tendencias actuales que en el campo de la investigación en matemática educativa existen para explicar tan importante proceso Esta obra es por tanto un referente útil y necesario para profesores estudiantes investigadores diseñadores de curriculum autoridades educativas y todos aquellos interesados en el campo de la enseñanza y aprendizaje de la matemática **Educación 4.0 en la época de pandemia y pospandemia : retos y oportunidades**, 2024-06-26 El libro que aquí se presenta Educación 4.0 en la época de Pandemia y Pospandemia retos y oportunidades representa un esfuerzo consistente y pertinente que expone lecciones aprendizajes y áreas de oportunidad que tienen las organizaciones de educación superior a partir del uso generalizado de tecnologías de la información y la comunicación durante y posterior a la pandemia por COVID 19 Esta obra está dirigida a los docentes y actores involucrados en los procesos educativos pues no es conveniente dar vuelta a la hoja y retomar las antiguas prácticas presenciales y tradicionales después de todo el aprendizaje acumulado que se gestó durante esta etapa de contingencia sino que estas experiencias nos conduzcan hacia escenarios de la Educación 4.0 indispensable para la conformación de ciudadanos del México del siglo XXI DOI <https://doi.org/10.52501/cc.164> **Extended Abstracts 2022**

Ignasi Florensa, Noemí Ruiz-Munzón, Kristina Markulin, Berta Barquero, Marianna Bosch, Yves Chevallard, 2024-07-22 This book includes contributions from the conference held in Barcelona in 2022. It brings together researchers interested in the Anthropological Theory of the Didactic (ATD) and aims at the following objectives: Establishing an updated overview of the results and progress in the ATD concerning both basic research and the development of education systems including teacher education; Developing a research programme around the most relevant open problems either related to difficulties affecting education systems or the development of didactics as a scientific discipline; Identifying and studying the specific problems raised by the extension of the ATD's conceptual and methodological tools to other fields. The conference is structured around the following thematic axis: Axis 1: Development of the Foundations: Tools and Aims of Research in the Framework of the ATD; Axis 2: The Curriculum: Problem and the paradigm of questioning the world; Axis 3: ATD and the professionalization of the teaching profession.

Big Data in Education: Pedagogy and Research Theodosia Prodromou, 2021-10-04 This book discusses how Big Data could be implemented in educational settings and research using empirical data and suggesting both best practices and areas in which to invest future research and development. It also explores: 1. the use of learning analytics to improve learning and teaching; 2. the opportunities and challenges of learning analytics in education. As Big Data becomes a common part of the fabric of our world, education and research are challenged to use this data to improve educational and research systems and also are tasked with teaching coming generations to deal with Big Data both effectively and ethically. The Big Data era is changing the data landscape for statistical analysis: the ways in which data is captured and presented and the necessary level of statistical literacy to analyse and interpret data for future decision making. The advent of Big Data accentuates the need to enable citizens to develop statistical skills: thinking and reasoning needed for representing, integrating and exploring complex information. This book offers guidance to researchers who are seeking suitable topics to explore. It presents research into the skills needed by data practitioners: data analysts, data managers, statisticians and data consumers, academics and provides insights into the statistical skills: thinking and reasoning needed by educators and researchers in the future to work with Big Data. This book serves as a concise reference for policymakers who must make critical decisions regarding funding and applications.

APOS Theory Ilana Arnon, Jim Cottrill, Ed Dubinsky, Asuman Oktaç, Solange Roa Fuentes, Maria Trigueros, Kirk Weller, 2013-08-04 In spite of the fact that APOS Theory has been used extensively in numerous scholarly publications in the design of textbooks and in teaching practice, there is no single reference that contains all the relevant information about its components and provides guidance about its application. The goal of this book is to present the main elements of APOS theory. It should be useful for researchers who work with or would like to learn more about this theoretical approach, people who are interested in the way which mathematical conceptions are constructed according to this theory, Mathematics Education researchers, graduate students in Mathematics Education and Mathematics instructors.
