

17.1 Disconnecting the air intake pipe

17.2a Undo the retaining screws ...

17.2b ... release the air filter housing ...

## Every 36 000 miles (60 000 km) or 4 years

### 17 Air filter element renewal

- 1 Unclip the cover from the top of the engine and disconnect the air intake hose from the front of the air filter housing (**see illustration**).
- 2 Undo the four retaining screws from the top of the housing and withdraw it from the top of the engine (**see illustration**).
- 3 Lift the element from the air filter housing, noting its fitted position (**see illustration**).
- 4 Clean the inside of the main body and cover, then insert the new filter element.
- 5 Make sure the housing is located correctly – the bottom supports must locate securely, and the top must engage correctly to make a good seal.
- 6 Tighten the retaining screws across the top of the housing and refit the air intake hose and engine cover.

### 18 Fuel filter renewal

**Note:** The fuel lines on the top of the fuel filter are all colour-coded on the securing clips, make a note of the position of the fuel lines before removal.

- 1 The fuel filter is located in the left-hand side front of the engine compartment, next to the

battery. A water drain screw is provided on the base of the filter unit (**see illustration**).

- 2 Place a suitable container beneath the drain screw. To make draining easier, a suitable length of tubing can be attached to the outlet on the screw to direct the fuel flow.
- 3 Release the securing clip and disconnect one of the fuel lines (**see illustration**), then open the drain screw by turning it anti-clockwise.
- 4 Allow the entire contents of the filter to drain into the container, then tighten the drain screw.
- 5 Holding the new filter next to the old filter, disconnect each fuel line in turn off the old filter and connect them onto the new filter.
- 6 Unclip the old filter from its mounting bracket on the battery tray and clip the new

filter in its place (**see illustration**). Dispose of the old filter using the correct method.

- 7 Open the drain plug on the new filter and squeeze the hand pump (**see illustration**) until the fuel flows through the filter, then securely tighten the drain plug. For further information, see Chapter 4B to prime and bleed the fuel system.

### 19 Rear brake shoe and drum check

- 1 Remove the rear brake drums, and check the brake shoes for signs of wear or contamination. At the same time, also inspect the wheel cylinders for signs of leakage, and

17.3 ... and lift out the air filter element

18.1 Fuel filter drain screw (arrowed)

18.3 Disconnecting one of the fuel lines

18.6 Dispose of the old filter and fit new filter into mounting bracket

18.7 Squeeze the hand pump to fill filter with fuel
