While in the past the Air Force s technologically intensive mission has been highly attractive to individuals educated in
science technology engineering and mathematics STEM disciplines force reductions ongoing military operations and budget
pressures are creating new challenges for attracting and managing personnel with the needed technical skills Assessments of
recent development and acquisition process failures have identified a loss of technical competence within the Air Force that
is in house or organic competence as opposed to contractor support as an underlying problem These challenges come at a
time of increased competition for technical graduates who are U S citizens an aging industry and government workforce and
consolidations of the industrial base that supports military systems In response to a request from the Deputy Assistant
Secretary of the Air Force for Science Technology and Engineering the National Research Council conducted five fact finding
meetings at which senior Air Force commanders in the science and engineering acquisition test operations and logistics
domains provided assessments of the adequacy of the current workforce in terms of quality and quantity Strategic
