Materials Management In Clothing Production:

Materials Management in Clothing Production David J Tyler, 1992-04-15 Fabric and materials account for at least half the production cost of garments. Consequently the effective control of materials is a major objective in clothing production. Key areas for production control are discussed with particular reference to factors affecting the utilisation of markers and fabric. Principles for purchasing fabrics are outlined and related to the way companies operate in the market. Recent moves towards material requirements planning and the greater use of information technology for communications between suppliers and customers. Specifications, inspection techniques and the potential for economies by greater cooperation between suppliers and purchasers are also discussed. Apparel Manufacturing Technology T. Karthik, P. Ganesan, D. Gopalakrishnan, 2016-08-05 This book aims to provide a broad conceptual and theoretical perspective of apparel manufacturing process starting from raw material selection to packaging and dispatch of goods. Further engineering practices followed in an apparel industry for production planning and control, line balancing, implementation of industrial engineering concepts in apparel manufacturing, merchandising activities and garment costing have been included and they will serve as a foundation for future apparel professionals. The book addresses the technical aspects in each section of garment manufacturing process with considered quality aspects. This book also covers the production planning process and production balancing activities. It addresses the technical aspects in each section of garment manufacturing process and quality aspects to be considered in each process. Garment engineering questions each process operation of the total work content and can reduce the work content and increase profitability by using innovative methods of construction and technology. This book covers the production planning process, production balancing activities and application of industrial engineering concepts in garment engineering. Further the merchandising activities and garment costing procedures will deal with some practical examples. This book is primarily intended for textile technology and fashion technology students in universities and colleges, researchers, industrialists and academicians as well as professionals in the apparel and textile industry. Sustainable Materials Management Making Better Use of Resources OECD, 2012-10-17 This book outlines a series of policy principles for SMM, examines how to set and use targets for SMM and explores various policy instruments for SMM. Design of Clothing Manufacturing Processes Jelka Geršak, 2013-07-31 The era of mass manufacturing of clothing and other textile products is coming to an end; what is emerging is a post-industrial production system that is able to achieve the goal of mass customised low volume production where the conventional borders between product design, production and user are beginning to merge. To continue developing knowledge on how to design better products and services we need to design better clothing manufacturing processes grounded in science, technology and management to help the clothing industry to compete more effectively. Design of clothing manufacturing processes reviews key issues in the design of more rapid, integrated and flexible clothing manufacturing processes. The eight chapters of the book provide a detailed coverage of

the design of clothing manufacturing processes using a systematic approach to planning scheduling and control The book starts with an overview of standardised clothing classification systems and terminologies for individual clothing types Chapter 2 explores the development of standardised sizing systems Chapter 3 reviews the key issues in the development of a garment collection Chapters 4 to 7 discuss particular aspects of clothing production ranging from planning and organization to monitoring and control Finally chapter 8 provides an overview of common quality requirements for clothing textile materials Design of clothing manufacturing processes is intended for R D managers researchers technologists and designers throughout the clothing industry as well as academic researchers in the field of clothing design engineering and other aspects of clothing production Considers in detail the design of sizing and classification systems Discusses the planning required in all aspects of clothing production from design and pattern making to manufacture Overviews the management of clothing production and material quality requirements *Apparel Production Terms and Processes* Janace E.
