enthusiasm that accompanied ICPD there is growing concern about its effectiveness in the context of global health and development. Reproductive Health and Human Rights addresses that concern. The book grapples with fundamental questions about the relationships among population fertility decline, reproductive health, human rights, poverty alleviation and development, and assesses the various arguments, demographic, public health, human rights based and economic, for and against ICPD today. A number of the chapters address institutional challenges to ICPD and consider how the changing political, religious, academic and disciplinary contexts matter. Other chapters engage operational and conceptual issues and whether ICPD has been able to move the reproductive health agenda forward on topics such as maternal mortality, abortion, HIV/AIDS, adolescents, reproductive technologies and demography. Finally, several chapters examine how ICPD has been sidelined by emerging health and development agendas and what could be done in response. Unlike any book yet published, *Reproductive Health and Human Rights: The Way Forward* examines the state of the arguments for reproductive health and rights from a multidisciplinary perspective that provides policymakers, scholars and activists with a better understanding of how reproductive health and rights have developed their place in the global policy agenda and how they might evolve most effectively in the future.

Women's Human Rights Anne Hellum, Henriette Sinding Aasen, 2013-07-11. As an instrument which addresses the circumstances which affect women's lives and enjoyment of rights in a diverse world, the CEDAW is slowly but surely making its mark on the development of international and national law. Using national case studies from South Asia, Southern Africa, Australia, Canada and Northern Europe, *Women's Human Rights* examines the potential and actual added value of the Convention on the Elimination of All Forms of Discrimination against Women in comparison and interaction with other equality and anti-discrimination mechanisms. The studies demonstrate how state and non-state actors have invoked, adopted or resisted the CEDAW and related instruments in different legal, political, economic and socio-cultural contexts and how the various international, regional and national regimes have drawn inspiration and learned from each other.

Education, Human Rights and Peace in Sustainable Development Maigul Nugmanova, Heimo Mikkola, Alexander Rozanov, Valentina Komleva, 2020-11-19. The aim of sustainable development is to balance our economic, environmental and social needs, allowing prosperity for current and future generations. Countries must be allowed to meet their basic needs of employment, food, energy, water and sanitation. There is a clear relationship between the three topics of the book: right to education has been recognized as a human right; education has a role in peace building. Additionally, education, human rights and peace have a significant role in sustainable development. The United Nations have defined a broad range of internationally accepted rights including civil, cultural, economic, political and social rights. However, this book demonstrates that there are still people and nations not respecting

linked to livelihood concerns about human well being and declining living standards often overlooked is the human right to development which remains largely unfulfilled In the face of successive global initiatives seeking to remedy these challenges it has become urgent to ask what the universal recognition of the right to development implies if it cannot be translated into improved well being for impoverished peoples around the world The contributors in this timely volume argue that setbacks to development are deeply rooted in the failure to implement the right to development which by nature guarantees equality of opportunities and equitable redistribution of the resources that contribute to better living standards Assessing policy and practical measures or the lack thereof they offer practical suggestions for implementation that will make the right to development a reality for everyone
