nonroutine questions aims to develop the child's problem solving and estimation skills while exposing them to valuable mathematical information that goes beyond their textbook. Hints and solutions are also provided for nonroutine or brain unfriendly questions. Moreover, each month begins with some elements of enrichment or recreational math to challenge or enrich the child. Through math activities, puzzles, and games, The Singapore Mathematics Calendar seeks to complement and supplement what the child is doing in school or at home by making math fun and educational. The Singapore Mathematics Calendar hopes to convey the message that mathematics needn't be drill and kill exercises; it can be fun yet challenging for students to be exposed to the beauty and joy of mathematics.

Math in Focus Homeschool Package, 1st Semester

Grade 4 Houghton Mifflin Harcourt, 1st Semester, 2009-11-25 Math in Focus presents the Singapore approach to math in a way that is easy to use and understand. Available for Kindergarten through 5th grade, Math in Focus: The Singapore Approach is the United States edition of Singapore's most widely used program. Carefully paced instruction that focuses on teaching fewer math topics per year to a level of mastery. Consistent use of visual models and manipulatives that carefully bridge the concrete and the abstract, encouraging algebraic thinking, facilitating communication of math ideas, and solidifying learning. Instruction centered around problem solving using multiple models to help students visualize and understand the math concepts. Ample practice for continuous ongoing assessment.

Research on Mathematics Textbooks and Teachers'

Resources Lianghuo Fan, Luc Trouche, Chunxia Qi, Sebastian Rezat, Jana Visnovska, 2018-02-13 This book focuses on issues related to mathematics teaching and learning resources including mathematics textbooks, teacher guides, student learning and assessment materials, and online resources. The book highlights various theoretical and methodological approaches used to study teaching and learning resources and addresses the areas of resources teachers and students at an international level. As for the resources, the book examines the role textbooks and other curricular or learning resources play in mathematics teaching, learning, and assessment. It asks questions such as: Could we consider different types of textbooks and roles they play in teaching and learning? How does the digitalization of information and communication affect these roles? What are the defining features of e-textbooks and how could we characterize the differences between the traditional textbooks and e-textbooks? As for the teachers, the book discusses the relationships between teachers' individual and collective resources and the way in which we could model such relationships. Specific questions addressed are: What is the role of teachers in developing textbooks and other teaching and learning materials? What are the relationships between resource designers and users? What are the consequences of these changing roles and relationships for the teaching of mathematics and for teacher knowledge and professional development? As for the students, the book explores how students as well as their teachers interact through resources. It raises and addresses questions such as: What are the effects of modern ICT, particularly internet, on students' use and the design of resources? How do changing patterns of use and design affect student behaviour, learning, and relationships to the subject of mathematics?
