not followed the traditional format of printed dictionaries. It is often the case that a headword actually a label expression does not consist of a single word but rather of expressions or even full sentences including synonyms or sentence fragments with similar meaning but formulated differently. These do not affect computer based searching. For compound expressions it is advisable to search for the individual components as well in order to uncover as many related meanings as possible. The EUIATE database contains certain entries whose translations are not available in all languages. As a result it may happen in my dictionary that the source language headword has no corresponding translation in the target language. I could have filtered out such entries but I ultimately decided to keep them in the dictionary as they fit and may still have informational value on their own. OECD Series on Testing and Assessment Customisation Opportunities of IUCLID for the Management of Chemical Data - 2nd edition OECD, 2021-06-09 IUCLID International Uniform Chemical Information Database is a software application designed to record, store, maintain and exchange data on chemicals. It is a key software application for both regulatory bodies and the chemical industry where it is used in the implementation of various regulatory programmes.

Chemical Risk Assessment Peter Fisk, 2013-10-28 This book is an essential guide and support to understanding of the science and policy procedure and practice that underpins the REACH risk assessments required for the use and placing on the market of chemicals in the European Union. A clear understanding of information provision and how this affects the assessment of chemical safety is fundamentally important to the success of policy on chemicals and ultimately to the sustainability of the chemicals industry. Within the book the scientific processes that underpin the policy are explained in a practical way. Importantly it includes coverage of techniques to help solve the problems of using potentially risky and hazardous chemicals through the use of less hazardous alternatives and green chemistry and also the analysis of the risks of the use of the most hazardous substances against the social and economic benefits of use. *Chemical Risk Assessment A Manual for REACH* covers the following main themes: i) Assessment of chemical risk ii) Risk management iii) Hazard reduction, substitution and green chemistry iv) Risk versus benefit socio-economic analysis. The book acts as a practical guide and overview to chemicals risk assessment and risk management in the EU context as well as a support text for planning for the challenges of the future which will see ever increasing pressure to withdraw hazardous substances from the EU and global market balanced against opportunities for innovation in the development of less hazardous chemicals.
