Echnology Assessment in Software Applications Harold F. O'Neil, Jr., Eva Baker, Harold F. O'Neil, 2013-11-05 This volume offers an expansion of ideas presented at a recent conference convened to identify the major strategies and more promising practices for assessing technology The authors representing government business and university sectors helped to set the boundaries of present technology assessment by offering perspectives from computer science cognitive and military psychology and education Their work explores both the use of techniques to assess technology and the use of technology to facilitate the assessment process The book s main

purpose is to portray the state of the art in technology assessment and to provide conceptual options to help readers understand the power of technology. To the extent that these practices are empirically based, designers, supporters, and consumers will be given better information for their decisions.

On Evaluating Curricular Effectiveness National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Mathematical Sciences Education Board, Committee for a Review of the Evaluation Data on the Effectiveness of NSF-Supported and Commercially Generated Mathematics Curriculum Materials, 2004-11-12. This book reviews the evaluation research literature that has accumulated around 19 K-12 mathematics curricula and breaks new ground in framing an ambitious and rigorous approach to curriculum evaluation that has relevance beyond mathematics. The committee that produced this book consisted of mathematicians, mathematics educators, and methodologists who began with the following charge: Evaluate the quality of the evaluations of the thirteen National Science Foundation (NSF)-supported and six commercially generated mathematics curriculum materials. Determine whether the available data are sufficient for evaluating the efficacy of these materials and if not, develop recommendations about the design of a project that could result in the generation of more reliable and valid data for evaluating such materials. The committee collected, reviewed, and classified almost 700 studies, solicited expert testimony during two workshops, developed an evaluation framework, established dimensions/criteria for three methodologies (content analyses, comparative studies, and case studies), drew conclusions on the corpus of studies, and made recommendations for future research.

Distributed Leadership in Practice James P. Spillane, John B. Diamond, 2007-08-03. Distributed leadership has become an important term for educational policymakers, practitioners, and researchers in the United States and around the world, but there is much diversity in how the term is understood. Some use it as a synonym for democratic or participative leadership. This book examines what it means to take a distributed perspective based on extensive research and a rich theoretical perspective developed by experts in the field. Including numerous case studies of individual schools and providing empirically based accounts of school settings using a distributed perspective, this thorough volume explores how a distributed perspective is different from other frameworks for thinking about leadership. Provides clear examples of how taking a distributed perspective can help researchers understand and connect more directly to leadership practice. Illustrates how the

day to day practice of leadership is an important line of inquiry for scholars and for those interested in improving school leadership McGraw-Hill Reading ,2001 **Research in Education** ,1974 **Annual Summary of Investigations Relating to Reading** Samuel Weintraub,1995 **High Stakes Education** Pauline Lipman,2004-02-29 Noted scholar Pauline Lipman explores the implications of education accountability reforms particularly in urban schools in the current political economic and cultural context of intensifying globalization and increasing social inequality and marginalization along lines of race and class **Diagnosis and Correction in Reading Instruction** Dorothy Rubin,1997 This text is designed for use as a main text in undergraduate and graduate courses in reading diagnosis and correction taught in education departments This popular introductory text for diagnosing and correcting reading problems is now revised and updated based on the latest tests and research Using numerous examples and scenarios to illustrate concepts and techniques it is based on the premise that if diagnosis and correction are practiced as an integral part of daily reading instruction there will be less of a need for remediation **The Role of Testing in Elementary Schools** ,1991 **Remedial Teaching** Wayne Otto,1969 **CSE Report** ,1991 ERS Spectrum ,2000 **Literacies for the 21st Century** Donald J.
